

THE AVINI Advantage™

JULY 2024 EDITION

AVINI HEALTH®

ADVANCES IN NATURAL HEALING

"In Avini's case, this is a true belief in the life-enhancing and lifesaving products and lifestyle possibilities!"

Belief!

What is Belief? It can be defined as the deep understanding and positive perspective of something within you. In Avini's case, this is a true belief in the life-enhancing and lifesaving products and lifestyle possibilities!

Each of us has a bucket of Belief. When that bucket is full, it overflows onto the people we are talking to about our awesome products! So, how do we get that Belief? How do we fill our bucket with so much Belief that it starts to overflow?

For some people, it is as simple as a life-changing result in their health or lifestyle. For many of us, it is the Belief that has poured over onto us from the people who introduced us to the products, their positivity, and attitude. And then, it is the continuous building up of information. Here at Avini, we have a myriad of ways to get this info.

Here are some ways:

1. Go to meetings, local meetings put on by leaders, Corporate Vision Tours, and Summits.
2. Listen to the Rev Calls.
3. Listen to the Tuesday Robben Family Testimonial Call.
4. Listen to the CEO Call on the first Tuesday of the month or the Opportunity Calls on the second and fourth Tuesday of each month by Doug Dickey.
5. Watch the Rik Deitsch Product Videos in the Avini Advantage App.
6. Go to Avinihealthtraining.com, read the research, listen to past calls, and most importantly, listen to or read the 1,400+ testimonials!

Your Belief bucket will need to be constantly refilled. There is a rumor that there are two negative people, and they get around a lot. Each time you meet one of these people, they poke a tiny pinhole in your bucket. You need to keep filling your bucket so it can keep overflowing!

Your leadership and corporate teams are here to help you continue to build your Belief!

Thanks for all you do!

Neil Roth

TECH & COMPLIANCE

Michael Polak III,
VP of IT and Compliance

Five Compliance Things You Need to Know:

Compliance is here to protect you, the Distributor, and make sure that the unique products we have come to love are only available through Avini Distributors. Sometimes you may get an email with a warning from our compliance department, and is it not meant to scare you, instead, it is meant to make sure that you are protecting yourself and the company. **Here are five easy tips to make sure you are compliant:**

1. Any material like flyers, social media posts, and websites must have your Avini Independent Distributor Logo. The logo can be found in your back office and should be used to differentiate it from Corporate Marketing.

2. When creating your website, make sure you are not using Avini in the domain name. For example, AviniDistributor.com is not allowed. You also need to use your Avini Independent Distributor Logo in the Headers and Footers of your website.

AVINI HEALTH®
ADVANCES IN NATURAL HEALING

3. You cannot sell on eBay, Amazon, or Shopify/WooCommerce websites. You can redirect products back to your unique Avini website, which keeps you in compliance.

4. In all of your marketing materials, social media posts, videos, podcasts, and on your website, you must have the following disclosure: *These statements have not been evaluated by the FDA. This product is not intended to diagnose, treat, cure, or prevent disease.

5. Crossline recruiting is not allowed. Anybody who sells another product with another company cannot recruit anyone from someone's downline. We must protect you, the Distributor.

You can read the full Policies and Procedures for more detailed information on **AviniHealth.com,** and with the five compliance requirements above, you can ensure you stay compliant. We appreciate everyone's efforts to keep Avini Health compliant.

Michael Polak III,
Michael Polak
VP of IT and Compliance

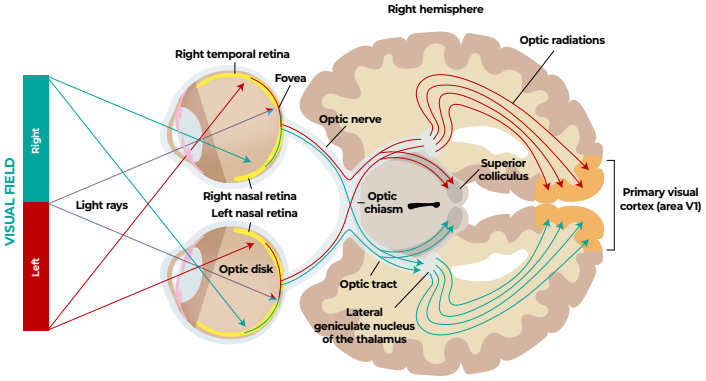
Focus and Clarity with Avini's Mind & Vision

Rik J. Deitsch, MS Biochemistry
Chief Scientific Officer, Avini Health

While there are many complaints related to aging, the principal ones of concern seem irretrievably linked to issues related to eyesight and mental clarity. Issues like: blurred vision (called refractive errors), Age-Related Macular Degeneration (ARMD), cataracts, diabetic retinopathy, and glaucoma seem almost universal and unavoidable as we age. Similarly, problems with memory retention ('can't find the word'), slower mental processing, trouble multitasking and actual dementia are accepted as just 'something that happens' as we age. We even make light of it with comments like, "I had a 'senior moment'..."

The fact is that there are things that we can do to improve visual acuity, prevent Age-Related Macular Degeneration, improve mental clarity, and even reduce the risks of dementia.

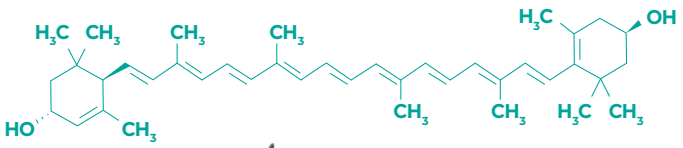
Additionally, research has provided insight into the clear connection between our eyes and our brains. We know that the eyes are an anatomical extension of the brain. Multiple parallels can be drawn between their neurons, vasculature, and immune response. Additionally, both organs modify similarly with disease; with current neuroscience providing a rapidly emerging area of research using the eyes as a window to changes occurring in the brain.



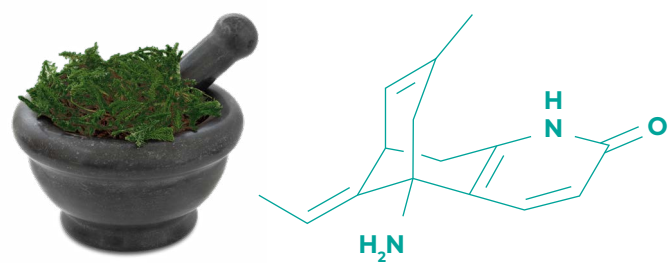
Keeping this in mind, it seems clear that what is good for the eyes must be good for the brain and what is good for the brain must be good for the eyes. While it seems obvious – Avini Health is the first company to utilize this information to create a cutting-edge product that addresses all of these issues in a simple and elegant formulation.

Avini's Plus Mind & Vision is a unique combination of nutrients and herbs (Huperzine A, Dimethylaminoethanol (DMAE), N-Acetyl-L-Carnitine, Floraglo Lutein, Bilberry Extract, and Detoxolite) which work in concert to maintain and enhance brain and nervous system functions as well as promote visual acuity. This includes mental alertness, clarity, memory retention, improved visual focus as well as improved night vision and glare recovery. These positive effects on structure and function of the brain, nervous system, and eyes are supported by numerous scientific/clinical studies.

FloraGLO® Lutein is naturally-sourced, unesterified lutein that is scientifically proven to protect our eyes from the part of visible light, known as blue light. It is most widely known for eye health due to a groundbreaking study known as the Age-Related Eye Disease Study 2 (AREDS2) – a study that used FloraGLO Lutein. A growing body of research also supports lutein as an important nutrient for brain function throughout all stages of life; from protecting the developing infant brain to supporting cognitive function in adults.



Huperzine A: An extract of the Chinese club moss, Huperzia serrata, huperzine A has been used in Chinese medicine for centuries. It is an effective inhibitor of acetylcholinesterase, the enzyme that degrades acetylcholine, the neurotransmitter important for normal memory and learning function. Huperzine A may help maintain cognitive function that has been degraded by a reduction in the brain's functional levels of the neurotransmitter acetylcholine.



DMAE (Dimethylaminoethanol) functions as a neurotransmitter and is neuroprotective in the brain. DMAE helps eliminate lipofuscin and free radicals from brain cells. It also helps increase free choline to be available in your system and stimulates cholinergic receptors that may promote the use of acetylcholine (ACh) in your brain, thus improving mood and energy while influencing sleep patterns.

N-Acetyl-L-carnitine (ALCAR): This acetylated high-energy ester of the amino acid L-carnitine contributes its acetyl group to the production of acetylcholine, the primary neurotransmitter for memory and thought. The enzyme that makes acetylcholine from acetyl groups and choline is choline acetyl transferase. The activity of this important enzyme has a tendency to decline with age, causing low acetylcholine levels which in turn are thought to contribute to the impairment of brain function that is associated with aging. Research has also found that ALCAR is active in optimizing the functioning of cerebral blood flow, as well as of nerve cell membranes.

Bilberry Extract has been clinically shown to stabilize tear production, increase the strength of collagen fibers in the capillaries, and help build strong blood vessels; which improves circulation to the eye. The potent anthocyanin content supports overall eye health and vision; and has been shown to be beneficial in supporting short-sightedness, as well as prevent age-related macular degeneration. Historically, British pilots during WWII ate bilberry jam to improve their vision at night.

Detoxolite: Avini's micronized and activated clinoptilolite zeolite that detoxifies while improving nutritional absorption and utilization. Detoxolite also has antioxidant capabilities, further supporting the ingredients and preventing photo-oxidation. Clinical studies have reported that users have experienced improved mental clarity as well as improved visual acuity.

In all, Avini Health's Mind & Vision delivers on its promise to provide benefits for visual acuity and mental clarity: providing nutrition to prevent photo-oxidation in the eyes, supporting healthy eye structure and function, providing neurotransmitters to improve cognitive function and providing components that support our neural networks. Try Mind & Vision – you'll think and see more clearly.

Remember to Register for the Avini Health Vision Tour 2024

AUGUST 10
MINNEAPOLIS, MN

SEPTEMBER 14
PORTLAND, OR

OCTOBER 12
ARLINGTON, VA

NOVEMBER 9
BOCA RATON, FL

REGISTER TODAY!

The Avini Health Vision Tour are regional events held throughout the country and offer an incredible opportunity for Distributors to learn more about our company and our revolutionary health and wellness products.

Attendees have the unique chance to engage and network with like-minded professionals, creating lifelong connections that can assist you on your health and wellness journey, and as a Distributor.

The events also offer an exclusive opportunity to meet and hear directly from the Avini Health leadership team, gaining valuable insights into the company's vision and the passion driving its success.

Visit Avinievents.com to register for the next regional event.

Message from
Douglas Dickey, VP of Sales

Congratulations to all the new Customers and Distributors who joined us during the month of June!

We welcome you and wish you success on your Avini Health Journey. Avini Health is dedicated and committed to providing the highest quality products focused on the prevention and physical detox of heavy metals, chemicals, and toxins from your body. Our unique products are exclusive to Avini Health Distributors and stand above all other detox products or programs. Our amazing Bio-Chemist, Rik Deitsch, has been formulating and inventing products for more than 25 years and his proprietary advanced technology is the cornerstone of our company. Our new Plus CardioCare and Plus Mind & Vision set new, high standards in the cardiovascular, mental, and visual health categories. All of Avini Health's products are designed to assist the body's natural system of detoxification and preventative healthcare. We say, "Give the body what it needs and remove what it doesn't need." We combine these great products with a solid compensation plan that supports the efforts of all Distributors to be compensated for the successful sharing of Avini Health's products with others. Our back office and Avini Advantage App contain many videos, testimonials, and information on products to support the use of Avini, and these resources are provided to you for free to help you share with others. We at Avini are highly motivated to make a difference in the lives of others.

What an opportunity to be at the forefront of such amazing technologies in prevention and detox. We encourage everyone who wants to participate in Avini to share their experience with people they know and be the ultimate force in making a difference in others' lives. Together, we can make the world a healthier and happier place.

Thanks for being the best part of Avini.

Sincerely,

Douglas Dickey
