

## Education

RIZAL TECHNOLOGICAL UNIVERSITY  
BS Computer Engineering

M. Eusebio Avenue, Pasig City  
Jun. 2014- Dec. 2020

## Professional Overview

### Jr. Software Engineer – Village 88 Inc.

Sep. 2021 – Feb. 2023

- Demonstrated proficiency in JQuery library and Ruby on Rails framework by developing and maintaining web applications that met high standards of quality, usability, and performance.
- Collaborated with cross-functional teams, including designers, project managers, and QA engineers, to identify requirements, refine specifications, and implement features that aligned with business goals and user needs.
- Performed Automated, and Manual Testing to the project in different browsers, and devices to make sure the cross-browser compatibility.

### Village 88 Inc. Training

Mar. 2021 – Sep. 2023

- Acquired proficiency in a wide range of technologies and tools commonly used in web development, including HTML, CSS, JS, LESS, SASS, Bootstrap, RWD, Database Design, GitHub, jQuery, MySQL, SQL Queries, Git, PHP, OOP, Code Igniter, Ajax, ORM, Node JS, Express, Socket.io, PostgreSQL, Redis, MongoDB, Unit Testing, Selenium, and Jenkins.
- Completed a challenging 16-week bootcamp program, graduating alongside 12 other exceptional students out of a cohort of over 170, and demonstrating a strong commitment to learning and growth throughout the program.
- Collaborated with a diverse group of peers, sharing knowledge and expertise, and building strong relationships that fostered a culture of learning and growth.

### Web Developer (Internship) – Chingu.io

Nov. 2020 – Jan. 2021

- Collaborated with a team of three members to design, develop, and deploy a resort review website using React JS, which improved user experience and engagement and generated positive feedback from users.
- Conducted testing and debugging of the website, using various tools and techniques, including unit testing, browser debugging, and code reviews, to ensure the website's functionality, usability, and performance met high standards.

## Projects

- [Portfolio Website](#)

GitHub Link: <https://github.com/nocosharold/hn-webwork>

- This project demonstrates my developer's skills in web development, including working with APIs and creating dynamic user interfaces.

- [Game Hub](#)

GitHub Link: <https://github.com/nocosharold/game-hub>

- A video game discovery application built with React + Typescript and Chakra UI is designed to help users discover new video games based on their interests and preferences.

- [Realtime Chat App](#)

GitHub Link: [https://github.com/nocosharold/realtime\\_chat\\_app](https://github.com/nocosharold/realtime_chat_app)

- The application uses web sockets to establish a connection between the client and the server, allowing real-time data exchange. The users can send and receive messages, create chat rooms, and join existing chat rooms.

**SKILLS:** HTML, CSS, JS, SASS, Bootstrap, Responsive Design, UI/UX Design, jQuery, Git/GitHub, ReactJS, Ruby on Rails, Node JS, Express JS, Mongo DB, Unit Testing, WordPress, Network Troubleshooting, PC, Smartphone, Laptop repair
