**Specialization:** Engineering (Computer Science & Engineering)

**Research Areas:** Soft Computing, Data Mining, Pattern Recognition, and Machine Learning

**Thesis Title:** Classification Techniques and Rule based System for Diabetes.

**Thesis Descriptions:** Diabetes means blood sugar is above desired level on a sustained basis. We have collected the real data of diabetes patients and suffered from some other diseases people or normal people in the hospital who visited to doctor. For this collected real dataset and some existing datasets have used several classification techniques and also developed rule-based diagnosis system for diabetes as per the suggestions of Diabetologist.
