

EVENT REPORT

Also Kaise?

2025-2026

INTRODUCTION

Also Kaise? was a three-episode online series jointly organized by NSDC MEC and IEEE MEC SB, with the objective of introducing students and enthusiasts to the world of Artificial Intelligence in an engaging yet beginner-friendly manner.

The series combined expert-led sessions with interactive challenges, ensuring participants not only learned about AI concepts and tools but also had opportunities to apply their understanding in creative ways. While IEEE MEC SB conducted the technical sessions, NSDC MEC curated and hosted competitions alongside each episode, designed to encourage active participation and practical exposure.

EPISODE1: INTRO TO AI TOOLS AND PROMPT ENGINEERING

The opening episode of *Alse Kaise?*, held on 23rd June 2025 introduced participants to AI tools and prompt engineering, led by speaker Alish Denny.

Following the session, NSDC MEC organized an interactive competition titled “**Real or AI?**”. This was a fast-paced online challenge where participants had to distinguish between human-made and AI-generated images, testing both their observation skills and their understanding of AI’s capabilities.

The competition was open to all and featured a prize pool of ₹300.

 Winners of the competition:

1st Place: Anand Sabu

2nd Place: Nehrin Rasheed

EPISODE 2: AI TOOLS FOR PRODUCTIVITY & AUTOMATION

The second episode of *Alse Kaise?*, led by Amodini A P (AI Research Fellow, People+AI), focused on unlocking the full potential of AI tools for productivity and automation.

To complement the learning, NSDC MEC conducted a competition titled “**AutomAlte**” on 5th July 2025. This challenge encouraged participants to design creative automation workflows using n8n, ranging from fun ideas like syncing memes to practical solutions such as organizing inbox chaos. The competition rewarded not just technical ability but also originality, pushing participants to think outside the box.

The competition was open to all and featured a prize pool of ₹500.

 Winners of the competition:

1st Place: Abhijith TS

2nd Place: Nipun G

EPISODE 3: AI TOOLS FOR IMAGE AND VIDEO GENERATION

The third episode of *Alse Kaise?*, led by Ikhlas P V (AI Engineer, Elkitch Pvt Ltd, Mysore), explored AI tools for image and video generation

To complement the learning, NSDC MEC hosted the competition **“PixelAlte”** on 24th July 2025. Participants were asked to choose their creative direction — either designing a movie poster or crafting a movie scene (video) — using a scene breakdown provided to them. They were free to experiment with any AI tool of their choice, making the challenge both flexible and innovative.

The competition was open to all and featured a prize pool of ₹500.

 Winners of the competition:

Aravindh MS – Image Generation

Arjun Kaimal – Video Generation

CONCLUSION

Also Kaise? provided an engaging introduction to Artificial Intelligence through three interactive episodes.

Led by expert speakers and complemented by competitions organized by NSDC MEC, participants gained both knowledge and practical experience with AI tools, prompt engineering, automation, and creative media generation.

The event encouraged learning, creativity, and hands-on exploration, making AI accessible and enjoyable for all participants.
