INTERVIEW SESSION

On the 14th of October, the students of Model Engineering College had the privilege of attending an insightful Industry Connect Session with Mr. Arun George Mathew, Principal Sales Specialist - AI at Google Cloud, and a proud alumnus of our college. The session, held at the Internal Auditorium, saw a fantastic turnout of students eager to learn from Arun's experiences in the tech industry.

Arun began the session by reminiscing about his college days, sharing some lighthearted and humorous stories from his time in the men's hostel. These anecdotes immediately created a comfortable and relatable atmosphere, reminding the students that even those who reach great heights once stood in their shoes.

He then walked us through his career journey, starting from his humble beginnings at a small company, followed by his tenure at Amazon, and finally landing at Google. Arun emphasized the importance of perseverance and continuous learning, which helped him transition from one role to another, eventually leading him to his current position at Google Cloud.

03

Arun's current role focuses on integrating generative AI (Gen AI) in various aspects of Google Cloud services. He explained how Google Cloud leverages the power of Gen AI to streamline processes and enhance the efficiency of AI-driven solutions. He also introduced us to an exciting product developed by Google called "Notebook LLM." This product, as he explained, has the remarkable ability to convert documents into podcasts, which opens up new possibilities in content consumption and accessibility.

The session concluded with Arun discussing the future of AI, machine learning, cloud technology, and their applications in various fields, such as startups and fintech. The session was highly engaging and offered a wealth of knowledge, leaving the attendees with a better understanding of the current and future landscape of AI and cloud technology. As a token of appreciation, a memento of gratitude was presented to Arun by Dr. Binu V. P., Head of the Department, as a gesture of thanks for sharing his valuable time and knowledge with us.
