## Introduction :

The success of Higher Education Institutions depends heavily on their quality. Comparable to subjective measures, such as a commitment to continuous development, objective quality measures like accreditation standards or student evaluations now are crucial. We must now look into the possibility of quality improvement in the context of Entrepreneurial Development. Even though the majority of Educational Institutions have requested government assistance for infrastructure and quality improvement initiatives. Institution may therefore, prosper and develop over time. In order to keep maximum effectiveness, higher education institutions must routinely review their policies and procedures.

## Objectives :

To identify and explore the scope of institutional quality enhancement concerning entrepreneurship development initiatives.

To search the scope for developing an enterprising environment, building social capital and entrepreneurship capital at HEIs.

To explore the emerging trends in Institutional quality enhancement through entrepreneurship development.

#### **Quality Enhancement in Higher Education Institution for Entrepreneurship Development and Self-Reliance.**

*Brief write-up about the seminar highlighting its importance in the National Context*

Enhancing the quality of higher education institutions is crucial in determining their success. Objective quality measures, such as accreditation criteria or student assessments, can be compared to subjective measures, such as an attitude of constant improvement. While most educational institutions have sought government support for infrastructural and quality improvement initiatives, we must now investigate the potential for quality improvement in the context of entrepreneurial development. Hence, institutions may flourish and become more productive over time. In addition, higher education institutions must regularly examine their policies and procedures to maintain optimal efficacy.
