Sub – Invitation as a resource person to conduct online guest lecture on “**Tricks of IUPAC Nomenclature of Chemistry**”

Respected Mam,

I have immense pleasure to invite you as a Resource Person to conduct online guest lectures on “**Tricks of IUPAC Nomenclature of Chemistry**”, to be held on 01st of April, 2024 at 05:00pm.

I, therefore request you to kindly accept our invitation and confirm your availability by contacting us.

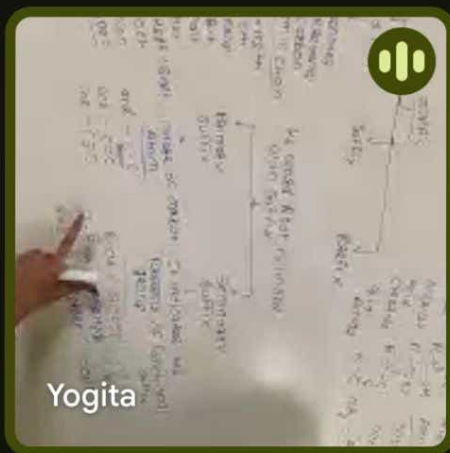

Looking forward to seeking your cooperation.

Thanking you.

A REPORT ON WORKSHOP

Topic : ‘Research Methodology’

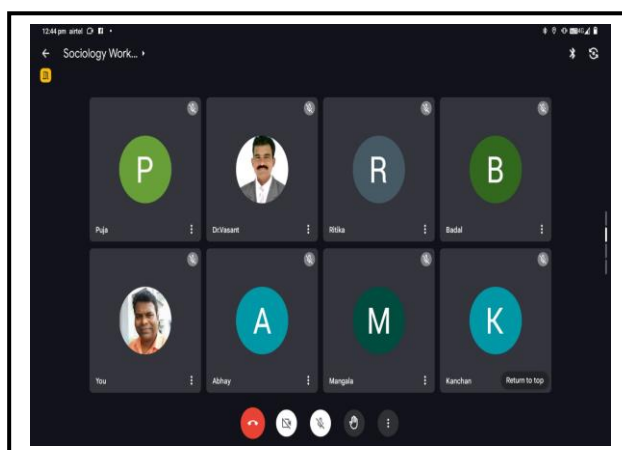

Date : Friday, 22nd March, 2024, at 11.30 am.

Department of Sociology, Annasaheb Gundewar College, Nagpur-13 organized online workshop in collaboration with Nagar Parishad Shivaji College, Movad, Tq. Narkhed, Dist. Nagpur on the topic ‘**Research Methodology**’ on Friday, 22nd March, 2024 at 11.30 am. The resource person Dr. Nitin Kayarkar, Asst. Professor, Department of Sociology, PGTD, Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur. He was taken the session on research methodology in social science,

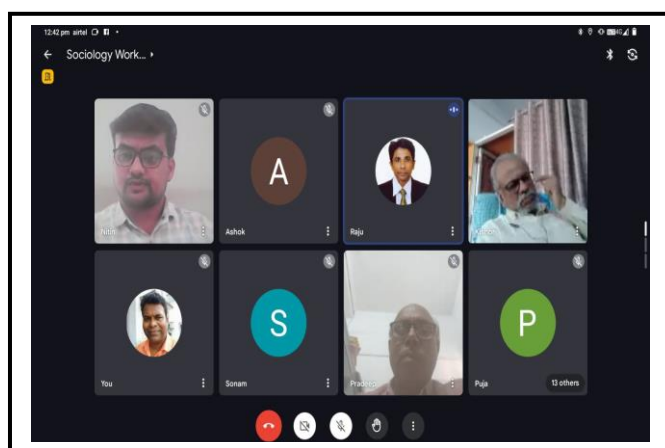

Many participants were taken participation in the workshop. This workshop was very beneficial to all students and faculty also. Dr. Gajanan Patil, Principal was given keynote address to the participants. Prof. Raju Burile, Assistant professor was given introductory speech and compared the session. Though Dr. Pradip Gajbhiye, Head Department of Sociology, Nagar Parishad Shivaji College, Movad, concluded the session with vote of thanks.

DEPARTMENT OF SCIENCE

NOTICE

All the students of B.Sc. hereby informed that there will be a guest lecture of **"Tricks of IUPAC Nomenclature of chemistry"** on **01/04/2024** at **5O'Clock** in the evening on Google Meet by **Miss. Yogita Badnore** mam.

All the students should join the given link by 4.55pm and attend the guest lecture for enhancing their knowledge on Career challenges.

Sub – Invitation as a resource person to conduct online guest lecture on “**Tricks of IUPAC Nomenclature of Chemistry**”

Respected Mam,

I have immense pleasure to invite you as a Resource Person to conduct online guest lectures on “**Tricks of IUPAC Nomenclature of Chemistry**”, to be held on 01st of April, 2024 at 05:00pm.

I, therefore request you to kindly accept our invitation and confirm your availability by contacting us.

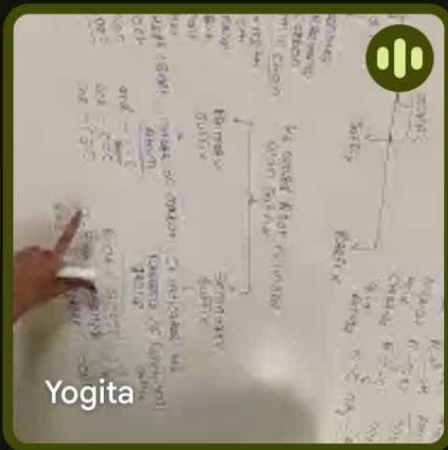

Looking forward to seeking your cooperation.

Thanking you.

1) Cancer induction-

- ☐ Cancer induction is the most significant long-term risk of exposure to low dose radiation.
- ☐ The major contributor to damage from radiation is through radiation changing a water molecule into a new form called a "free radical."
- ☐ Free radicals are highly chemically active and as such can have reactions with genetic molecules of the cell (i.e. with the DNA).
- ☐ It leads to mutation and cancer.

**Radiation doses, units and measurements-**

- International commission on radiation units and measurement (ICRU) has established special units for the measurement of radiation.

- Such units are used to define four quantities of radiation.

- ✓ Exposure
- ✓ Dose
- ✓ Dose equivalent
- ✓ Radioactivity

1) Exposure-

The term exposure refers to the measurement of ionization in air produced by X-rays.

2) Dose-

Dose can be defined as the amount of energy absorbed by a tissue.

3) Dose equivalent-

Different types of radiation have different effects on tissues.

Dose	SI unit	Old unit	Conversion factor
1) Exposure	C/kg air	Roentgen	1R = 2.58×10^{-4} C/kg
2) Absorbed dose	Gray (Gy)	rad	100rad = 1Gy
3) Equivalent dose	Sievert (Sv)	rem	100rem = 1Sv

**Summary-**

- ❑ Radiation is the emission or transmission of energy in the form of waves or particles through space or through a material medium.
- ❑ Radiation effects can be divided into two type's i.e. high dose and low dose.
- ❑ Low doses radiation damage the cells and spread out over long periods of time.
- ❑ Effects that appear after years, decades or generations are termed long term effects.
- ❑ Radioactive materials have a variety of important uses in medicine, industry, agriculture and sterilization, but if proper measures are not followed, ionizing radiation can cause tissue damage, cell death, genetic changes and cancer.
- ❑ Exposure to low dose radiation from CT Scans, X-ray, nuclear power plant accidents and atomic bombing causes long term radiation risk like leukemia, thyroid cancer, bone or blood disorders and cancer

Kashi...

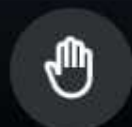

You

Zubiya

Teja 9 others

← dtj-rwqh-fba ▶

2) Thyroid cancer-

- ☐ Exposure to radioactive Iodine-131 released from nuclear power plant accidents comes mainly from consuming contaminated water, milk or foods.
- ☐ Inside the body, Iodine-131 accumulates in the thyroid gland, which is an organ in the neck.
- ☐ Exposure to radioactive iodine may increase the risk of thyroid cancer many years later, especially for children and adolescents.

Vidhi is presenting

Kashi...

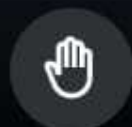

You

Zubiya

Teja 9 others

← dtj-rwqh-fba ▶

3) Nuclear power plant accidents-

- The radioactive isotopes released in nuclear power plant accidents include Iodine-131 and caesium-137.
- The most severe kinds of accidents, such as Chernobyl accident in 1986 & dangerous radioactive isotopes, such as Strontium-90 and Plutonium-239, may also be released.
- Exposure to radioactive iodine may increase the risk of thyroid cancer many years later, especially for children and adolescents.
- Approximately, 6.5 million residents of the contaminated areas surrounding Chernobyl received much lower amounts of radiation.
