BRIDGE COURSE

As per the circular of directors of Higher and Technical Education Departments, the bridge course should be implemented in the first session of the current academic year for the all students who are pursuing professional and traditional UG courses. Each college will have to setup a committee for the initiative and prepare a course.

Bridge Course helps students to make a successful transition into their new academic programs by providing them with the necessary background knowledge about the topics that will be covered in their new courses. In addition, Bridge Courses can also help students to develop the skills and abilities that they need to succeed in their new academic programs.

Faculty conduct introductory classes as Bridge course for newly admitted students in the college. It is starting for 1st semester students of the subject. As per requirement, the spans of this course will one week or fifteen days. Students are introduced with the fundamental concepts of the Computer subject. The Bridge Course is introduced for the new entrants with an objective to provide adequate time needed for the transition from secondary level to graduate level courses. Students, especially new entrants coming from schools, face many problems, for example where and who to deal with post admission administration issues, co-curricular activities and to mix up with classmates coming from different fields and backgrounds.

AIM

- ✦ To bridge the gap between previous knowledge and the course opted.

Objective

The objectives of a bridge course are as given below:

- To establish the fundamentals of a subject with the goal that students do not have any trouble when classes at college begin.
- To give a progress stage to set themselves up before the beginning of the primary semester.
- To overcome any barrier between the subjects learned at the pre-university level and subjects at the college level.
- To improve confidence of the slow learners to meet the knowledge requirements.
