Process Manual for Slow and Advanced Learners

Faculty deals with different kind of students within the classroom. Some are intelligent who grasp fast while some are weak and learn very slowly. Therefore, it is required to determine the abilities of the students in the class. Based on the ability determined, some students need only guidance and some students need a hard work and regular attention. On the basis of their preceding exam performance, current subject performance and class observation, learning speed students can be classified in two groups; **advanced learners** and **slow learners**. Every student has different learning attitudes and learning habits. A faculty has to adapt a teaching methodology such that he/she may not lose the attention of the slow learners and turn off the advanced learners.

Objectives

The objective behind such identification of slow and advanced learners are-

1. To identify the factors affecting the student's performance.
2. To analyze them with respect to the institutional framework.
3. After identification and analysis, to provide a proper solution for improving their performance and build a successful career.
4. To provide a desirable and amicable solution both for the slow learners and advance learners to avoid any discrimination between them and they must take interest to reach up to a position in due course of time where both the group feel at par with each other.

Process to Identify Slow and Advanced Learners

All students of a particular batch should be assessed on following parameters:

Sr. No.	Assessment Criteria	weightage
Internal Assessment		
1	Mid Term Test/Class Test	10%
2	Assignments/ Class participation and responsiveness / General awareness / Attentiveness etc.	10%
3	Class Attendance	10%
External Assessment		
4	University/ Board Exam	70%

The student securing marks below 40% would be identified as **Slow Learners** and the student securing marks above 70 % would be identified as **Advanced Learners**.

Programs and activities for SlowLearners

In order to encourage and motivate slow learners, special attention is paid to them and following programs and activities are to be carried out

- Remedial Classes: conducted for both theory and practical sessions.
- Assignments and Solving University Question Papers: Provide solutions of questions papers from last 2 years
- Counseling Sessions: Assist students in their weak areas of performance and suggest improvements

- Personal attention: Providing special attention on non-academic parameters such as Communication Skill, Public Speaking, decide on Carrier Goals, and Managing Academics & Personality.

- Such students are given regular class tests in order to improve their performance in the university exam. Further, faculty members revise the tough topics as per the student's requirement and provide university question bank and discuss the way of presenting the answers in the exam to score marks.

All this is achieved by incorporating audio and visual materials in addition to their regular course. Special hints and techniques are provided to them. At the end of the mentoring, success stories of the mentoring process by the faculty mentors is documented

Programs and activities for Advanced Learners

In order to encourage and motivate advanced learners following activities and programs are to be followed.

- Advance learning assignments or tasks are assigned to advanced learners
- Encouragement to complete NPTEL/SWAYAM/COURSERA/ courses
- Encouragement to Participate in Seminars/Conferences/ Live Projects / Domain specific Entrepreneurial Skills / Start- Up etc.
- Providing platform to become the part of Industry sponsored Internship/Research Work.
- Advanced learners are given representation in college level committees.
- Encourage to participate in national level contests and events.
- Encourage to become member of professional bodies and organize technical/professional events, research oriented.
