

Explore "The World of Gearing" in Detroit.

Kelli R. Hopkins

AGMA's Gear Expo '91, "The World of Gearing," opens October 20 and runs through October 23 at the Cobo Conference & Exhibition Center in "The Heart of the Manufacturing Industry," Detroit, MI. Gear Expo '91 is "the largest trade show ever specifically organized for the gear industry," according to Rick Norment, AGMA's Executive Director.

Gear Expo started in 1986 as a table-top exhibition and has grown into a full-fledged trade show. The Expo is held every two years on a rotation schedule among several cities. Detroit, the oldest city in the Midwest, especially lends itself to this trade show.

The "Motor City" is the heart of America's manufacturing base and produces millions of gearsets each year.

Gear Expo '91 will provide 35,000 square feet of exhibits by 79 companies from around the world. This forum offers gear manufacturers and suppliers an opportunity to exhibit their products and gives visitors the chance to make comparisons of the products and ask company representatives questions right at the show. An index of Gear Technology advertisers who are exhibiting at this year's expo can be found on the adjoining page.

Products and processes on display include broaching, custom gears, cutting tools, finishing, forging, grinding, heat treating, hobbing, inspection, lubricating, milling, shaping, shaving, and testing, to name a few.

The Cobo Conference & Exhibition Center is on the banks

of the Detroit River in downtown Detroit and provides easy access to a variety of hotels, restaurants, cultural attractions, and historical sites.

Transportation in the downtown area is a matter of personal preference - visitors can choose from a variety of unique options. Downtown

Detroit's elevated transportation system, The People Mover, carries people on a 2.9 mile track around the central business district. Buses, rental cars, taxi cabs, and antique trolley cars are other travel possibilities. Parking is no problem - there are 2,200 spaces at the Cobo Center and 3,000 spaces at the adjoining Joe Louis Arena.

Show hours are 12:00 p.m. to 6:00 p.m. on Sunday; 10:00 a.m. to 8:00 p.m. on Monday; 9:00 a.m. to 6:00 p.m. on Tuesday; and 12:00 p.m. to 4:00 p.m. on Wednesday.

Once again the AGMA Fall Technical Meeting will be held in conjunction with Gear Expo. The FTM will be held on October 23-25 at the Westin Hotel, Renaissance Center, a short distance from the Cobo Center. This year's meeting has been expanded to allow for more presentations. The papers will feature a variety of gearing subjects, including 3-D contact analysis, gear tooth friction, gear stress distribution, oil jet gear lubrication, and low noise marine gears.

For more information on either the 1991 Fall Technical Meeting or Gear Expo '91, call AGMA Headquarters at (703)
