

See Drake's newest External Thread Grinder at IMTS.

Our GS:TE-LM External Thread & Worm Grinder is the perfect machine for grinding high quality worms for steering, machine tool and other power transfer applications.

- High accuracy index worms
- Rack piston worms
- Automated production of DIN 2 worms in medium volume production cells

All Drake machines can be equipped with the latest automation packages.

Our Technologies, Your Tomorrow

Close the Black Hole of Downtime

"What a fantastic bit of kit the GE20A hobber is having run trouble free and 500,000 parts since installation."
— Ken Manners CEO, SP Metal Forging, South Africa

Downtime is a black hole that impairs productivity, kills the bottom line and simply shouldn't happen due to breakdowns. With a philosophy of continuous process improvement, in conjunction with an active reliability and maintainability program, Mitsubishi's gear machine products deliver best in the business quality and predictable production. Experience perfect production systems by visiting www.mitsubishigearcenter.com or contact sales 248-669-6136.

ZOLLER
expect great measures

With over 85 years of technological leadership in bore sizing and finishing, Sunnen Products Company has the solution you need for the precision honing of gears.

Sunnen can provide a system for virtually any gear honing application—helical, pinion, worm, sprocket or spur—and in virtually any material from powdered metal to hardened steel.

Sunnen offers three different types of honing technologies, including conventional, single-pass or KROSSGRINDING®.

Sunnen also offers the industry's largest choice of honing machines... horizontal or vertical, single-spindle or multi-spindle, automated or manually operated. No matter what you require for precision honing of gears, Sunnen has the answer.

Visit us at the IMTS Show Booth N-7400 to have your questions answered.
