Geared on Value

The target is clear when it comes to supplying the best value in gear inspection. Our mission is to offer the widest selection of reliable, productive and precise Gear Inspection Machines. We aim to be at the pinnacle of design and through our global partnering with the finest manufacturing processes, materials and components, we deliver durable, robust machines with a high degree of up time.

At Wenzel America we believe that when advanced German engineering meets American ingenuity we produce a product line with:

- A huge range to inspect any size gear,
- A Wear-free system design, and
- Is built sturdy with Granite for stability, accuracy and reliability.

Break-Through Induction Contour Hardening Technology for Complex-Shaped Components

TSH Technology

Now you can induction contour harden these components and more!

Spiral Bevel Pinion

13" Helical Gear

Hypoid Drive
Pinion

Journal Cross

- Synergistic combination of low hardenability (LH) advanced steels and superior induction hardening techniques
- Proven cost-effective technology replacing gas carburizing for heavy duty steel components
- Novel steel metallurgy leading to lower cost LH steels and superior component metallurgy
- Fine grain highly compressed martensitic surface layer enhancing part performance / reliability
- Low cost, repeatable and robust, lean and green process allowing individual gear traceability

ERS Engineering has partnered with Techmash to offer this innovative TSH technology to the North American Market. Contact ERS Engineering to learn how you can use the TSH Technology for your components.
