

## Broadway Gear

Broadway Gear combines the capabilities of one of China's largest gear manufacturers with the dedicated service of a Texas based sales office to meet your precision gearing needs. A market leader in the manufacture of fine module gears for over four decades we have the capability and experience to get your job done right.

- Custom Gears
- Custom Gearboxes
- Miniature Gearboxes
- Planetary Gearboxes

Proudly serving the precision gearing needs of the aerospace, aviation, automotive, electronics, marine, printing, textile and other industries worldwide. Come visit us at Gear Expo Booth #1209.

## Geared on Value

The target is clear when it comes to supplying the best value in gear inspection. Our mission is to offer the widest selection of reliable, productive and precise Gear Inspection Machines. We aim to be at the pinnacle of design and through our global partnering with the finest manufacturing processes, materials and components, we deliver durable, robust machines with a high degree of up time. At Wenzel America we believe that when advanced German engineering meets American ingenuity we produce a product line with:

- A huge range to inspect any size gear,
- A Wear-free system design, and
- Is built sturdy with Granite for stability, accuracy and reliability.

### Striving for the Highest Precision Value in

With over 85 years of technological leadership in bore sizing and finishing, Sunnen Products Company has the solution you need for the precision honing of gears. Sunnen can provide a system for virtually any gear honing application—helical, pinion, worm, sprocket or spur—and in virtually any material from powdered metal to hardened steel.

Sunnen offers three different types of honing technologies, including conventional, single-pass or KROSSGRINDING®. Sunnen also offers the industry's largest choice of honing machines... horizontal or vertical, single-spindle or multi-spindle, automated or manually operated. No matter what you require for precision honing of gears, Sunnen has the answer. Visit us at the Gear Expo, Booth 1402 to have your questions answered.

## Hob large and heavy parts precisely

**The Bourn & Koch 400H CNC** horizontal hobbing machine is a 7-axis machine that can hob spur gears, helical gears, splines and threads on cylindrical blanks or shafts. Its powerful, direct drive work spindle and extremely stable, steel-polymer composite components make it ideal for manufacturing large and heavy shaft parts up to 406 mm in diameter and 6.4 module. Shaft lengths up to 76" can be processed by the extended bed version on display at AGMA's Gear Expo.

See the 400 H hobber in Star SU's booth (1329) during AGMA's Gear Expo in Cincinnati, OH.

Request a private demo by visiting [www.star-su.com/400H](http://www.star-su.com/400H) or call Star SU at (847) 649-1450 for additional details.

## HobSource Inc.

Custom gear cutting tools

Performance  
Dependability  
Value

Whether you hob, shape, shave, broach or mill, HobSource delivers the quality tools and personal service you expect. Each and every tool is manufactured to exacting quality standards in ISO/QS facilities from the latest grades of high speed steel and carbide using CAD/CAM technology and state of the art CNC equipment. If you demand performance, reliability and dependability from your tools and vendors, we challenge you to try our tools. Your bottom line will be glad you did.

**80**  
Years Of Innovation  
*In The Gaging Industry*  
**1928 - 2008**

Comtorgage Corporation offers easy to use, rugged and re-peatable hand held gages for the measurement of Pitch Diameter (MOP, MBP, etc.) of internal or external splines and gears. Comtor Spline Gages incorporate two (or three) AGD gage pins of the same size as specified on the part print.

The pins are allowed to "float" to compensate for minor mis-alignment or variations in tooth spacing. Measurement results are monitored via Digital or Analog Amplifier.

## The Mitsubishi E Series

### The Truth be Told

E could stand for: Excellence, Extraordinary, Extreme, etc...., however, the simple truth is that the letter E denotes a series of gear shapers, hobbers, shavers and grinders that epitomize the latest and most advanced process technology that Mitsubishi customers have come to rely on.

To personally experience the world-class performance of the Mitsubishi E Series of machines visit [mitsubishigearcenter.com](http://mitsubishigearcenter.com) or contact sales 248-669-6136.
