

About This Directory

The 2013 *Gear Technology* Buyers Guide was compiled to provide you with a handy resource containing the contact information for significant suppliers of machinery, tooling, supplies and services used in gear manufacturing.

Cutting Tools	Page 44
Gear Blanks & Raw Materials	Page 45
Gear Machines	Page 46
Grinding Wheels & Abrasive Tools	Page 48
Heat Treating Equipment	Page 48
Heat Treating Services	Page 50
Inspection Equipment	Page 50
Lubricants	Page 52
Machine Tools	Page 52
Resources	Page 54
Services	Page 55
Software	Page 56
Used Machinery	Page 58
Workholding & Toolholding	Page 58
A to Z Company Index	Page 66
VIP Suppliers Showcase (a special advertising section)	Page 62

Bold Listings throughout the Buyers Guide indicate that a company has an advertisement in this issue of *Gear Technology*.

But Wait! Where are the Gear Manufacturers Listed?

If you are looking for suppliers of gears, splines, sprockets, gear drives or other power transmission components, see our listing of this issue's power transmission component advertisers on page 59. In addition, you will find our comprehensive directory in the December 2013 issue of *Power Transmission Engineering* as well as in our online directory at www.powertransmission.com.

How to Get Listed in the Buyers Guide

Although every effort has been made to ensure that this Buyers Guide is as comprehensive, complete and accurate as possible, some companies may have been inadvertently omitted. If you'd like to add your company to the directory, we welcome you. Please visit www.geartechology.com/getlisted.php to fill out a short form with your company information and Buyers Guide categories. These listings will appear online at www.geartechology.com, and those listed online will automatically appear in next year's printed Buyers Guide.

Handy Online Resources

The Gear Industry Buyers Guide – The listings printed here are just the basics. For a more comprehensive directory of products and services, please visit our website, where you'll find each of the categories here broken down into sub-categories:

www.geartechology.com/dir/

The Power Transmission Engineering Buyers Guide – The most comprehensive online directory of suppliers of gears, bearings, motors, clutches, couplings, gear drives and other mechanical power transmission components, broken down into sub-category by type of product manufactured:

GLOBAL GEAR ENGINEERING OPPORTUNITIES AVAILABLE

Moog's motion control technology and products are found around the world from helicopters to fighter planes and deep sea drills to syringe pumps. We foster an environment where our 11,000 engineers and technologists feel empowered and inspired to achieve remarkable things. The work we do matters, as does every single person who works with us.

We're looking for talented engineers with at least seven years of experience in gear manufacturing to join our business in **Baguio City, Philippines**, **Torrance, California** and **Wolverhampton, United Kingdom**. If you are interested in joining our team in the Philippines, but are not a resident there, you will receive housing benefits and travel allowance.

To apply, please send your resume to tpotts@moog.com or visit moog.jobs

Spectac-GEAR-lar Workholding

Mandrel type 213

This mandrel type is ideal for small clamping Ø and extremely slender mandrel bodies. In comparison with our MANDO T211 with draw bolt, the segmented clamping bushing is not released via ejector pins in the mandrel body; rather it is coupled in on the upper end of the draw bolt. Thanks to this trick, the mandrel body can be implemented with even more rigidity. That's why this mandrel type is in such demand, particularly for gear cutting applications where interrupted cuts are on the daily agenda. The vulcanized segmented clamping bushings are supplied as a clamping unit mounted on the draw bolt and thus can be conveniently changed. For greater clamping Ø you can also change the segmented clamping bushings individually through the use of two-piece draw bolts.

The ATLAS logo is displayed in red capital letters with a registered trademark symbol.

ATLAS delivers the best in...smart solutions.

Ipsen's ATLAS® integral quench furnaces are highly engineered, sophisticated machines that are easy to operate and maintain, all while being extremely cost effective. ATLAS delivers top-quality uniformity through cutting-edge technology and design:

- Intelligent controls, Carb-o-Prof®, provide you with your very own electronic metallurgist
- SuperQuench with adjustable oil speed and powerful agitators
- Muffle system for uniform temperature control
- Safety – all ATLAS furnaces are water free for maximum safety
- 30% less gas consumption
- Recon® burners – single-ended recuperated tubes (SERT)

The unique HybridCarb® from Ipsen is an ultra-efficient gassing system designed to replace endothermic generators and other gassing systems. Its core strength is precision gas control. Instead of burning off excess gas, the process gas is reconditioned and reused, increasing efficiency up to 90 percent.

Other benefits of HybridCarb include:

- Connects quickly and easily
- Increases carburizing efficiency
- Reduces CO₂ emissions by 90%
- Less expensive to operate than endogenerators
- Consumes significantly less gas
- Lowers heat output, creating a more comfortable work environment
- Powers up and down at anytime, quickly and easily

HybridCarb®
