## Anglgear™: Made in the USA, Powering Industry Worldwide

Andantex USA's objective over the years has always remained the same: to provide innovative, high-quality **gearboxes and solutions for use on industrial machinery**. The Anglgear™ right angle drive is an example of our commitment to our customers' needs and applications. Since purchasing this product line more than 30 years ago, the Anglgear™ has grown into a product that is now used in various applications across the printing, converting, packaging, general purpose and aerospace industries.

In addition, we also supply all branches of the military, conforming to contracts specifying various MIL SPEC requirements.

The Anglgear™ line consists of 14 different models available from stock in both an Inch and Metric series and sold worldwide. ***We take pride in the fact that all Anglgear™ drives are assembled and shipped from our headquarters in New Jersey. Here, we manufacture, and inspect every unit that goes out the door. This ensures consistent quality in all our gearboxes.***

Our standard units are available from stock in 1:1 and 2:1 ratios, with 2 shafts or 3, 2 flanged or 3 flanged units, and are lubricated for life before being shipped.

Over the past 10 years, we have seen that a huge part of our growth in this line is due to the fact that we will modify our units to meet our customers' design specifications. **It doesn't matter if it's a one-piece special order or a quantity order;** our engineers will work with our customers to give them the best solution for their application and needs.

Examples of our modifications include various shaft lengths and configurations, including shafts with flats, splines, holes, etc. We also offer 3-way units with counter-rotating output shafts, as well as custom housings with flanges and bosses removed for custom mounting applications, special materials, bearings, seals and epoxy coatings as needed. We can provide units with special backlash upon request, and offer various options for grease including food grade, high temperature and radiation resistant.
