

euroscreen®

Frame Vision

Frame Vision is a high quality framed screen with a tensioning system that puts equal tension on each part of the viewing surface, making it perfectly smooth. The surface is stretched on a 10cm aluminium frame that features an attractive black border, giving the screen a theatre-like appearance. As an option, Vel-Tex® can be added to the frame, for total control of the ambient light and reducing the reflections to an absolute minimum. Frame Vision is very quick and easy to assemble.

SCREEN DIMENSIONS FRAME VISION

Total frame width = Viewing width + 200mm

Total frame height = Viewing height + 200mm
