

euroscreen®

Sesame

Sesame is Euroscreen®'s award winning model with an innovative recessed ceiling case design for installation within a ceiling void. It is very suitable for installation in suspended or plastered ceilings.

It is equipped with adjustable inner brackets which allow for fine-tuning of the bottom dowel for perfect flush closure when retracted up into case. The white aluminium case itself has a stylish appearance, and unique removable integrated external flange profiles for easy and quick service access. The case also features a concealed drop function of the complete screen section, which enables easy access and the possibility to install case first and screen later. Brackets especially designed for Sesame provide a trouble-free installation of the case in a prepared ceiling cut-out up to a 100 cm ceiling void.

Sesame Tab Tension

This model features all of the benefits mentioned above, and an additional selection of tensioned screen surfaces. The tensioning function makes it possible to adjust the flatness of the surface and therefore provide a perfectly flat viewing surface for years to come.

SCREEN DIMENSIONS SESAME

Considerations regarding cut out width
 Minimum cut out width: screen width + 305
 Maximum cut out width: screen width + 343
 Recommended cut out width: screen width + 325
