

The total solution for your IT-infrastructure

Consultancy

Strategic advice on your digital transformation

Are you one of the companies that considers digital transformation a top priority? The most common reasons are reduced costs, increased productivity and/or greater flexibility. Many organizations lack sufficient in-house IT expertise. That is why we believe it is important to build a good relationship with you - so that we can translate your vision into the right strategy. Once we are on the same level, our experts will create a final design with corresponding timelines. Are you ready to take on the digital challenge with us?

Cloud

Hybrid cloud solutions for your IT-infrastructure

How does your organization stay innovative, scalable, agile and flexible? The transition to the cloud brings many benefits.

- IaaS: Secure and scalable cloud platform
- Cloud Connect: Direct access to the public cloud
- CloudHub: Hybrid and multi-cloud solutions
- Hybrid Datacenter: The best of both worlds

Colocation

Secure and reliable housing of your IT-infrastructure

Do you want to guarantee the continuity and security of your IT-infrastructure? Housing your IT-infrastructure in one of our Tier III datacenters guarantees you this essential stable basis for your business.

- Private Rack: Your IT in its own environment
- Private cage: Dual protection of your IT
- Twin datacenter: Redundant colocation
- Support services: Have trusted datacenter services performed for you

Connectivity

Supports the continuity of your business operations

What is not connected to the internet nowadays? Connectivity is also essential for the continuity of your business operations.

- Eurofiber Cloud Infra network: Datacenter connect-ring
- Carriers: Online 24/7
- Eurofiber Services: Business fiber
- Datacenter interconnectivity

At the heart of the digital society

About Eurofiber Cloud Infra

Your digital infrastructure partner

Eurofiber Cloud Infra provides industry leading cloud infrastructure services. We offer smart, open and future-proof cloud infrastructure solutions to companies, governments and non-profit organizations. Our portfolio is built on 6 Tier III neutral datacenters, a software defined datacenter network "DCspine" connecting more than 80 datacenters in the Netherlands, Belgium and Germany, a state of the art IaaS offering as well as a hybrid cloud platform "CloudHub" and cloud consulting services. Customers benefit from our assets, capabilities and deep expertise in consulting, implementation and management of open hybrid cloud infrastructure. We have already provided solutions and assistance to more than 751 customers for their digital infrastructure.

Customer Portals

The Eurofiber Cloud Infra customer portals

Once your digital infrastructure is up and running, you can use our individual platforms to quickly manage many things yourself, such as real-time monitoring of power consumption or patch requests. You can also quickly arrange datacenter interconnectivity with flexible durations, or bring your digital infrastructure together in a controlled manner in one central architecture. CloudHub is end-to-end based on secure private connections and includes the integration of cloud landing zones based on

A reliable partner that helps you find the right solutions

We help you create a conclusive digital infrastructure that provides the perfect foundation for the business continuity of your organization from an open infrastructure model. Fully set up and flexible to manage.

the latest AWS and Azure reference architectures, and is expandable to hundreds of cloud providers both nationally and internationally.

Certification

A powerful tool to optimize processes

To ensure we provide our customers with the highest possible standards of service and advice, our datacenters are subject to continuous maintenance, improvement and (re) certification. Eurofiber CloudInfra has ISO 9001, ISO 14001, ISO 27001, ISO 50001 and ISO 22301 certification as well as ISAE-3402 type II certification. We are also the only company in the Netherlands as Microsoft Advanced Network Specialist.

Sustainability

A sustainable business model

Eurofiber Cloud Infra is constantly working on the optimisation of energy efficiency and is therefore looking for new techniques in order to improve its service in all possible ways and make them more sustainable. Sustainability and environmentally friendly have become extremely important pillars in our society. In your search for the right experts for your infrastructure, this is a factor that should not be forgotten. Think of datacenters with, among other things climate control, residual heat, cold corridors, smart lighting and sustainable materials. But there are many other actions that a datacenter can take into
