About Eurofiber

Lifeline for the digital society.

The Eurofiber Group is a corporation consisting of subsidiaries, making the group a fiber specialist and a data center connectivity provider.

Eurofiber Belgium, Eurofiber the Netherlands, Eurofiber Germany, and Eurofiber France

have provided industry-leading digital infrastructure since 2000. We rely on our own fiber-optic network and data centers, and provide smart and future-proof solutions for companies, government bodies and non-profit organizations. Customers have complete freedom to choose the services, applications and providers they need. This allows them to tap into the full potential of digital innovation.

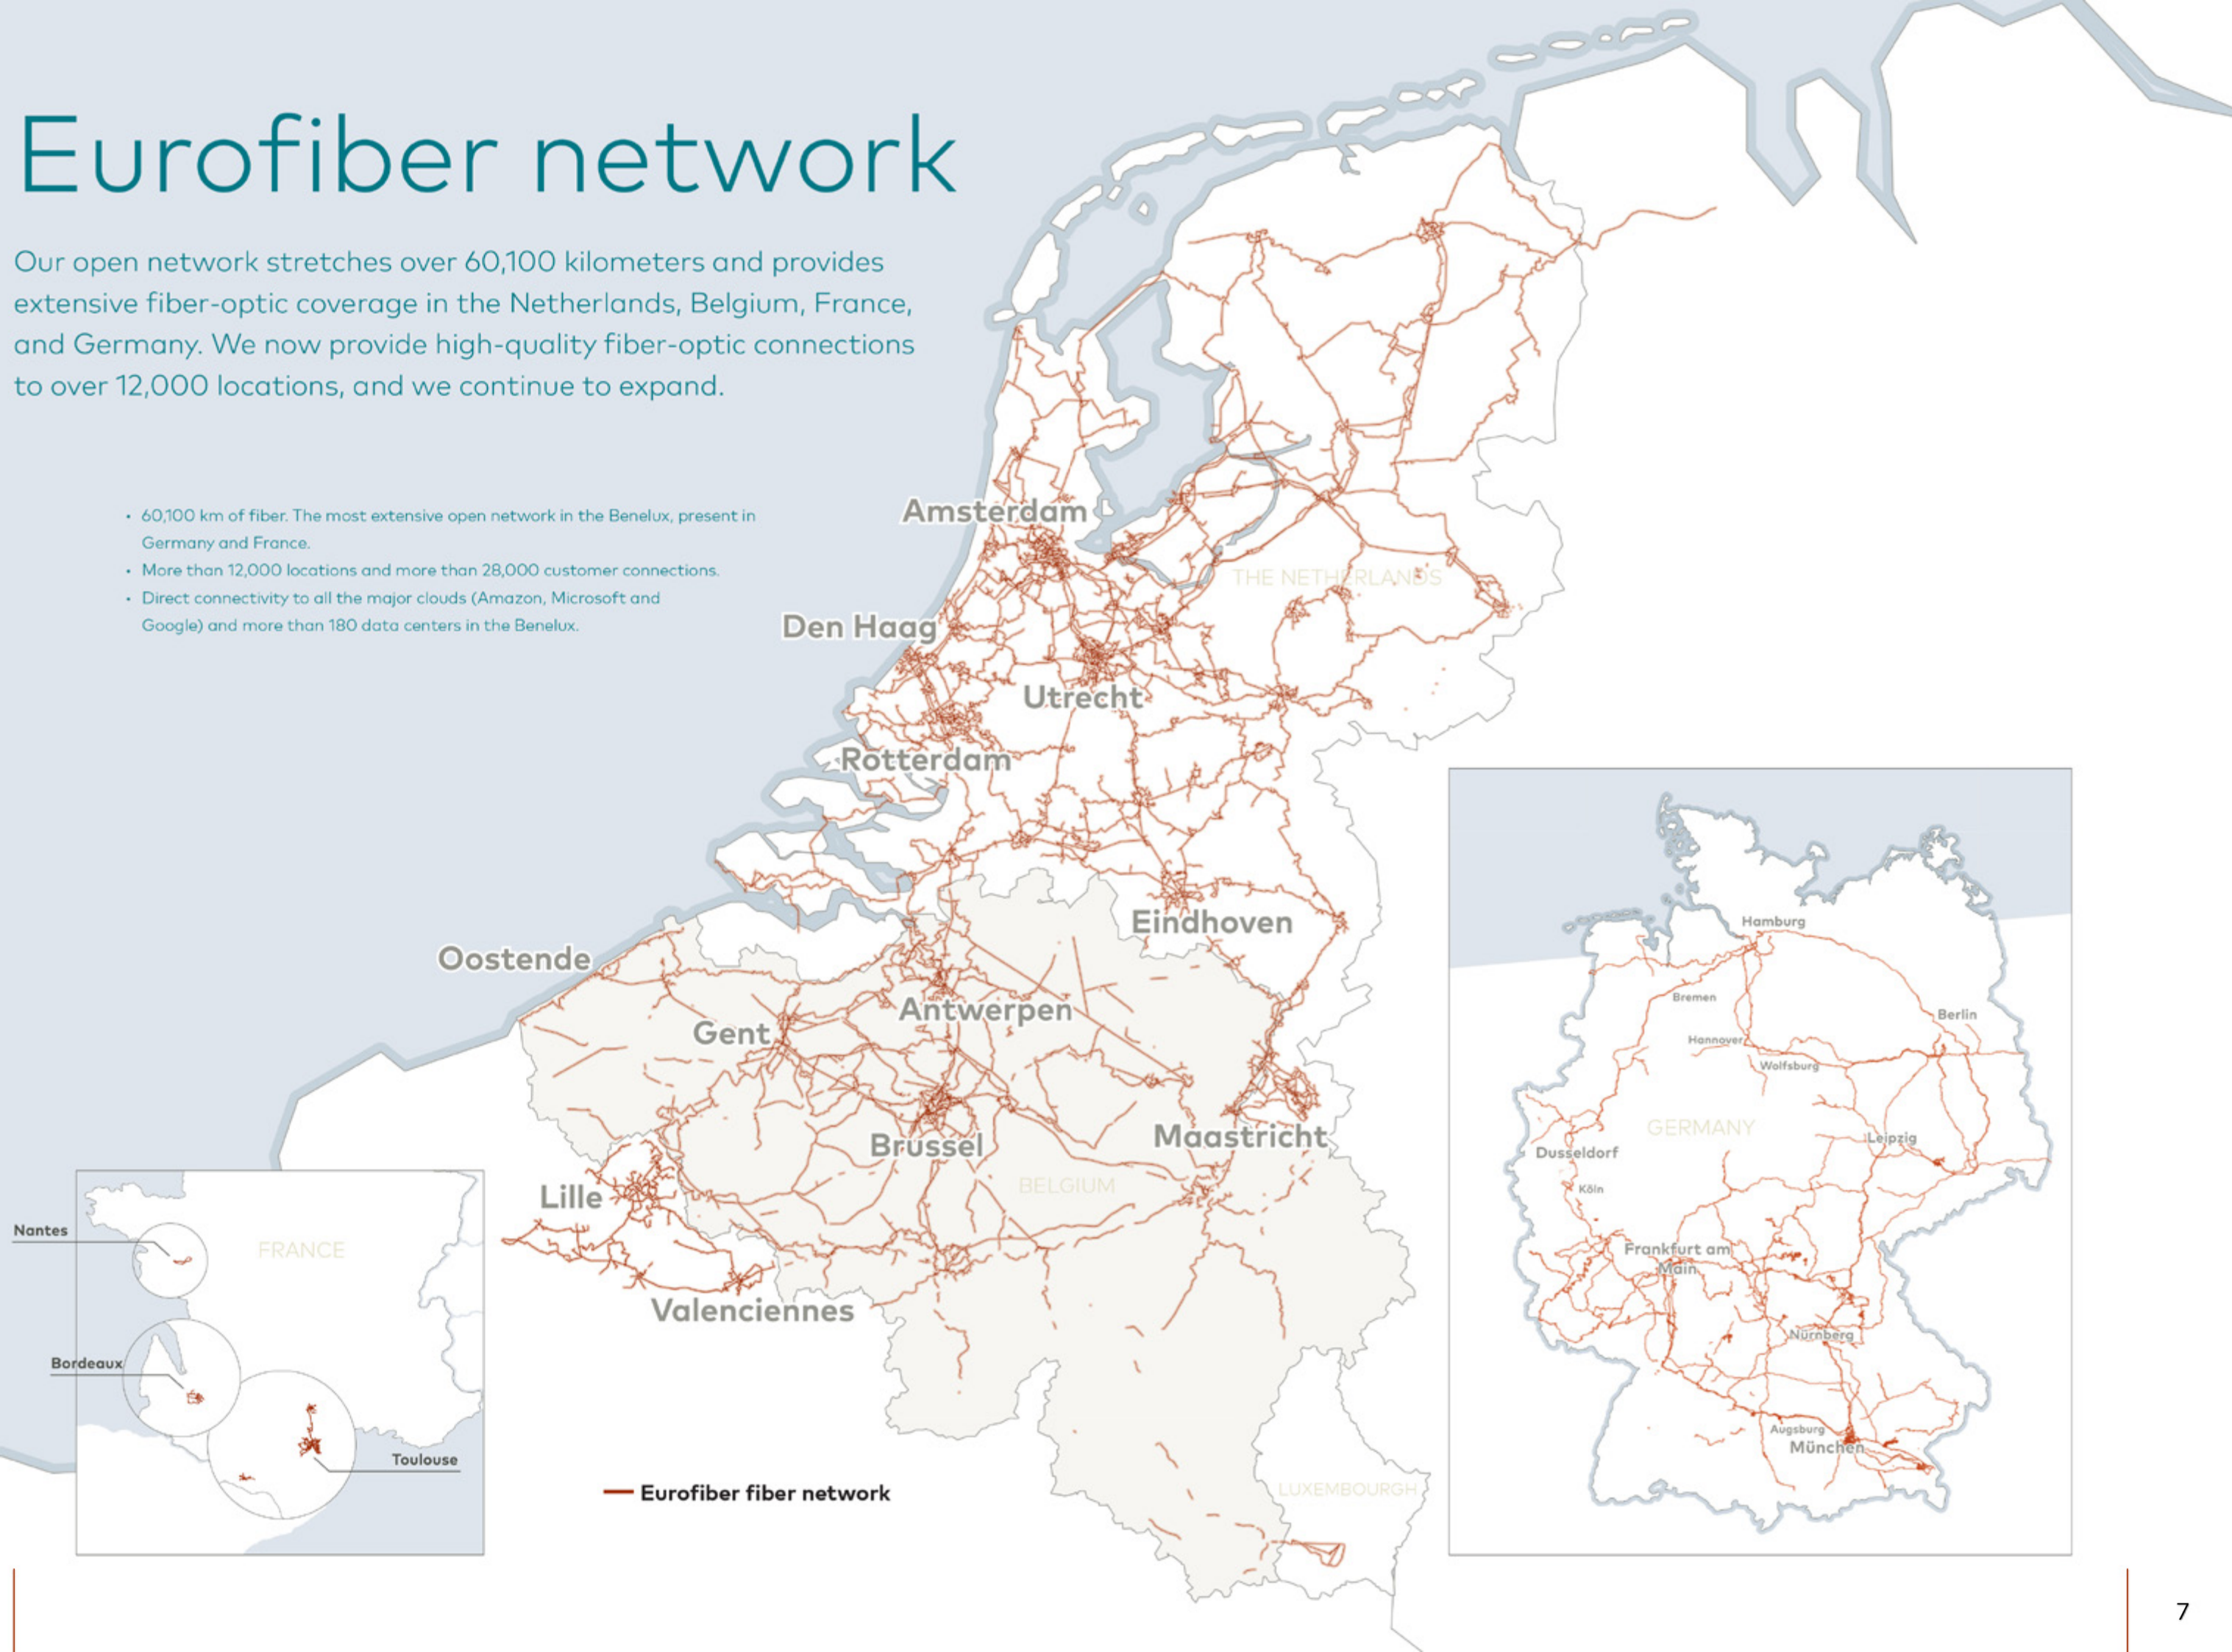

Eurofiber Cloud Infra provides industry leading cloud infrastructure services. We offer smart, open and future-proof cloud infrastructure solutions to companies, governments and non-profit organizations. Our

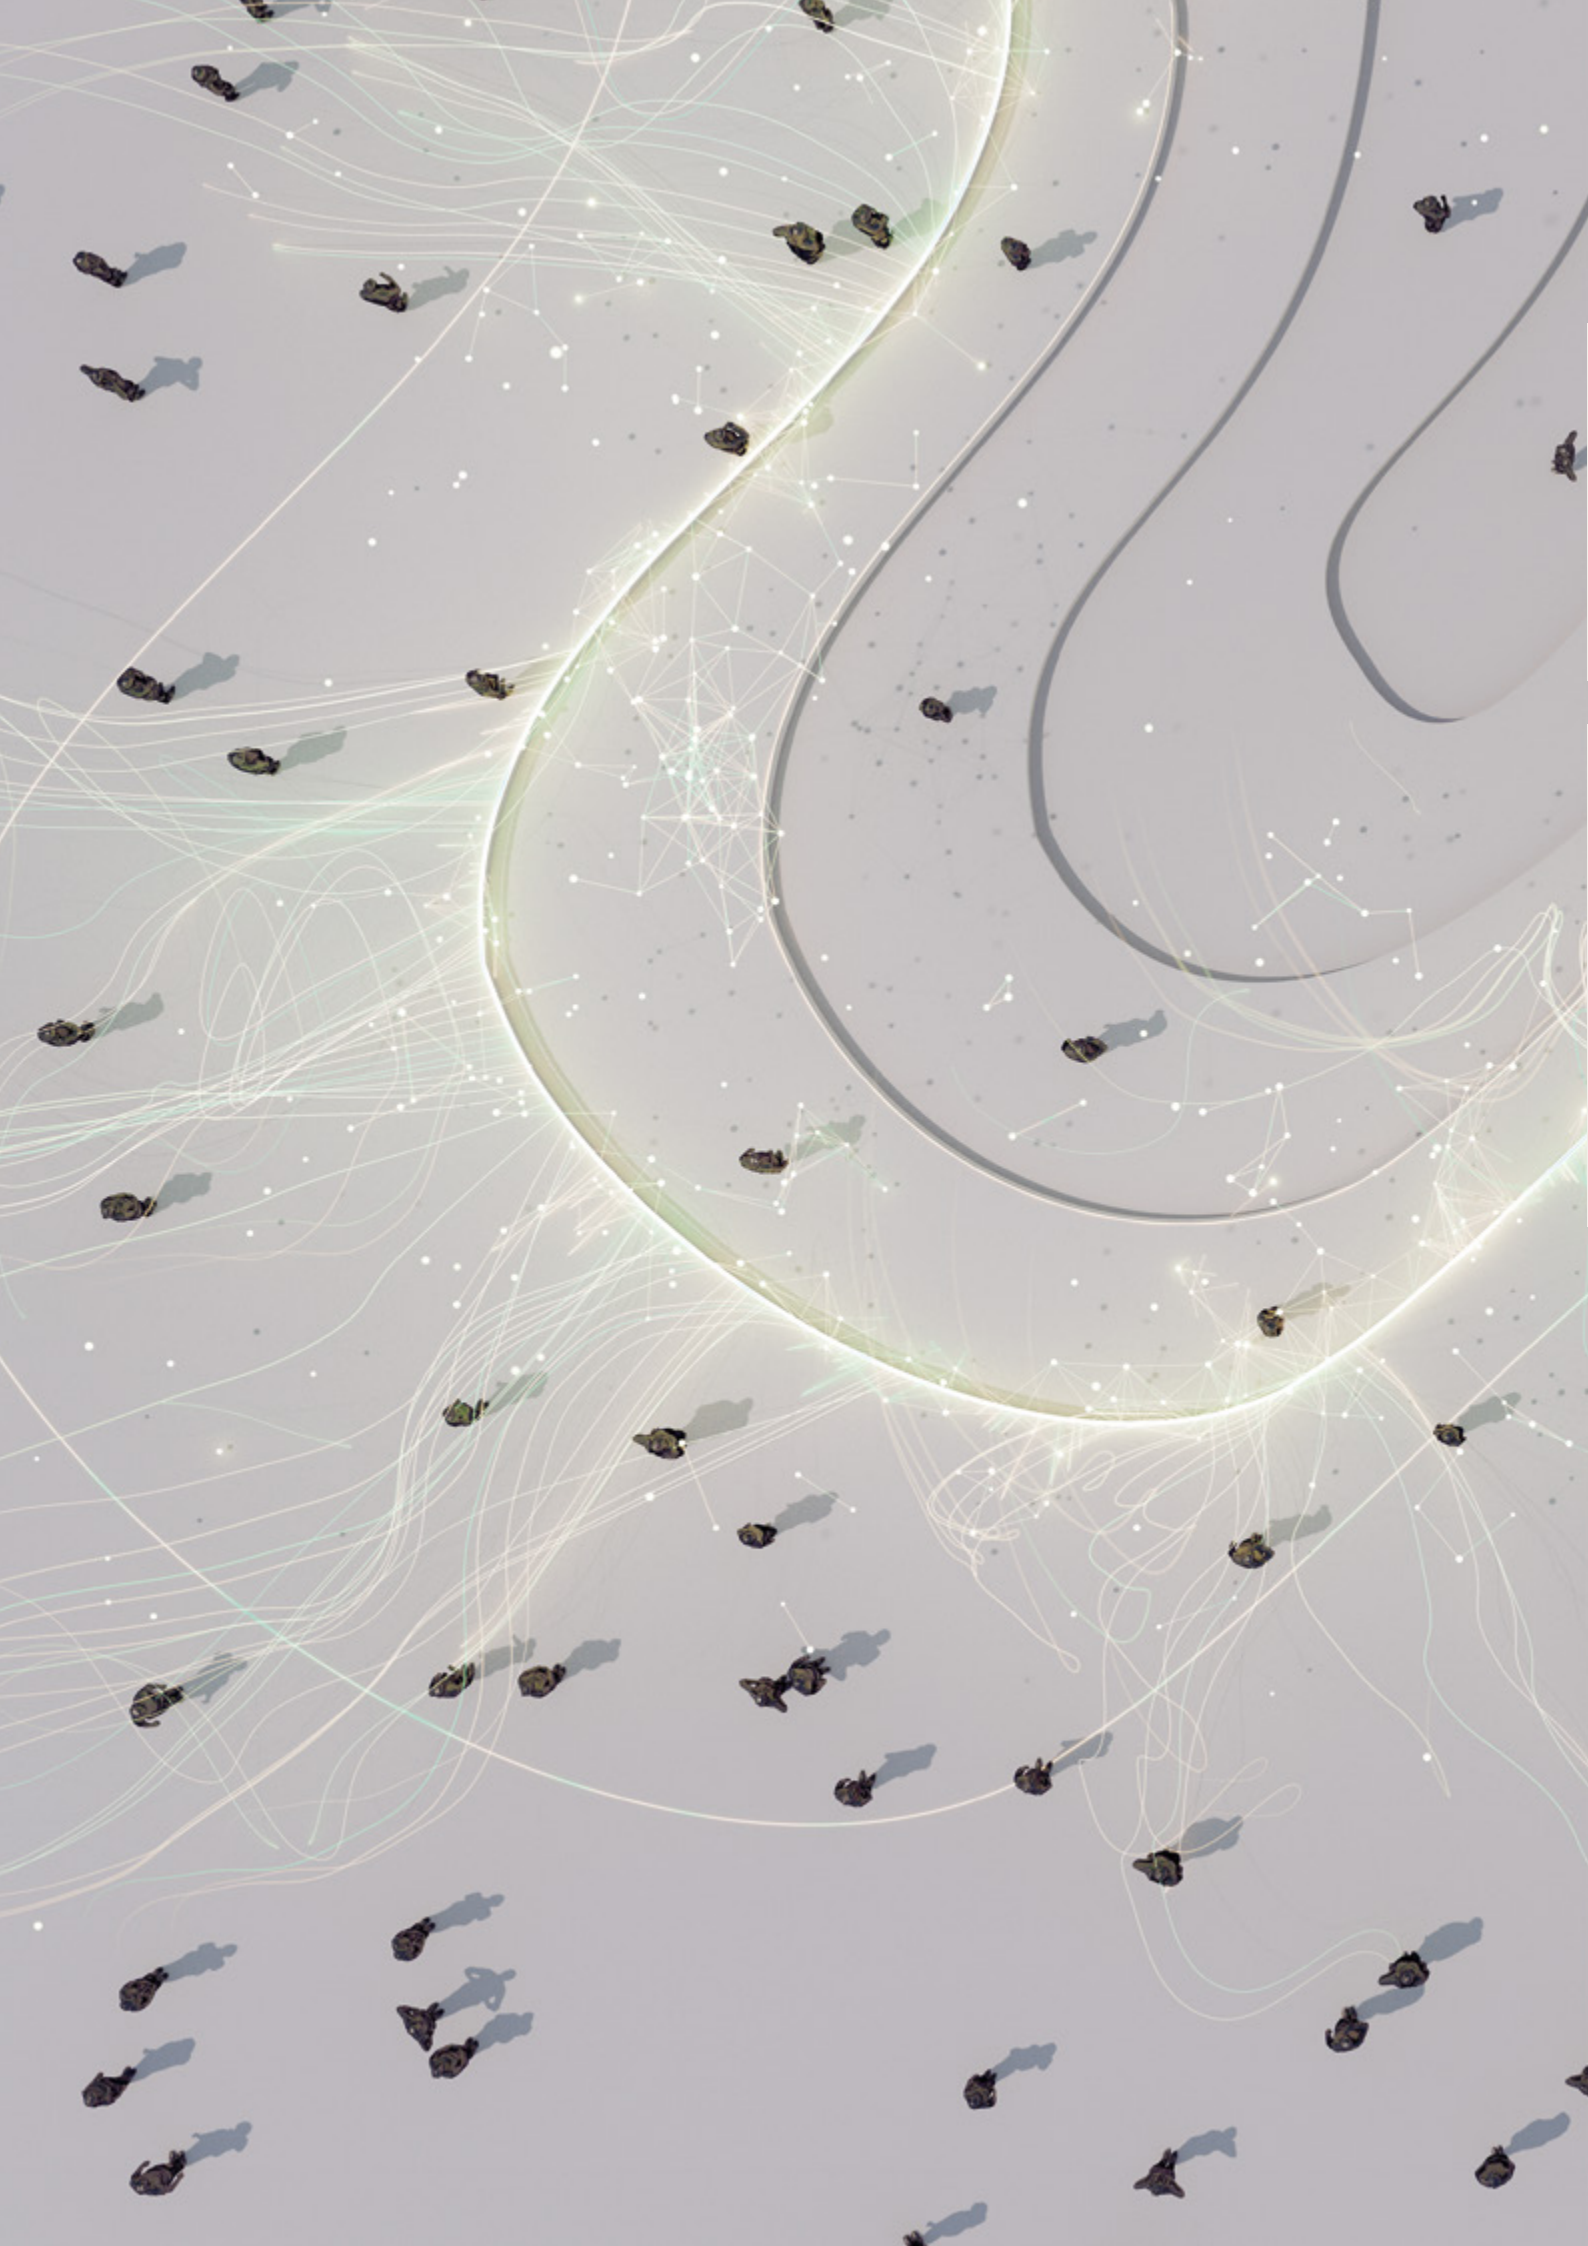

portfolio is built on 6 Tier III neutral datacenters, a software defined datacenter network "DCspine" connecting more than 80 datacenters in the Netherlands, Belgium and Germany, a state of the art IaaS offering as well as a hybrid cloud platform "CloudHub" and cloud consulting services. Customers benefit from our assets, capabilities and deep expertise in consulting, implementation and management of open hybrid cloud infrastructure. Eurofiber Cloud Infra employs 60 people and is growing fast. We have already provided solutions and assistance to more than 751 customers with their digital infrastructure.

Eurofiber network

Our open network stretches over 60,100 kilometers and provides extensive fiber-optic coverage in the Netherlands, Belgium, France, and Germany. We now provide high-quality fiber-optic connections to over 12,000 locations, and we continue to expand.

- 60,100 km of fiber. The most extensive open network in the Benelux, present in Germany and France.
- More than 12,000 locations and more than 28,000 customer connections.
- Direct connectivity to all the major clouds (Amazon, Microsoft and Google) and more than 180 data centers in the Benelux.

Open network characteristics

Advantages for end customers

An end customer choosing an ICT integrator with Eurofiber connectivity underneath opts in for business continuity, top-notch access to his data and/or applications in the cloud, and an ICT environment that responds to his needs.

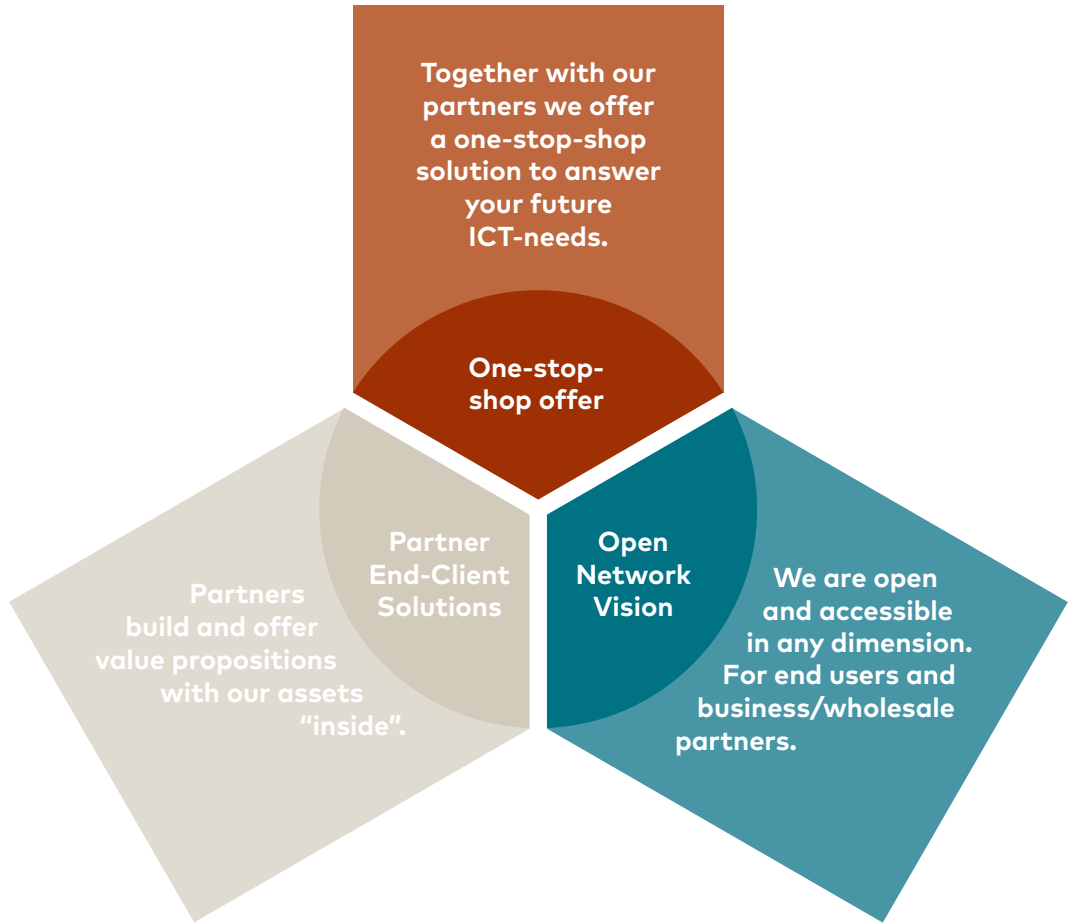

- Future-proof cloud & connectivity solutions
- Open network, no vendor lock-in
- Freedom of choice, flexible IT ecosystem
- Reliable by design = business continuity

Advantages for ICT parties

(ICT Integrators, Managed Service Integrators, Managed Service Providers and Cloud Service Providers)

Eurofiber enables ICT parties to offer their end solutions over the best possible fiber network in the Benelux. By adding connectivity to their offerings, they can unburden their customer as they no longer have to look for the right connectivity provider and solution.

- You deliver the services, we provide the connectivity
- Personal approach and partnership during the entire project
- The most extensive open network in the Benelux (60,100 km), present in France and Germany
- Most competitively priced SLA on the market
- Direct connectivity to all the major clouds (Amazon, Microsoft, and Google) and more than 180 data centers in the Benelux
- Lowest latency on the market

A man and a woman are standing in a server room, looking at a tablet together. The man is wearing a blue button-down shirt and the woman is wearing a grey sweater. They are both wearing lanyards with ID badges. The background shows rows of server racks.

Eurofiber products

Ethernet VPN (layer 2 and layer 3)

- Secure closed network
- Easily scalable
- Suitable for multiple applications
- Custom organization network
- Very high bandwidths up to 5 Gbps
- Symmetrical bandwidths

[Click here to access full product specs](#)

WDM

- Very high bandwidths up to 100 Gb/s
- Low latency: < 1 msec. per 100 km
- Supports protocols: SDH, Ethernet, Fiber Channel and SDI video
- Encryption enabled
- Connects to your datacenter network and hardware
- Very high availability due to fully separated routes

[Click here to access full product specs](#)

Managed Dark Fiber

- Fully managed nationwide fiber-optic network
- High quality, low attenuation, and latency
- Fully underground and spliced
- Available in most data centers in the Netherlands and Belgium
- Virtually unlimited bandwidth
- Fastest repair times in the market (guaranteed < 8 hours)

[Click here to access full product specs](#)

Cloud & data center connectivity solutions

Eurofiber offers two cloud & data center connectivity solutions:

- ✓ Secure Cloud Connect
- ✓ DCspine

Secure Cloud Connect

- Direct connection to major cloud platforms (AWS, Azure, Google Cloud)
- Secure and trustworthy private networks
- Guaranteed availability and low latency
- End-to-end services including various redundancy options

DCspine

- Fully automated and software-defined network
- Streamlined connectivity between data centers and the cloud
- High bandwidths, scaling up and down without downtime during transitions
- Reliable and scalable ICT infrastructure
- Direct network connections for locations/customers

Data center interconnectivity

DCspine offers a fully automated, online interconnection platform for data centers with 24/7 access to all applications, data and workloads. ICT infrastructures can be managed in a flexible, scalable and reliable way without it becoming unnecessarily difficult or expensive.

- Fully-automated and software-defined network
- Streamlined connectivity between data centers and the cloud
- High bandwidths, scaling up and down without downtime during transitions
- Reliable and scalable ICT infrastructure
- Direct network connections for locations/ customers

Setting up and managing connections

DCspine is essentially a 'virtual meet-me room' for all connected data centers. Managed from an online portal, reliable connections between data centers and the cloud can be set up easily. Once the first connection to the DCspine platform is established, it is only a matter of minutes before new connections can be created. This makes it possible to set up connections between multiple data centers just as easily as within an individual data center.

- Manage all your connections from one portal
- Set up live connections quickly, easily and on demand
- Flexible contract options (from 1 day to 3 years)
- Interconnection enables you to connect directly to service and cloud providers

Connected data centers

Eurofiber is connecting more than 180 data centers to its open network in the Benelux. In Belgium we connect the following data centers.

Our partner ecosystem

Our partner ecosystem consists of a wide variety of ICT and telecom companies offering their end solutions with Eurofiber connectivity underneath. Each of our partners has been selected based on the high quality standard of their end solutions and their customer focus.
