

The Eurofiber Internet Expansion

- 60,100 km fiber network
- 250+ connected DC's
- Extensive peering and transit relationships

The business units Eurofiber, DCspine, Dataplace, Eurafibre, Fullsave & Lumos are part of the Eurofiber group

Network growth

- Our Internet traffic grows with **at least 20% every year**
- **85% of our traffic** is handled **via peering**, with about 1200 ASN's
- **50% of the traffic** can directly be delivered to the destination network

Service evolution

- Full Dedicated Internet Access (DIA) & Transit (DIT) portfolio, **based on dedicated & uncontended fiber access** up to 10Gb/s, with integrated anti-Ddos protection
- **Private Peerings** within multiple countries, providing **optimized response times** and **direct access to the major public Cloud providers**
- Guaranteed uptime, sustained by an extended range of **redundancy designs** ranking **from VRRP up to BGP, with load sharing and fast convergence options**
