White Paper

What is a Fat Cat Killer?

Fat Cat Killer is a new cryptocurrency, designed for investors searching for a safe financial instrument to enter the blockchain-driven world of Decentralized Finance (DeFi) – and one that, from top to bottom, employs the industry's best practices.

Founders and experts spent over a decade in the marketplace, creating, trading, living and breathing crypto. Now, these Subject Matter Experts, in the fields of finance, marketing, software development and cyber security have come together to form a Dream Team. With a memorable name, entertaining backstory, real-world utility, a charitable mission to supercharge its growth, Fat Cat Killer is primed to become the hottest and most trending coin of 2023. The Cat is coming for the leading doggies!

We have developed a plan to drive kBUSD/kUSDC to the top.

kBUSD/kUSDC will utilize open source technology to the fullest extent to provide maximum visibility into the project for the community.

Security audit is available on our website coinciding with legal opinions on our tokenomics and whitepaper.

STAKING & LOTTERY

Our unique Staking contract rewards its holders to use our digital assets to generate a passive income without selling them with an unprecedented APY.

We have a unique tiered system that rewards our investors based on the duration of staking with progressively increasing APY. It also allows a flexibility to un-stake at any time without penalties. The mechanism is set to work for years to come.

Fat Cat Killers has a lottery system where holders can win a variety of coveted prizes. From an iPad to a luxury watch to increasingly luxurious items, nothing is off the table. Investors must lock their tokens for a short period of time to be eligible and winners are chosen randomly via its verified smart contract algorithm.

MERCHANT PARTNERS

Currently, our Token is partnered with a few different Crypto Payment Systems such as FCFpay, KillerPay, Embr and Simplex, more will be added periodically. Fat Cat Killer also offers a "tokens back" reward system for its customers in order to achieve its status as a preferred token of payment.

The Fat Cat Killer brand has a strong presence in the entertainment industry. Our network allows us to always be in the middle of the best parties, desirable festivals and to receive the support from the show business icons.

NFT PLATFORM

Fat Cat Killer's catchy and creative brand lends itself for seamless integration into the NFT space. Our token is destined for heavy involvement in the NFT sphere using its own in-house production as well as our partnership with the Startup, Duh!Art.

As part of our marketing strategy, it will select the best of the NFT's produced by our fat cat killer community and reward its most creative artists. Its partnership with Duh!Art

utilizes the best platform to share its members' creativity with the world. ALL proceeds received from Duh!Art will be given to the artist(s) responsible for its creation. Duh!Art also agreed to use our token as the preferred digital currency for their platform.

EXTREME SPORTS

Fat Cat Killer is on the forefront of extreme sports sponsorship. For example, in July we sponsored world record holder, Hank Amos, at the Catalina Ski Race. The Race is the only open ocean water challenge to compete across 62 miles of open ocean. It is highly coveted and followed around the ski racing world. In February 2023, we plan for another big marketing display by sponsoring an extreme aerial stunt. This aerial stunt uses a wingsuit pilot dropping from a performance hand-glider: both are awash in Fat Cat Killer branding. The stunt will be captured by video using an aerial drone capable of matching the speed of the wingsuit pilot in excess of 120 mph. Our creative participation in the world of extreme sports brings a unique awareness to the adrenaline pumping brand we represent. Extreme events require a lot of strategic planning, as lives are at stake. More events are in the planning stage, and will be released as contracts are executed between the parties.

CHARITY

Our experiment is simple, we're testing the hypothesis that crypto can give opportunity to those afflicted by income inequality. To do this, we've partnered with <u>Global Empowerment Mission</u> (G.E.M.), a 501(c)(3) non-profit organization founded in 2011 that has supported 295 missions in 28 countries, all 50 US states, and territories including the Caribbean.

We chose G.E.M. as a third party administrator and auditor of our donation fund for many reasons, one of which is that they have <u>Guidestar's</u> Platinum Seal of Transparency; we believe it is important so that crypto investors can feel confident their donations are held accountable to fulfill their charitable mission(s).

One of our first incubators is in Honduras, in which G.E.M. will work with Humanity and Hope United (humanityandhope.org) to build sustainable homes, provide grand farm irrigation, and new job creation in the unserved remote villages of the country.

Our second incubator is in the island of Puerto Rico, as the 1% own 99% of the island's assets, as is the case with the majority of the global economy. Conversations with our Puerto Rican (PR) contacts are in progress, and Fat Cat Killer, through G.E.M., will choose our charitable institution(s) within the coming weeks. G.E.M. has a strong presence in PR through its robust mission in delivering food, aid, shelter, clean water, and the subsequent rebuilding efforts in the aftermath of Hurricane Maria.

Fat Cat Killers desire to close the gap in income inequality is achieved by creating opportunities for disadvantaged individuals and their respective communities across the globe. With our partners we will help fund the creation of economic opportunity zones, sustainable villages, disaster response, single mothers, youth programs, and providing the tools and education to empower and elevate those less fortunate onto a more level playing field.

MUSIC & ENTERTAINMENT

Fat Cat Killer gives access to its own homegrown variety of Artists into its Multimedia brand. We made a unique Music Video in Medellin, which is available on our YouTube channel.

We also have songs from various artists on other channels like Spotify etc. Multiple artists from around the world already have embraced the Fat Cat Killer brand, such as legendary Grammy Award winning musician NeYo and TV personality & DJ Blake Horstmann. More songs will be added periodically by the artists that we choose to produce.
