

MJBA2300 Light Duty Low Profile Jib Crane

Knight Global's MJBA2300 Jib Crane offers a large tool coverage area with a single rotating rail on a floor mounted pedestal. Knight cranes are ideal for short transfer applications and are designed to move effortlessly while still carrying large loads.

The MJBA2300 Jib Crane has Timken® roller bearings and the round post allows for 360° rotation.

Jib Cranes allow for maximum hoist height on low head room applications or when the overhead working space can not accommodate a rail system.

MAX. BOOM LENGTH: Up to **12 ft. [3.6m]**

MAX. CAPACITY: **615 lbs. [279kg]**

Features & Benefits

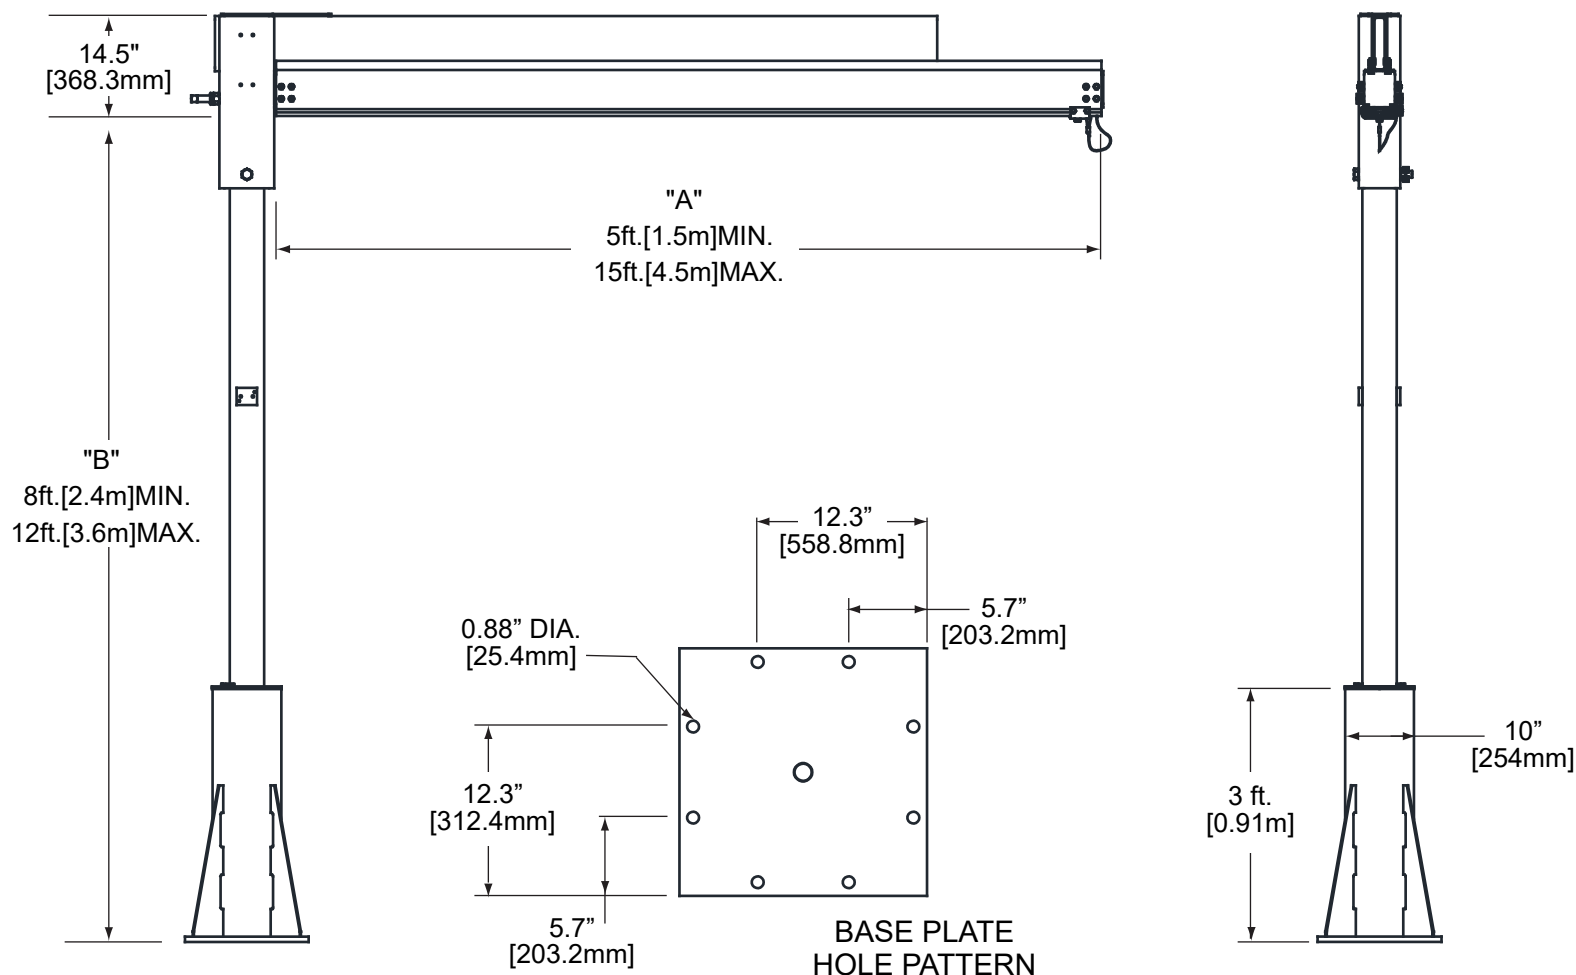

- Level Adjustment End Bracket is used to adjust the pitch of the rail.
- Round post allows for 360° rotation.
- Adjustable Hard Stop
- Ergonomically designed for low headroom clearance applications.
- MRES7522 Telescoping Rail is optional.
- Maximum Under Rail Clearance Height: Up to **12 ft. [3.6m]**.
