

367/6 HF TORX Screwdriver Set

Kraftform Plus - Series 300

EAN:	4013288147066	Size:	244x89x62mm
Part Number:	05345221001	Weight:	405.66 G
Article Number:	367/6 HF	Country of origin:	CZ
		Customs Tariff Number:	8205400000

- Screwdriver for recessed TORX® screws
- Multi-component Kraftform handle for fast and ergonomic screwdriving
- "Take it easy" tool finder: colour coding according to profile and size
- Hexagonal anti-roll feature against rolling away
- Holding Function for TORX® screws

Premium Kraftform Plus 6- piece screwdriver set for TORX® screws. Multi-component Kraftform handle for fast and smooth work. Kraftform Plus: Hard handle zones for high working speeds, while soft handle zones guarantee a high torque transfer. With holding function: The clamping force resulting from the seating stress between the tip and the screw profile keeps the screws securely on the tool. The hexagon anti-roll protection avoids bits from rolling away annoyingly at the workplace. Handles marked for easy identification and sorting of tools.

367/6 HF TORX Screwdriver Set

Kraftform Plus - Series 300

Non-roll feature

The hexagonal non-roll feature prevents any rolling away at the workplace.

Rapid hand repositioning

The hard materials used for the handle ensure rapid hand repositioning without any danger of the skin "sticking" to the handle. The surrounding hard zones with large diameters glide like wheels through the hand.

Holdinf function

In tight assembly or disassembly situations, for example in engine compartments, it is not possible to securely hold the screw with the hand on the screwdriver, and the screw subsequently often gets lost. Lengthy searches or the loss of the screw (with the associated danger that could bring about) are the consequence. The HF tools developed by Wera are ideal because they feature an optimised geometry of the original TORX® profile. The wedging forces resulting from the surface pressure between the drive tip and the screw profile mean that the screw is securely held on the tool!

Kraftform

The basic idea for the prototype of the Kraftform handle - that the hand should dictate the design - has, right through to today, proved to be correct. In cooperation with the internationally recognised Fraunhofer IAO Institute, Wera developed a screwdriver handle designed to match the shape of the human hand as long ago as the 1960s. After a long development phase, the Wera Kraftform handle was launched to the market in 1968. It has been optimised through the years with new technologies, but has kept its proven shape. After all, the human hand has not changed either.

Identification marking

The screw symbol and tip size identification markings on the handle make it easier to find the right screwdriver in the tool case, or at the workplace.

Large contact area

The large contact area - with particularly high friction to the soft zones - results in high torque transfer without any bruising from the edges.
