# Voluntary Energy Attribute Certificate (EAC) Markets around the world

## International EAC Markets

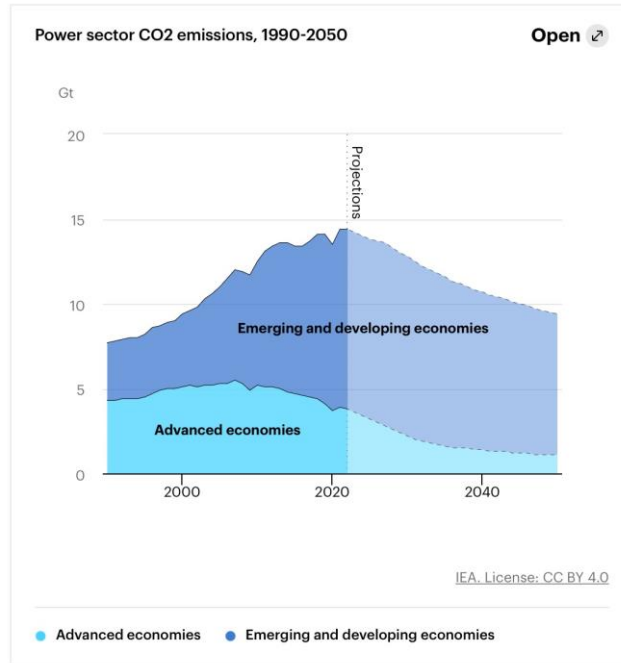

April 2023 International REC Standard Foundation

25 years later we are moving...

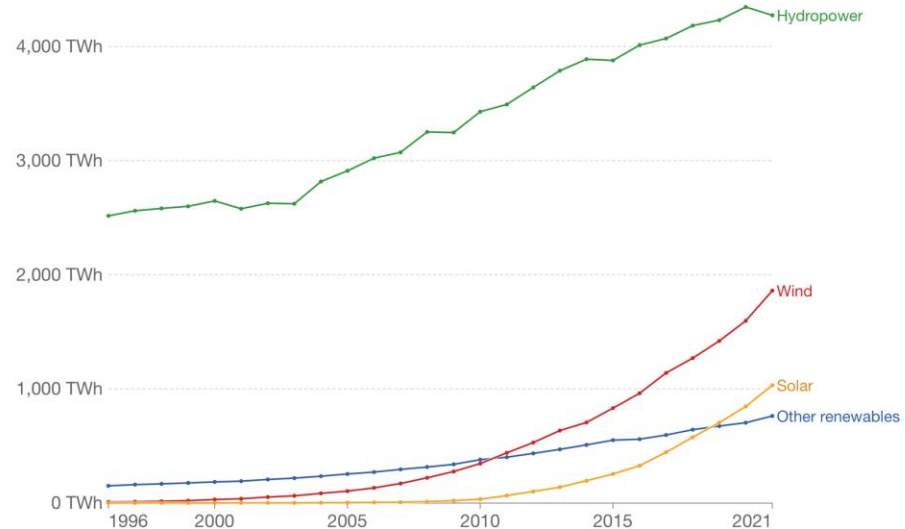

- Beyond Corporate Social Responsibility
- Beyond voluntary
- Beyond demand-drive

We are already seeing...

- Required disclosure
- Required compliance
- Required supply

Renewable energy generation, World

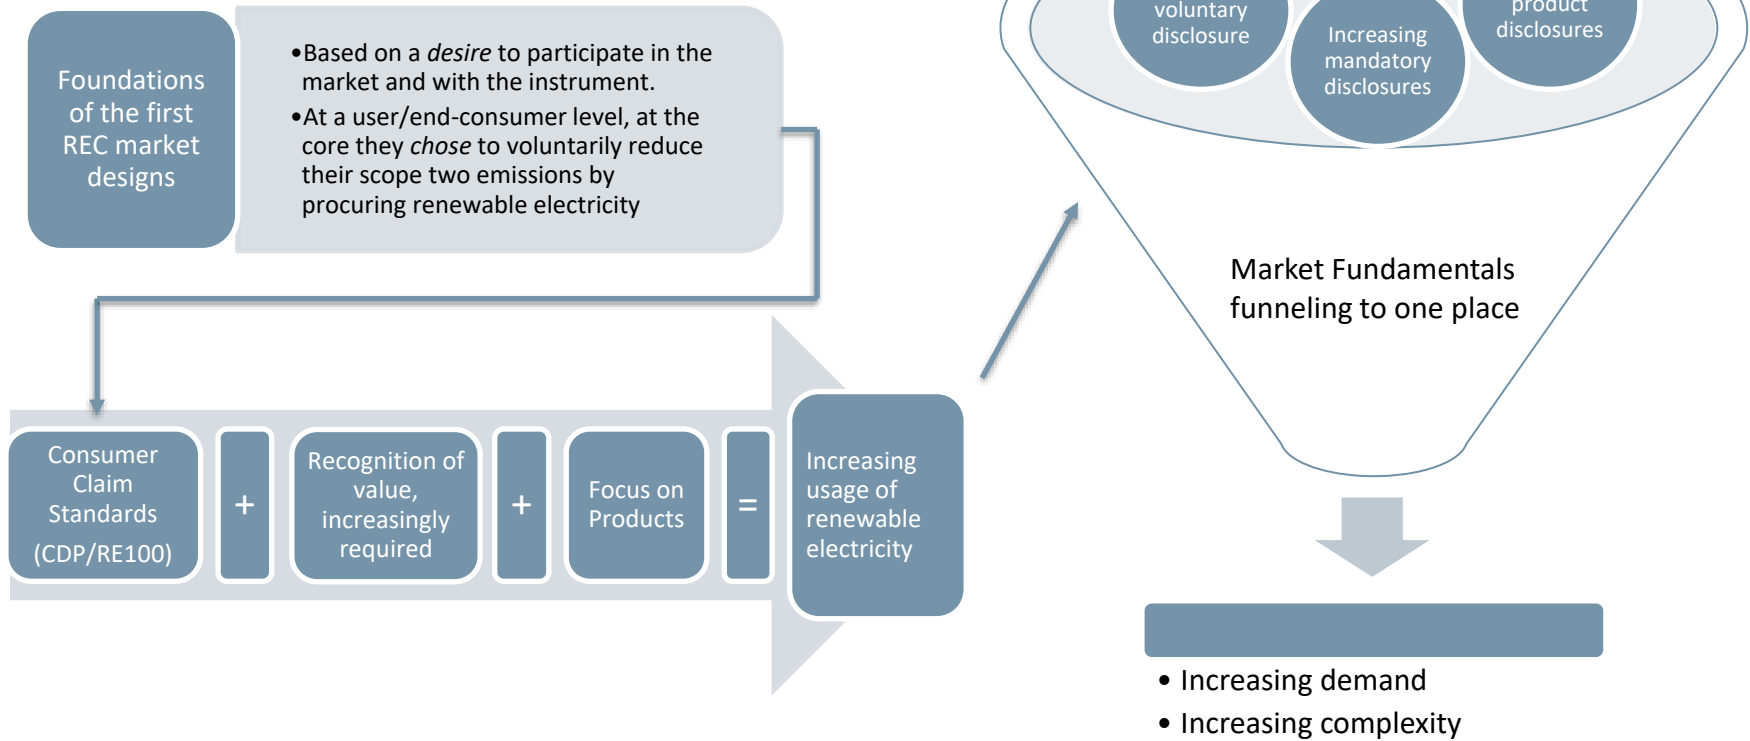

Not companies, but their **products** that will be required to procure renewable electricity

For instance,

- Carbon Border Adjustment Mechanism is already forcing steel, aluminum, fertilizers, plastics, cement and *hydrogen* to have control over their embedded emissions;
- Every unit of Hydrogen will *not* be sold without certification;
- Every data center will know its individual electricity usage.

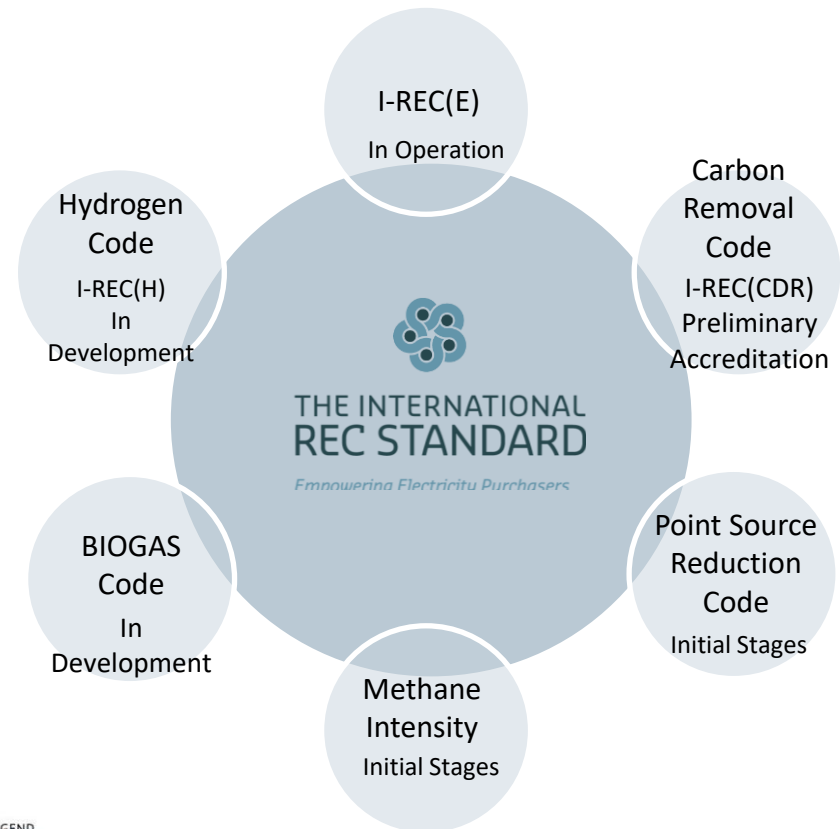

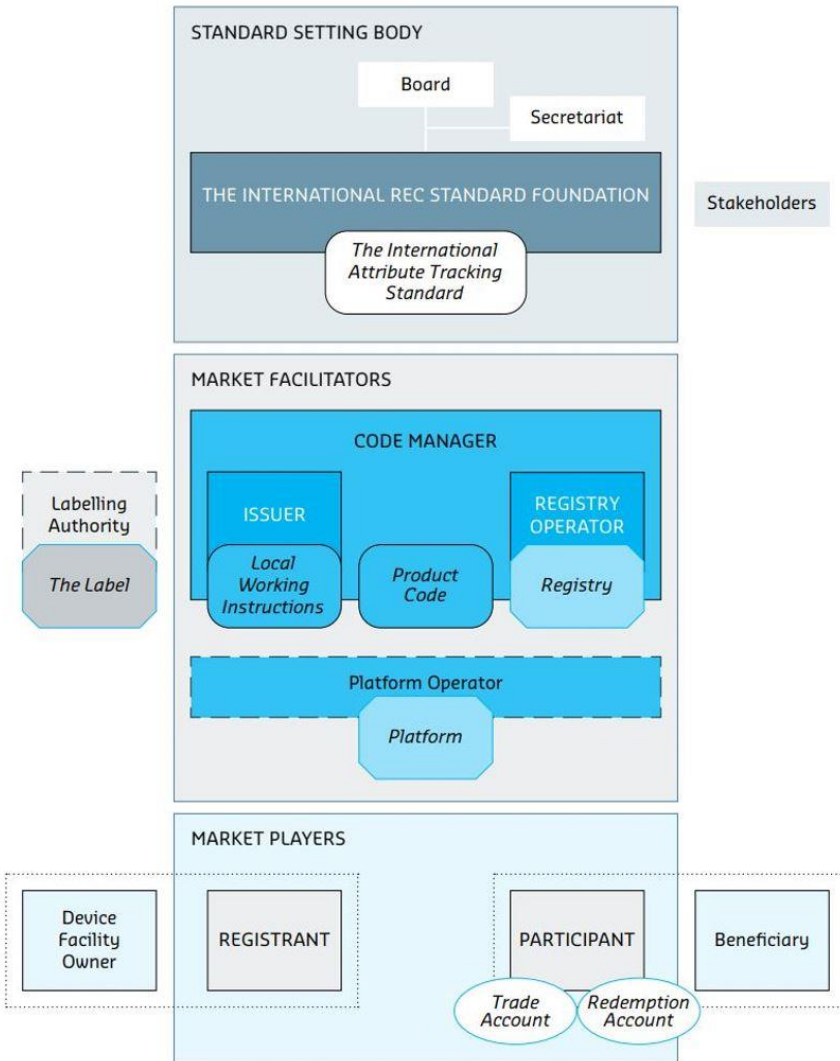

## The move from CSR to Product Accounting

# I-REC Governance structure

- LEGEND
- ORGANISATION
  - ENTITIES ACCREDITED BY FOUNDATION
  - MARKET OPTIONALS, NOT REQUIRED
  - DOCUMENTS
  - PRODUCTS ACCREDITED BY FOUNDATION
  - PRODUCTS APPROVED BY FOUNDATION
  - DOCUMENTS ACCREDITED BY FOUNDATION
  - TYPE OF ACCOUNT ON REGISTRY
