Nuestra innovadora empresa está situada en el cantón de Berna en Suiza, entre la cadena montañosa del Jura y al borde del río que atraviesa nuestro valle, la Birse. Es ahí que desde 1940 nuestras herramientas de roscado de alto rendimiento se desarrollan, fabrican y se mandan a través del mundo.

Desde la fundación de nuestra empresa nos hemos centrado en optimizar todas las gamas de machos de corte y de deformación en HSSE / HSSE-PM de nuestro programa, a fin de satisfacer las necesidades de nuestros clientes, desarrollando nuevos tipos de geometrías adaptándolas a las últimas tecnologías y materiales.

En el año 2000, creamos la nueva división de producción "ONE STEP", equipada con las últimas tecnologías para el desarrollo y la producción de fresas de roscar en metal duro. En ese mismo tiempo nuestro programa "CAR" (metal duro) se desarrolló y amplió fuertemente poniendo el focus en las fresas torbellino.

Desde 2010, se ha prestado especial atención al desarrollo de nuestras micro herramientas. El resultado es un amplio programa "NANO", que incluye torbellinos, machos de corte, machos de deformación, calibres, contra-calibres en una gama de dimensión de 0.3 a 2.75 mm. Y con la acreditación ISO 17025:2017, siendo DC Nano Tools SA un especialista en este mercado.

Hoy día nuestros productos de alto nivel son utilizados en el mundo entero y en todas las industrias donde **calidad**, **rendimiento** y **fiabilidad** son primordiales.

Si no encuentra lo que necesita en nuestra amplia gama de productos estándar, podemos modificar las herramientas para satisfacer sus necesidades o fabricar artículos especiales específicos, basados en sus descripciones y dibujos.

Para las preguntas a las que no puedes encontrar respuestas en nuestro catálogo, estamos encantado de estar a su entera disposición.

"Al principio, estaba buscando las mejores herramientas, entonces decidí de producirlas yo mismo"

Daniel Charpilloz – 1940

Our innovative SME is at home in the Berner Jura in Switzerland, idyllically nestled between hills and on the banks of the still young river called Birs. This is where since 1940 the high-performance threading tools of our brand DC are developed, manufactured and supplied all over the world.

Since the foundation of our company, we have focused on expanding our range of HSSE / HSSE-PM taps and thread formers in order to optimally meet our customers' needs and on constantly developing new tool types for the latest technologies and materials.

In 2000, we created the new "ONE STEP" production division, equipped with the latest production technologies, for the development and manufacture of reliable and powerful solid carbide thread milling cutters. In the meantime, our CAR programme has been greatly developed and expanded, with a focus on thread whirling cutters.

Since 2010, special attention has been paid to the development of our micro tools. The result is our in the meantime really broad "nano" programme, which includes thread whirlers, taps, thread formers, thread gauges and check thread gauges in the diameter range from 0.3 - 2.75 mm. As an ISO 17025:2017 accredited company, DC Nano Tools SA is your specialist in this field.

Today, our high performance threading tools are used worldwide and in all industries where **quality, performance** and **reliability** of the products are paramount.

If you do not find what you need in our wide range of standard products, we can modify tools to suit your needs or manufacture specific special items, based on your specifications and drawings.

For questions, to which you cannot find an answer in our catalogue, we are of course gladly at your entire disposal.

"In the beginning, I was looking for the best tools, then I decided to produce them myself"

Daniel Charpilloz – 1940

DC SWISS EN EL MUNDO ENTERO

Y SIEMPRE A SU LADO

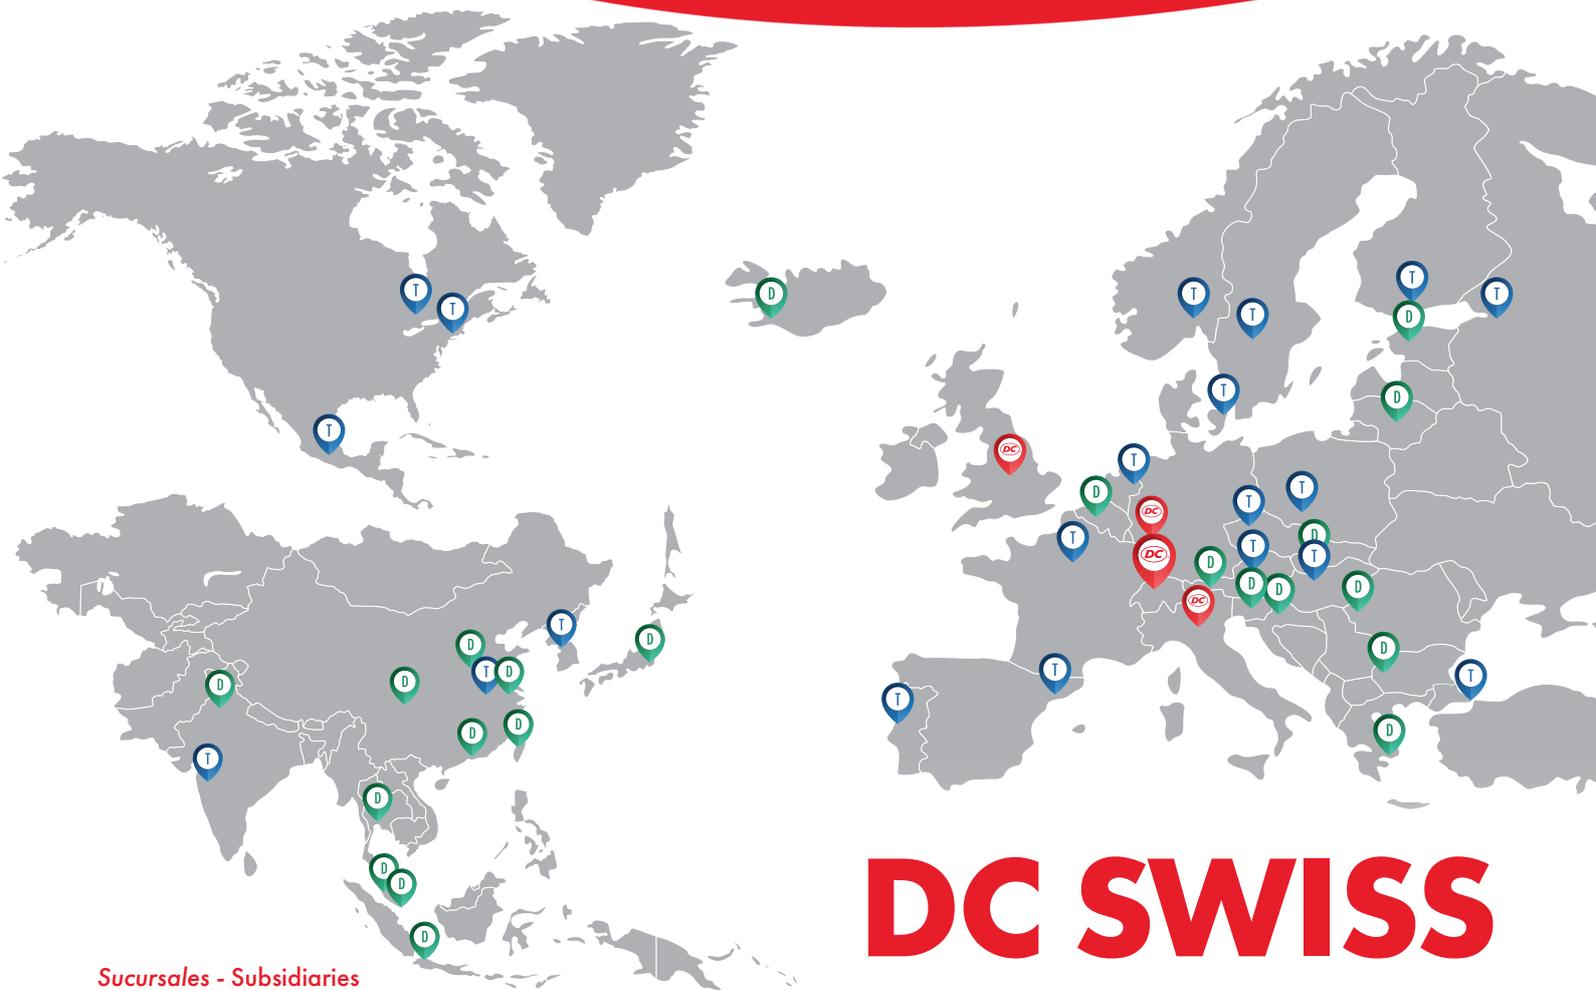

PROXIMIDAD A LOS CLIENTES

Encontrareis siempre un interlocutor competente, ya sea en la oficina central en Suiza, en una de sus sucursales de Alemania, Italia o Inglaterra o a través de sus numerosos partners tecnológicos o distribuidores alrededor del mundo.

CUSTOMER PROXIMITY

You will always find a competent contact person, whether at our main site in Switzerland, at one of our subsidiaries in Germany, Italy and England, or at one of our many representatives or resellers worldwide.

Sucursales - Subsidiaries

AND ALWAYS CLOSE TO YOU

SWISS QUALITY

100 % made by DC SWISS -
Garantía desde el desarrollo de la herramienta a su fabricación y control final, gracia a nuestra peritación y a nuestra competencia en todos los dominios de producción de herramientas.

100 % made by DC SWISS - guaranteed from the development of the tool to its production and straight through to the end control, thanks to our know-how and competencies in the whole field of threading tool manufacturing.

NUESTROS VALORES

OUR VALUES

RESULTADO

El resultado esta al centro de nuestras preocupaciones para el desarrollo de soluciones personalizadas y mejoras de nuestros productos estándar a las necesidades del cliente. Damos gran importancia en ofrecer la mejor relación calidad/precio como base de una relación de confianza con nuestros clientes.

PERFORMANCE

We make every effort to develop new high-performance threading tools and to adapt the performance of our standard tools to the current needs of our customers. We attach great importance to a constant price/performance ratio as the basis for a trusting relationship with our customers.

CONOCIMIENTO

El valor de nuestro Saber Hacer se traduce por una manera unica de resolver problemas y de asociar el conjunto de conocimientos, experiencias y competencia acumuladas desde 1940.

KNOW-HOW

The value of our know-how represents in a unique way the solving of problems and articulates, implements and associates the whole knowledge, experiences and competences accumulated since 1940.

FIABILIDAD

Relaciones a largo plazo se construyen unicamente sobre base de confianza, transparencia y compromisos cotidiano de cada uno de nuestros colaboradores a suministrar a nuestros clientes herramientas y servicios de maxima calidad.

RELIABILITY

We know that lasting relationships can only be built on the basic of confidence, transparency and the daily efforts of each of our employees to provide our customers with tools and services of an excellent quality.

PERFIL DE LA COMPAÑÍA

EMPRESA FORMADORA

DC SWISS SA participa activamente en la formación de jóvenes y en el perfeccionamiento de especialistas ya experimentados. Como poseedor de la etiqueta "**Empresa de formación**", es un honor para nosotros formar nuevos aprendices cada año.

Es importante para nosotros asegurar la próxima generación de profesionales y ofrecerles las oportunidades de desarrollo y perfeccionamiento en un campo de gran potencial.

COMPANY PROFILE

TRAINING COMPANY

DC SWISS SA is actively involved in the training of young people and the further education of already experienced professionals. As holder of the "**Training company**" label, it is a matter of honour for us to train new apprentices every year.

It is important to us to ensure the next generation of professionals and to offer them opportunities for development and further training in a field with high potential.

NUESTRAS COMPETENCIAS

SERVICIO DE MEDICIÓN Y DE METROLOGÍA

DC SWISS dispone de un laboratorio metrológico acreditado por el Servicio Suizo de Acreditación como laboratorio de calibración de dimensiones.

DC SWISS está capacitada para ofrecer servicios de calibración y metrología para conexiones roscadas.

Un certificado es la confirmación por escrito de la calidad del equipo metrológico de una empresa. DC NANO TOOLS SA (acreditación SCS 0143), miembro del Grupo DC SWISS, puede inspeccionar y calibrar calibres también, así como los Masters para medición de anillos de rosca de acuerdo con la norma internacional ISO 17025.

Nuestras herramientas son el resultado de numerosos estudios. Los diseñamos usando todo el conocimiento que hemos adquirido durante muchos años, siempre poniéndolos a prueba hasta sus máximos límites. Compartimos todo este conocimiento con usted gracias a los diferentes servicios que les ofrecemos. Nuestro objetivo es proporcionar la solución más adecuada en cada caso, desde el estudio de viabilidad hasta la producción en serie.

Somos expertos en todos los aspectos del proceso de roscado y somos capaces de ofrecerle nuestra experiencia de montaje desde el diseño, mecanizado e inspección metrológica a través de las diversas etapas de la creación de conexiones roscadas.

Expertos en diseños

Cada diseño es único pero a menudo hay múltiples soluciones. Podemos asesorarle sobre qué tipo de fijación elegir, por ejemplo, ajustable, auto bloqueo, o roscados de alta calidad. Durante la fase de elaboración, podemos ayudar a sus ingenieros a identificar y decidir la mejor conexión roscada en términos de dimensiones, practicidad, costes de producción y montaje.

Experiencia en mecanizado

Cada herramienta requiere una programación especial con numerosos parámetros. Podemos ayudarle a sacar lo mejor de sus máquinas y herramientas para lograr el máximo rendimiento a través de una programación personalizada. Y si una herramienta lo precisa, podemos hacerlo para que cumpla con todos sus requisitos. A menudo, un enfoque particular del ajuste permite resolver un problema causado por geometría compleja o posicionamiento inusual.

Experiencia en metrología

Suminramos un gran número de medidores y también asesoramiento sobre cómo utilizarlos e inspeccionarlos para garantizar que la calidad requerida se alcanza de manera adecuada. Otras medidas más específicas están disponibles, como la concentricidad así como todas las medidas de certificación. Podemos ayudarle a establecer procedimientos de control. Este servicio está disponible para diámetros de flanco de 0.1 à 3.0 mm, y diámetros externos de 0.1 à 3.5 mm. Confíe en la experiencia de DC NANO TOOLS SA para calibrar sus herramientas de medición.

Formación

En nuestro centro de aplicación y laboratorio, distribuimos información completa y asesoramiento sobre las mejores prácticas a todos nuestros clientes en el diseño, la fabricación y el funcionamiento de fijaciones roscadas. Podemos proporcionar formación bajo demanda en temas específicos como fijaciones seguras.

OUR EXPERTISE

CALIBRATION & METROLOGY SERVICE

DC SWISS has a metrology lab that is accredited by the Swiss Accreditation Service as a laboratory for calibrating lengths.

DC SWISS is able to offer a calibration and metrology service for screw connections.

A certificate is written confirmation of the quality of a company's metrological equipment. DC NANO TOOLS SA (SCS accreditation 0143), a member of the DC SWISS Group, can inspect and calibrate thread plug gauges as well as thread ring gauges in accordance with the ISO 17025 international standard.

Our tools are the result of numerous studies. We design them using all the knowledge we have acquired over many years, always testing them to their utmost limits. We share all this knowledge with you in the form of our services. Our aim is to provide the most appropriate solution in each case, from feasibility study right through to mass production.

We are experts in all aspects of the process of screw threading, and are able to offer you our assembly expertise from design, machining and metrological inspection through the various stages of creating screw connections.

Design expertise

Each design is unique, but there are often multiple solutions. We can advise you on which type of screw fixing to choose, for example adjustable, self-locking or high-quality screws. During the design phase, we can help your designers to identify and decide the best-performing screw fixing in terms of dimensions, practicality, production costs and assembly.

Machining expertise

Each tool calls for special programming involving numerous parameters. We can help you to get the best out of your machines and tools in order to achieve maximum performance via personalised programming. We can provide you with support in the inspection and measurement phase, so you can be sure of having produced the screw thread you were expecting. And if a tool needs to be customised, we can do this so that it meets all your requirements. Often, a particular approach to fitting makes it possible to resolve a problem caused by complex geometry or unusual positioning.

Metrological expertise

We supply a large number of measuring gauges and also advice on how to use and inspect them in order to ensure the required quality is consistently achieved. Other more specific measures are available, such as concentricity and certification measures. We can assist you in setting up control procedures. This service is available for pitch diameters of 0.1 to 3.0 mm, and external diameters of 0.1 to 3.5 mm. Don't take the risk – benefit from the expertise of DC NANO TOOLS SA to calibrate your measuring tools.

Training

In our application centre and our laboratory, we distribute full information and advice on best practice to all our customers in the design, manufacture and use of screw fixings. We can provide on-demand training in specific subjects such as secure fixings.

GEOMETRÍAS DE CORTE DC — DC CUTTING GEOMETRIES

N

Para materiales normales
(aceros de decoletaje; aceros de construcción o de cementación; aceros al carbón; aceros aleados < 850 N/mm²; aceros inoxidable al azufre; fundición de grafito + esférico y maleable; latón (virutas largas); Al aleado Si < 10 %)

For normal materials
(free-cutting steels; structural, cementation steels; carbon steels; alloy steels < 850 N/mm²; free machining stainless steels; spheroidal graphite + malleable cast iron; long chip brass; Al alloyed Si < 10 %)

W

Para materiales blandos
(aluminio no aleado; aluminio de baja aleación; materiales termoplásticos)

For soft materials
(aluminium unalloyed; low-alloyed aluminium; thermoplastics)

Z

Para materiales tenaces
(materiales resistentes al óxido y a los ácidos - austeníticos; ferríticos y martensíticos < 850 N/mm²; titanio puro; aleación de níquel 1 < 850 N/mm²; cobre puro)

For tough materials
(rust and acid resistant materials - austenitic stainless steels; ferritic and martensitic < 850 N/mm²; pure titanium; nickel alloys 1 < 850 N/mm²; pure copper)

**ZX
NEW**

Para las aleaciones de ALU-BRONZE
(AMPCO® 21 / 22)

For ALU-BRONZE-Alloys
(AMPCO® 21 / 22)

H

Para materiales de alta resistencia > 850 - < 1'400 N/mm²
(aceros aleados, aceros templados - aceros de alta resistencia); **latón, bronce (virutas cortas); el latón sin plomo; materiales duroplásticos; materiales plásticos reforzados por fibras de vidrio)**

For high tensile materials > 850 - < 1'400 N/mm²
(alloyed steels, tempered steels - high tensile alloy steels); **short chip brass + phosphor bronze + gun metal; lead-free brass; duroplastics; glass fibre reinforced plastics)**

S

Para materiales de aleaciones especiales > 850 - < 1'150 N/mm²
(aceros aleados / tratados; aceros ferríticos y martensíticos, aleación de níquel 2)

For special alloyed materials > 850 - < 1'150 N/mm²
(alloy steels hardened / tempered; ferritic, martensitic steels; nickel alloys 2)

SA AERO
SA.20 / SA.50

Para materiales de aleaciones especial > 850 - < 1'150 N/mm²
(aleación de níquel 2; latón sin plomo)

For special alloyed materials > 850 - < 1'150 N/mm²
(nickel alloys 2; lead-free brass)

GEOMETRÍAS DE CORTE DC — DC CUTTING GEOMETRIES

SA AERO
SA.90

Para materiales de aleaciones especial > 1'150 - < 1'600 N/mm² (aleación de níquel 3)

For special alloyed materials > 1'150 - < 1'600 N/mm² (nickel alloys 3)

TL

Para las aleaciones de titanio

For titanium alloys

GG

Para fundición gris; fundición de aluminio con alto contenido en Si; aleación de magnesio

For grey cast iron; aluminium castings with high Si content; magnesium alloys

K

Con una geometría especial "rompevirutas" (para materiales normales, fácilmente mecanizables hasta 1'150 N/mm²; latón sin plomo)

With special "chipbreaker cutting edge geometry" (for normal, easily machinable materials up to 1'150 N/mm²; lead-free brass)

QTAP
NEW

El ALLROUNDER DC (para el mecanizado de materiales universales de hasta 1'150 N/mm², para su uso en mandriles con compensación axial y roscado sincronizado)

The DC ALLROUNDER (for machining universal materials up to 1'150 N/mm², for use in tapping chucks with axial compensation and for synchronous tapping)

RTS

Macho sincro DC tipo RTS (para el mecanizado de materiales universales de hasta 1'150 N/mm², para el roscado sincrónico "Rigid Tapping")

DC Synchro tap type RTS (for machining universal materials up to 1'150 N/mm², for synchronous tapping "Rigid Tapping")

FS
< Ø 3 mm

Macho de laminación DC tipo FS (macho de laminación universal de 4 puntas de contacto para pequeños roscados de Ø ≥ 1 - < 3 mm para los materiales deformables a frío)

DC Thread formers type FS (universal thread former with 4 forming lobes for small thread sizes Ø ≥ 1 - < 3 mm, in all cold forming materials)

GEOMETRÍAS DE CORTE DC — DC CUTTING GEOMETRIES

FPS
≥ Ø 3 mm

Macho de laminación DC tipo FPS
(para Ø ≥ 3 mm, con puntas de contacto redondeadas, concebidas para una deformación progresiva de materiales abrasivos (aceros de construcción, aceros al carbón, aceros aleados, latón de virutas largas, aluminio, etc.))

DC Thread formers type FPS
(for Ø ≥ 3 mm, with large forming lobes designed for a progressive flow of materials with low elongation coefficient (structural steels, carbon steels, alloy steels, long chipping brass, aluminium, etc.))

FAS
≥ Ø 3 mm

Macho de laminación DC tipo FAS
(para Ø ≥ 3 mm, con puntas de contacto salientes, para una deformación rápida de materiales de alto coeficiente de alargamiento (inoxidables, cobre puro, etc.))

DC Thread formers type FAS
(for Ø ≥ 3 mm, with pointed forming lobes designed for a fast flow of tough materials with high elongation coefficient (stainless steels, pure copper, etc.))

Dientes alternos
(para una menor generación de calor)

Interrupted thread
(for less heat generation)

Dientes truncados
(para evitar el atascamiento de la viruta y la rotura de dientes en el hilo guía)

Truncated thread
(to avoid chip jamming and tooth breakage in the guiding section of the tap)

Dientes truncados y lubricación interna con salida frontal

Truncated thread and internal coolant with frontal outflow

TRATAMIENTOS SUPERFICIALES Y RECUBRIMIENTOS

SURFACE TREATMENTS AND COATINGS

V

Tratamiento superficial DC "V" Vaporizado

El tratamiento superficial DC "V" mejora el deslizamiento del macho de roscar y evita la formación de soldaduras frías.

DC "V" surface treatment Steam tempered

The DC "V" surface treatment improves the sliding friction of the tap and prevents cold welding.

NV

Plasma Nitruado + tratamiento superficial "V"

Los machos nitrurados por plasma tienen una mayor dureza superficial, aprox. 1100 HV, y son especialmente adecuados para el mecanizado de materiales abrasivos (fundición gris, aluminio fundido con alto contenido en Si). También tienen mejores propiedades de deslizamiento gracias al tratamiento adicional de la superficie DC "V".

Plasma nitriding + "V" surface treatment

Plasma-nitrided taps have increased surface hardness, approx. 1100 HV, and are particularly suitable for machining abrasive materials (grey cast iron, cast aluminium with high Si content). They also have improved sliding properties thanks to the additional DC "V" surface treatment.

DLC

Recubrimiento DLC

Las herramientas de roscado con recubrimiento DLC tienen una dureza superficial de aproximadamente 2500 HV, y son especialmente adecuadas para el mecanizado de metales no ferrosos y el aluminio con bajo contenido de silicio (< 9 % Si).

DLC-coating

DLC-coated threading tools have a surface hardness of approx. 2500 HV and are particularly suitable for machining non-ferrous metals and aluminium with a low silicon content (< 9 % Si).

TiN

Recubrimiento de nitruro de titanio (TiN)

La dureza del revestimiento de titanio es de aproximadamente 2400 HV. Se aconseja el uso de los machos de roscar revestidos con titanio en materiales abrasivos y en aquellos que provocan la formación de soldaduras frías. Permite aumentar las velocidades de corte y la vida del macho de roscar.

Titanium-nitride coating (TiN)

The titanium nitride coating is of a hard metal material (PVD) with a hardness of approximately 2400 HV. TiN-coated taps are particularly suitable for working abrasive and cold-welding type materials; higher cutting speeds and improved performance.

TiCN

Recubrimiento de carbonitruro de titanio (TiCN)

La dureza del revestimiento del TiCN es de aproximadamente 3000 HV. Dotados de una mayor dureza que los machos de roscar recubiertos de TiN, permite trabajar a velocidades de corte superiores.

Titanium-carbonitride coating (TiCN)

The TiCN-coating with a hardness of approx. 3000 HV is even harder than the TiN-coating, for even higher cutting speeds.

TRATAMIENTOS SUPERFICIALES Y RECUBRIMIENTOS SURFACE TREATMENTS AND COATINGS

VS

Recubrimiento de protección contra el desgaste "VS" para uso general

Tratamiento superficial específico para utilización en inoxidables con machos de clase "Z" con emulsión; en aleaciones especiales con machos de clase "S"; en las aleaciones de titanio con machos de clase "TL".

DC "VS" wear-protective coating for general use

A special treatment for taps specifically intended for use in Inox with taps of the performance class "Z" with emulsion; in special alloys with taps of the performance class "S"; in titanium alloyed materials with taps of the performance class "TL".

VX

Recubrimiento de protección "VX" para aceros inoxidables y aleaciones de níquel

Tratamiento superficial específico especialmente adecuado para los machos para roscar de la clase de rendimiento "Z", adaptado de forma óptima para el mecanizado con emulsión de aceros inoxidables y aleaciones de níquel.

DC "VX" wear-protective coating for stainless steels and nickel alloys

Specific surface treatment, especially suitable for taps in performance class "Z", optimally adapted for machining with emulsion of stainless steels and nickel alloys.

Nota

Nuestros revestimientos estándar permiten procesar una amplia gama de materiales. Para aplicaciones específicas en materiales muy concretos, estaremos encantados de ofrecerle el recubrimiento más adecuado. Tiempo de entrega y precio sobre pedido.

Notice

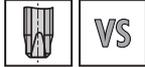

Our standard coatings allow a wide range of materials to be performed. For specific applications in very specific materials, we will be pleased to offer you the most suitable coating. Delivery time and price on request.

A PETICIÓN

- **Para un uso específico según las necesidades del cliente:**
Machos para roscar a máquina tipo MEGA
(Ø 42 - 164 mm)
- **Machos para roscar a máquina en metal duro integral para una mayor vida útil y una mayor fiabilidad del proceso en aplicaciones específicas.**

ON REQUEST

- **For specific applications according to customer requirements:**
DC machine taps type MEGA
(Ø 42 - 164 mm)
- **DC solid carbide machine taps for higher tool-life and improved process security in specific applications.**

ZX AMPCO®

ALEACIÓN ALUMINIO-BRONCE

ALU-BRONZE-ALLOYS

ZX - Machos para roscar a máquina DC con una geometría de corte especialmente adaptada

Para los agujeros pasantes y ciegos < 1.5 x D

Óptima
para AMPCO® 21 / 22
Dureza HB > 280 - < 330

Aceptable
para AMPCO® 18
Dureza HB < 420

Aceptable
para AMPCO® 25 / 26
Dureza HB < 420

Recomendación
Para AMPCO® 25 / 26: Ø del núcleo + 0.2 mm

Otras opciones para la procesamiento del AMPCO®:

Óptima
Para los agujeros pasantes

Machos para roscar a máquina DC tipo H320-4 / H420-4 para AMPCO® 18
Dureza HB < 200

Óptima
Para los agujeros pasantes y ciegos < 2 x D

per AMPCO® 25 / 26
Dureza HB > 380 - < 420
Lubrificante: aceite de corte / emulsión

Fresa de roscar en metal duro integral, tipo DC GF6165VS
Velocidad de corte Vc: 30 - 50 m/min
Avance fresado fz: 0.01 - 0.05 mm/denti

Óptima
Para los agujeros pasantes y ciegos < 4 x D

per AMPCO® 25 / 26
Dureza HB > 380 - < 420
Lubrificante: aceite de corte / emulsión

Fresa torbellino en metal duro integral, tipo DC GW301.VS / GWi306.VS
Velocidad de corte Vc: 30 - 50 m/min
Avance fresado fz: 0.01 - 0.08 mm/denti

ZX - DC machine taps with specially adapted cutting geometry

For through and blind holes < 1.5 x D

Optimal
for AMPCO® 21 / 22
Hardness Brinell HB > 280 - < 330

Suitable
for AMPCO® 18
Hardness Brinell HB < 420

Suitable
for AMPCO® 25 / 26
Hardness Brinell HB < 420

Recommendation
For AMPCO® 25 / 26: Core hole diameter + 0.2 mm

Alternative AMPCO® threading solutions:

Optimal
For through holes

DC machine taps type H320-4 / H420-4 for AMPCO® 18
Hardness Brinell HB < 200

Optimal
For through and blind holes < 2 x D

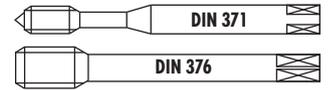

for AMPCO® 25 / 26
Hardness Brinell HB > 380 - < 420
Lubricant: cutting oil / emulsion

DC solid carbide thread milling cutter type GF6165VS
Cutting speed Vc: 30 - 50 m/min
Feed rate fz: 0.01 - 0.05 mm/tooth

Optimal
For through and blind holes < 4 x D

for AMPCO® 25 / 26
Hardness Brinell HB > 380 - < 420
Lubricant: cutting oil / emulsion

DC solid carbide thread whirl cutter type GW301.VS / GWi306.VS
Cutting speed Vc: 30 - 50 m/min
Feed rate fz: 0.01 - 0.08 mm/tooth

Taladros previos para roscas gas cónicas, según DIN EN 10226

Core hole diameters for tapered pipe thread to DIN EN 10226

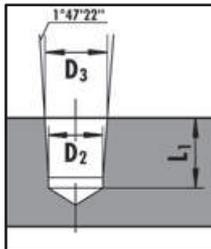

Taladros previos cilíndricos
Desgaste más rápido del macho.
A evitar

Parallel hole
Increased tap wear,
not recommended

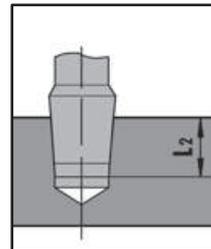

Taladros previos cónicos 1:16
Taladrar cilíndrico según Ø D₂
y escariar cónico según Ø D₃

Tapered hole 1:16
Pre-drill at Ø D₂
and taper-ream to Ø D₃

Roscar
Roscar hasta la profundidad
L₂ = Ø nominal

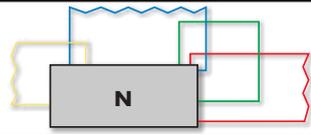

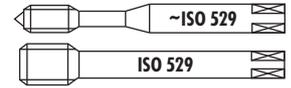

Tapped hole
Engage tap to hole depth
L₂ = nominal Ø

Taladros previos para roscas NPT y NPTF

Core hole diameters for NPT and NPTF threads

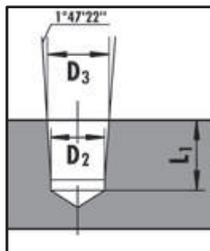

Taladros previos cilíndricos
Desgaste más rápido del macho.
A evitar

Parallel hole
Increased tap wear,
not recommended

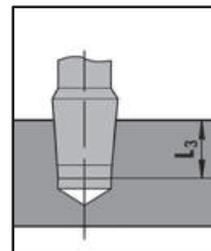

Taladros previos cónicos 1:16
Taladrar cilíndrico según Ø D₂
y escariar cónico según Ø D₃

Tapered hole 1:16
Pre-drill at Ø D₂
and taper-ream to Ø D₃

Roscar
Roscar hasta la profundidad
L₃ = Ø nominal

Tapped hole
Engage tap to hole depth
L₃ = nominal Ø

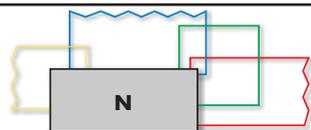

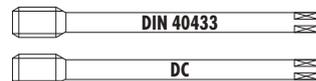

*Es recomendado de escariar D₃ al máximo

*Taper-ream at upper limit D₃ is recommended

MACHO DE CORONA

CROWN TAPS

Generalidad

El macho de corona DC con tratamiento superficial "V" es un útil de alto rendimiento y una calidad superficial del roscado excelente.

Campos de aplicación

El ahuecamiento delantero permite alojar las virutas. Por esta razón, el macho de corona puede ser utilizado tanto en agujeros pasantes como en agujeros ciegos. Su campo de aplicación se sitúa para materiales con resistencia hasta 850 N/mm² y alargamiento máximo a la rotura de 30 %.

Utilización

En caso de agujeros ciegos, para un roscado correcto, hay que adaptar la profundidad del taladro previo y seguir las siguientes instrucciones:

- roscar hasta que la fricción del aparato de roscar patine
- retroceder el macho y quitar las virutas
- terminar de roscar hasta el fondo de agujero.

Exigencias particulares

El funcionamiento correcto del macho de corona DC, así como la calidad de la rosca, dependen de los puntos siguientes:

- el error de alineación no debe exceder 0.1 mm
- el macho debe girar perfectamente centrado, utilizar un porta-machos de roscar adecuado
- trabajar con una velocidad de corte correcta
- lubricante adaptado al material
- fijar el útil en un aparato de roscar con compensación axial y embrague de seguridad
- reglar el embrague de seguridad sobre una posición superior al par de potencia de trabajo.

En el momento del primer roscado, aflojar el embrague, y apretar progresivamente hasta que el macho entre en movimiento.

Virutas

La capacidad de acumulación de las virutas en el ahuecamiento es la siguiente:

| Roscas | Ø 20 - 29 mm | ≥ Ø 30 mm |
|--------|--------------|-----------|
| M | - | 1.4 x D |
| MF | 1.2 x D | 1.4 x D |
| UN-8 | - | 1.4 x D |
| G | 1.2 x D | 1.4 x D |

General information

The DC crown tap with "V" surface treatment to prevent cold welding is a tool of high performance, which offers a very high quality surface finish of the tapped threads.

Application rang

Thanks to the front recess providing space for the chip collection, the DC crown tap is suitable for both, through and blind hole tapping. The crown tap can be used for materials with a tensile strength up to 850 N/mm² and an elongation of maximum 30 %.

Utilization

For an optimal blind hole threading, the core hole depth must be adapted accordingly and the following application instructions must be followed:

- tap until tapping head clutch slips
- retract tap and clear chips
- tap to the full depth.

General hints

The efficient operation of DC crown taps, as well as the quality of the cut threads, depend on observation of the following rules:

- do not exceed the maximum permissible centering error of 0.1 mm
- the tap must run concentrically, use a suitable tapping head
- tap at the correct cutting speed
- select a coolant to suit the material being tapped
- use a tapping head with axial compensation and safety clutch
- set the safety clutch so that it will slip at just above the tapping torque.

When tapping the first hole, slacken the clutch until it slips, then gradually tighten it until the tap is driven.

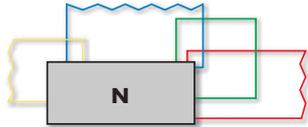

Chip accumulation

The chip accumulation capacity of the recess is the following:

| Thread diameter | Ø 20 - 29 mm | ≥ Ø 30 mm |
|-----------------|--------------|-----------|
| M | - | 1.4 x D |
| MF | 1.2 x D | 1.4 x D |
| UN-8 | - | 1.4 x D |
| G | 1.2 x D | 1.4 x D |

BROCAS-MACHOS

Generalidad

Broca-macho DC es un útil que permite taladrar y roscar en una sola operación (sin cambiar de herramienta).

Su utilización es ideal para máquinas CNC, máquinas de transmisión, tornos, roscadoras.

Campos de aplicación

Los materiales adecuados para trabajar con la broca-macho DC son los situados con una resistencia hasta 750 N/mm² como los aceros, la fundición gris, la fundición gris dúctil, el latón y el aluminio.

Exigencias particulares

- El taladro previo debe estar terminado antes que el macho de roscar empiece a trabajar.
- Para los materiales de virutas cortas, la profundidad de la rosca a realizar no debe superar $1.8 \times D$ ($2 \times D$ para N5952).
- Para los materiales de virutas cortas, la profundidad de la rosca a realizar no debe superar $1.2 \times D$.
- La lubricación es la misma.

Velocidad de corte

Si las máquinas lo permiten, es preferible trabajar con las velocidades de taladro y roscado apropiadas (ver tabla de utilización).

Sobre las máquinas donde las velocidades de taladro y de roscado no pueden ser variadas, es recomendable aplicar los valores indicados en la siguiente tabla.

Utilización

Chaflán:

Centrar y achaflanar simultáneamente.

Programación con avance y rotación, 100 % sincronizados (caso ideal):

- 1) Acercar la broca-macho en aceleración a su lugar de trabajo
- 2) Taladrar:
 - regular las vueltas
 - regular el avance
 - evitar las virutas largas
 - eliminar las virutas
- 3) Posicionar la broca-macho para iniciar el roscado
- 4) Roscar:
 - regular la velocidad del roscado
 - el avance debe corresponder a 100 % del paso
 - regular la profundidad
 - el roscado debe estar libre de virutas en el momento de empezar el trabajo
- 5) Volver con la broca-macho a la posición inicial.

Programación sin sincronización total del avance y de la rotación:

Importante: utilizar mandril con muelle de compresión bloqueado y extensión axial libre.

- 1) Acercar la broca-macho en aceleración a su lugar de trabajo
- 2) Taladrar:
 - regular las vueltas
 - regular el avance
 - evitar las virutas largas
 - eliminar las virutas
- 3) Posicionar la broca-macho para iniciar el roscado
- 4) Roscar:
 - regular la velocidad del roscado
 - el avance debe corresponder a 90 - 95 % del paso
 - regular la profundidad
- 5) Volver con la broca-macho a la posición inicial.

Velocidad de corte y revoluciones por minuto (directivas)

COMBINATION DRILL/TAPS

General information

DC combination drill/taps - two tools in one, which allows the drilling and the threading of a workpiece without changing the tool.

It is the optimal solution for CNC-machines, drilling heads, turret lathes and tapping machines.

Application rang

DC combination drill/taps are recommended for use in materials with a tensile strenght up to 750 N/mm², such as certain steels, cast iron, aluminium, brass.

General hints

- The core hole must be completely drilled through before the tap starts cutting.
- In short chipping materials, the depth of thread should not exceed 1.8 x D (type N5952 up to 2 x D).
- In long chipping materials, the depth of thread should not exceed 1.2 x D.
- Lubricate as for tapping.

Cutting speeds

On drilling heads and CNC-machines, the ideal speeds for drilling and tapping are selected (see our application chart). If the same speed is selected for both drilling and tapping, we recommend the values indicated below.

Programming instructions

Countersinking:

Center and countersink simultaneously.

Programming steps for spindle feed and rotation 100 % synchronised (ideal case):

- 1) Combi-drill-tap in rapid to start position
- 2) Drilling:
 - set speed
 - set feed
 - avoid long chips
 - clear shavings
- 3) Tapping section in start position
- 4) Tapping:
 - set speed
 - feed = 100 % pitch
 - set thread depth
 - tap must be free of swarf before starting to cut
- 5) Combi-drill-tap returns to start position.

Programming steps for spindle feed rotation not fully synchronised:

Important: Mount combination drill-tap in chuck with locked pressure spring, but with axial compensation on pull.

- 1) Combi-drill-tap in rapid to start position
- 2) Drilling:
 - set speed
 - set feed
 - avoid long chips
 - clear shavings
- 3) Tapping section in start position
- 4) Tapping:
 - set speed
 - feed = 90 - 95 % pitch
 - set thread depth
- 5) Combi-drill-tap returns to start position.

Cutting and spindle speeds (guide values)

| Material groups | Vc (m/min) | Speeds for different diameters | | | | | | | | | | |

ROSCADO POR LAMINACIÓN THREAD FORMING

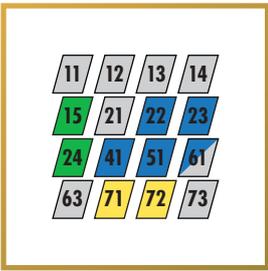

A PETICIÓN

Ejecuciones especiales con lóbulos poligonales adaptados para aplicaciones específicas.

ON REQUEST

Special executions with adapted polygon lobes for specific applications.

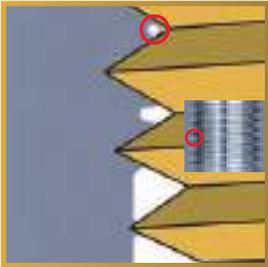

Campo de aplicación

Todos los materiales con un mínimo de 10 % de alargamiento y una resistencia a la rotura hasta 1'150 N/mm², ej. aceros, aceros inoxidables, titanio puro, aluminio, cobre, latón de virutas largas, etc.

Range of application

All materials with a minimum of 10 % elongation and a tensile strength of up to 1'150 N/mm², e.g. steels, stainless steels, pure titanium, aluminium, copper, long chipping brass, etc.

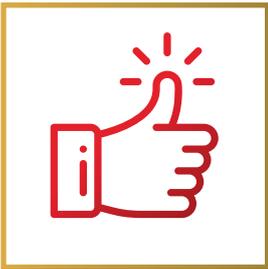

Proceso del laminado

Las puntas y flancos de los dientes del macho entran en la pieza a deformar y empujan el material dentro de los espacios del perfil de la herramienta. De esta manera se forma el perfil típico del roscado con la cueva en su extremidad.

Forming process

The polished points and flats of the thread former's teeth pierce the ductile material and force the material into the space in the tool profile. This creates the thread profile with its typical groove in the crest.

Ventajas

- Mejora de la seguridad del proceso, por la falta de viruta.
- Una sola herramienta para agujeros ciegos y pasantes.
- Óptimo para agujeros profundos.
- Roscado con una resistencia a la tracción estática y dinámica.

Advantages

- Higher process security due to the lack of shavings.
- Only one tool for both, through and blind holes.
- Optimal for deep threads.
- Thread with higher resistance of stripping by static and dynamic load.

Restricciones

Por razones físicas, el roscado por laminación en piezas con paredes finas es posible únicamente con una máxima precaución.

Application restriction

For physical reasons, thread forming in thin-walled workpieces should be carried out with due care.

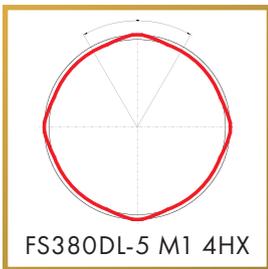

Lubrificación

La laminación del material ocasiona importantes fuerzas de fricción, por este motivo se debe proteger por una película de aceite. La rotura de ésta provoca soldaduras frías que pueden provocar la rotura del macho.

Adequate lubrication

The thread forming process generates considerable friction. Therefore the tool must be protected by a film of lubricant. If the supply of lubricant is interrupted, then cold welding will quickly occur, resulting in tool failure.

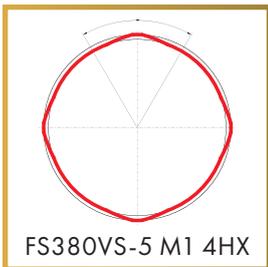

Macho de laminación FS-DL

Macho de laminación universal a 4 puntas para pequeños roscados de $\varnothing \geq 1 - < 3$ mm para los materiales deformables a frío. El recubrimiento "DLC" aporta excelentes propiedades de deslizamiento y autolubricación. Para inoxidables, cobre puro, etc.

Thread former FS-DL

Universal thread former with 4 forming lobes for small thread sizes $\varnothing \geq 1 - < 3$ mm, in all cold forming materials. With "DLC" wear-protective coating with excellent lubrication and sliding properties. For stainless steels, pure copper, etc.

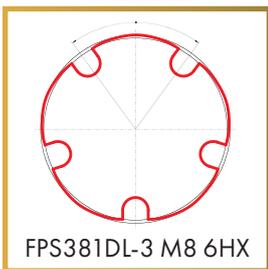

Macho de laminación FS-VS

Macho de laminación universal a 4 puntas para pequeños roscados de $\varnothing \geq 1 - < 3$ mm para los materiales deformables a frío. Con un recubrimiento DC "VS" para un mejor deslizamiento y protección contra el desgaste.

Thread former FS-VS

Universal thread former with 4 forming lobes for small thread sizes $\varnothing \geq 1 - < 3$ mm, in all cold forming materials. With DC "VS" tool wear protective coating with high sliding properties.

NEW

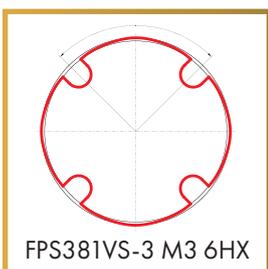

Macho de laminación FPS-DL

Para $\geq \varnothing 3$ mm, con puntas de contactos redondeadas, concebidas para una deformación progresiva de materiales de bajo coeficiente de alargamiento. Con recubrimiento de protección contra el desgaste "DLC" para un mejor deslizamiento y una alta vida útil de la herramienta en latón de virutas largas y aluminio.

Thread former FPS-DL

For $\varnothing \geq 3$ mm, with large forming lobes designed for a progressive flow of abrasive materials. With "DLC" wear-protective coating for better gliding and high tool life in long chipping brass and aluminium.

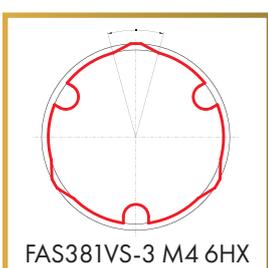

Macho de laminación FPS-VS

Para $\geq \varnothing 3$ mm, con puntas de contactos redondeadas, concebidas para una deformación progresiva de materiales de bajo coeficiente de alargamiento. El recubrimiento DC "VS" tiene una fuerte resistencia al desgaste y una estabilidad térmica y química a alta temperatura. Para aceros de construcción, al carbono, aleados, etc.

Thread former FPS-VS

For $\varnothing \geq 3$ mm, with large forming lobes designed for a progressive flow of materials with low elongation coefficient. With DC "VS" wear-protective coating with thermal and chemical properties. For structural steels, carbon steels, alloy steels, etc.

Macho de laminación FAS-VS

Para $\varnothing \geq 3$ mm, con puntas salientes, para una deformación rápida de materiales de alto coeficiente de alargamiento. El recubrimiento DC "VS" aporta excelentes propiedades de deslizamiento y autolubricación. Para inoxidables, cobre puro, etc.

Thread former FAS-VS

For $\varnothing \geq 3$ mm, with pointed forming lobes designed for a fast flow of tough materials with high elongation coefficient. With DC "VS" wear-protective coating with excellent lubrication and sliding properties. For stainless steels, pure copper, etc.

Ranuras de lubricación desde Ø 3 mm

El lubricante está guiado hacia las superficies de la herramienta directamente en contacto con el material.

Lubrication grooves from Ø 3 mm

Lubricant will be guided to the surface of the tool which is directly in contact with the material.

Sin ranuras de lubricación

Particularmente recomendado para materiales blandos y agujeros pasante en chapa.

Without lubrication grooves

Especially recommended for forming soft materials and for through holes in thin parts (e.g. for sheet metal working).

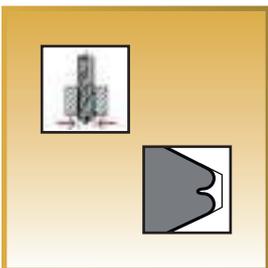

Con lubricación interna

Recomendado particularmente para agujeros profundos y trabajos en horizontal.

With internal coolant supply

Highly recommended for deeper threads and for horizontal working.

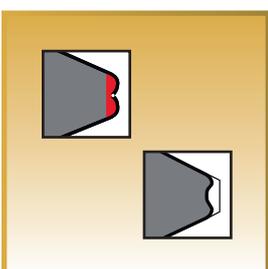

Perfil del roscado correcto

Un taladro previo preciso es fundamental para realizar un roscado conforme a las normas. Para materiales con fuerte coeficiente de alargamiento o roscado profundo > 2 x D, un taladro previo de 0.02 a 0.05 mm es recomendado.

Correct thread profile

Accurate core hole is required in order to form a thread according to the norm. For materials with a very high elongation coefficient and threading depth > 2 x D, we recommend increasing the core hole Ø by 0.02 to 0.05 mm.

Perfil incorrecto

Perfil muy alto consecuencia de un taladro previo pequeño, genera un par de potencia demasiado elevado.
Perfil incompleto consecuencia de un taladro previo muy grande.

Incorrect thread profile

Too big profile due to the too small core hole diameter. The required torque is higher.
Incomplete profile caused by the core hole diameter being too big.

COJINETES CON ENTRADA EN HÉLICE

La entrada helicoidal hace que las virutas fluyan libremente hacia adelante y reduce el par de corte. Esto evita la acumulación de astillas en los agujeros de despeje. El resultado es una mejor calidad de la superficie de los hilos cortados y una mayor vida útil de la herramienta.

Por lo tanto, las cojinetes para uso de la máquina deben ser ordenadas con entrada en espiral.

DIES WITH SPIRAL ENTRY

A spiral entry results in a free flow of chips ahead of the die and a reduction in the cutting torque. Blocking of the clearance holes by chips is avoided. This results in an improved surface finish on the cut threads and a longer die life.

Hence dies for machine use must be ordered with spiral entry.

COJINETES DE ROSCAR DE ALTO RENDIMIENTO

HIGH PERFORMANCE THREAD CUTTING DIES

N5110/N5120

con entrada en hélice desde \varnothing 3 mm
with spiral entry from \varnothing 3 mm

Cojinetes de roscar redondos en HSS, según las normas DIN EN

- para el trabajo a mano y a máquina
- Para el mecanizado de aceros de hasta 800 N/mm²
- Diferentes versiones para mecanizar una amplia gama de materiales

Round dies in HSS, as per DIN EN standards

- for machine and manual use
- For machining steels up to 800 N/mm²
- Different versions for cutting a wide range of materials

Z5120

con entrada en hélice desde \varnothing 2 mm
with spiral entry from \varnothing 2 mm

Cojinetes de roscar redondos en HSSE, según las normas DIN EN

- Astillas finas debido a más agujeros de separación y por lo tanto más bordes cortantes, y la extensión del chaflán a 2 x P
- Para la mecanización de aceros inoxidable, aceros termotratables, aceros de cementación, etc. hasta 1'200 N/mm² y aleaciones de ALU de virutas cortas

Round dies in HSSE, as per DIN EN standards

- Fine chips due to more clearance holes and thus more cutting edges, and the extension of the chamfer to 2 x P
- For machining stainless steels, heat-treatable steels, case-hardening steels etc. up to 1'200 N/mm² and short-chipping ALU alloys

Z5120 LL Long Life

con entrada en hélice desde \varnothing 2 mm
with spiral entry from \varnothing 2 mm

Cojinetes de roscar redondos en HSSE, según las normas DIN EN

- Virutas finas debido al máximo número de agujeros de despeje y por lo tanto aún más bordes cortantes, y la extensión del chaflán de 2.25 x P
- Para la elaboración de grandes series
- Excepcionalmente larga vida de muerte
- Para la mecanización de aceros inoxidable, aceros termotratables, aceros de cementación, etc. hasta 1'200 N/mm² y aleaciones de ALU de virutas cortas

Round dies in HSSE (ASP), as per DIN EN standards

- Very fine chips due to maximum number of clearance holes and thus still more cutting edges, and the extension of the chamfer to 2.25 x P
- For the processing of large series
- Exceptionally long die life
- For machining stainless steels, heat-treatable steels, case-hardening steels etc. up to 1'200 N/mm² and short-chipping ALU alloys

MS5120

con entrada en hélice
with spiral entry

Cojinetes de roscar redondos en HSS, según las normas DIN EN

- Con agujeros de despeje ampliados para evitar que las virutas se amontonen
- Para el mecanizado de latón de virutas cortas

Round dies in HSS, as per DIN EN standards

- With enlarged clearance holes to prevent chips crowding
- For the machining of short-chipping brass

N5220 Z5220

MS5220

con entrada en hélice
with spiral entry

Cojinetes para tornos automáticos en HSS (Z = HSSE), con 2 agujeros de fijación

- Área de aplicación según N5120, MS5120 y Z5120
- Ventaja: debido a la menor inercia de masa del portamuestras, son posibles mayores velocidades / vida útil de la herramienta

Button dies for Swiss automatics, in HSS (Z = HSSE), with 2 securing holes

- Application area according to type N5120, MS5120 and Z5120
- Advantage: the low inertia of the die holder permits higher spindle speeds and extends die life

N5310

Cojinetes hexagonales en HSS, dimensiones generales según DIN 382

- Para volver a cortar y reparar los hilos dañados o para cortar en lugares de difícil acceso

Hexagon die nuts in HSS, general dimensions as per DIN 382

- For recutting and reclaiming damaged threads or for cutting threads in difficult locations

N5420

con entrada en hélice desde \varnothing 3 mm
with spiral entry from \varnothing 3 mm

Cojinetes de campana en HSS

- Ventaja: libre flujo de virutas y mejor suministro de lubricante refrigerante a través de espacios abiertos de virutas, incluso cuando se corta cerca del cuello

Bell form type thread cutting dies in HSS

- Advantage: free chip flow and improved coolant supply thanks to the open clearance holes, even when cutting threads close to shoulders

TABLA DE UTILIZACIÓN POR COJINETES DE ROSCAR

APPLICATION CHART FOR CUTTING DIES

| Clasificación de los materiales | Referencia | Velocidad de corte Vc m/min (guide line) | Lubrificante | Typo de cojinete | Ángulo de desprendimiento de las virutas |
|---|-------------------------|---|---|------------------|---|
| Aceros de construcción | St37-2, St50-2 | 8 - 12 | Aceite de corte | 17 - 22° | N5... |
| Aceros de decoletaje | 9SMn28, 9SMnPb28 | 10 - 14 | Aceite de corte | 17 - 22° | N5... |
| Aceros de cementación | C15, Ck15, 16MnCr5 | 6 - 10 | Aceite de corte / Ac. de corte especial | 17 - 22° | Z5... / Z5... LL |
| Aceros al carbón | C35Pb, C45 | 5 - 8 | Aceite de corte / Ac. de corte especial | 13 - 18° | Z5... / Z5... LL |
| Aceros inoxidables al azufre | X12CrMoS17, X12CrNiS188 | 4 - 6 | Aceite de corte especial | 13 - 18° | Z5... / Z5... LL |
| Latón, virutas cortas, Ms 58 | CuZn39Pb2, CuZn40Pb2 | 20 - 30 | Aceite de corte | 6 - 11° | MS5... |
| Latón, virutas largas, Ms 60 | CuZn20, CuZn37 | 12 - 18 | Aceite de corte | 10 - 15° | N5... |
| Aleación de aluminio, de virutas cortas | GD-ALSi8Cu3, GD-ALSi12 | 8 - 12 | Aceite de corte especial, Pétroleo | 18 - 23° | Z5... |
| Titanio puro | Ti2 | 5 - 8 | Aceite de corte especial | 19 - 24° | Z5... / Z5... LL |

Cojinetes con ángulo de desprendimiento de las virutas especialmente adaptado para hierro fundido gris, latón sin plomo, bronce, bronce de cañón, cobre, aleaciones de aluminio con virutas largas están disponibles como diseño especial.

A petición, también podemos suministrar cojinetes en versión recubierta. Precio y plazo de entrega a petición.

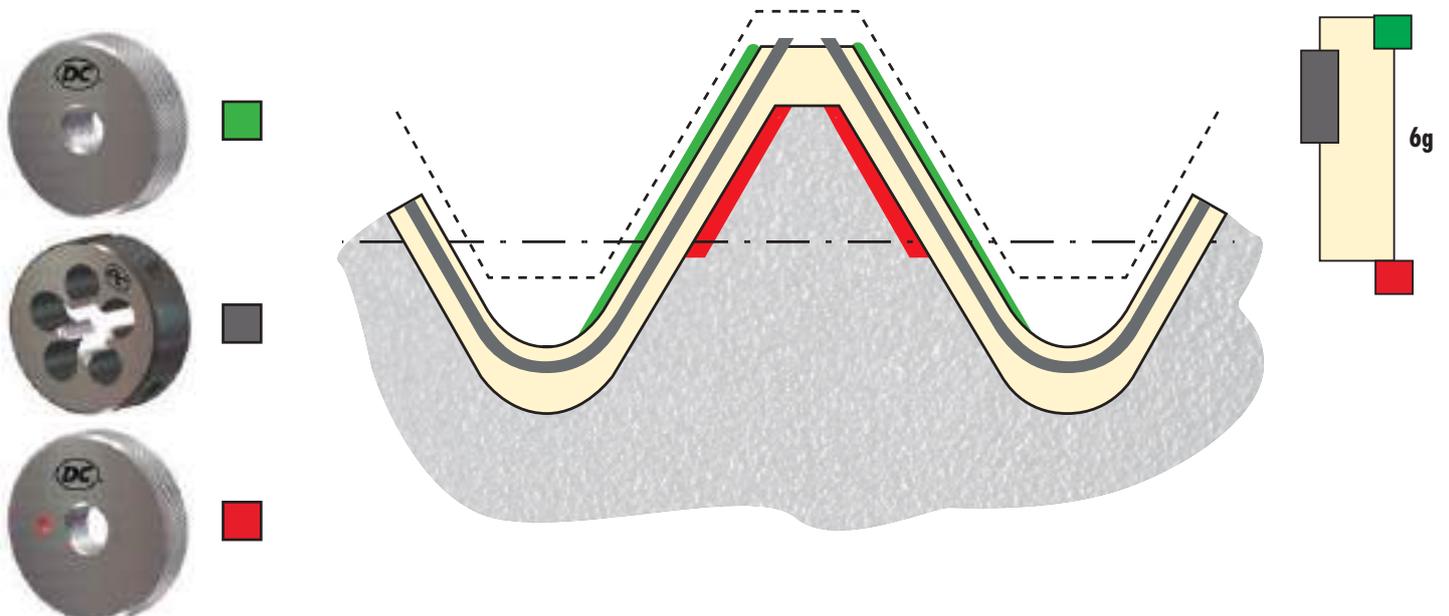

| Material designation | Material Number | Cutting speed m/min (guide line) | Cutting fluid | Rake angle | Type of die |
|----------------------------|-------------------------|-------------------------------------|-----------------------------------|------------|------------------|

| Al-alloyed, short-chipping | GD-ALSi8Cu3, GD-ALSi12 | 8 - 12 | Spezial cutting oil, Paraffin | 18 - 23° | Z5... |
| Pure titanium | Ti2 | 5 - 8 | Special cutting oil | 19 - 24° | Z5... / Z5... LL |

Cutting dies with specially adapted rake angle for grey cast iron, lead-free brass, bronze, gunmetal, copper and long-chipping aluminium alloys are available as special execution.

On request, we can also supply dies in a coated version. Price and delivery time on request.

CALIBRES DE ROSCAS DE PRECISIÓN — PRECISION THREAD GAUGES

D5703

Tampones de roscas DC "Pasa" / "No pasa"

dimensiones según DIN 2280 hasta un diámetro nominal de 40 mm

DC "Go" / "No-Go" thread plug gauge

Dimensions according to DIN 2280 till nominal diameter 40 mm

D5701-1

Tampones de roscas DC "Pasa"

dimensiones según DIN 2281-1;

a partir de un diámetro nominal de 40 mm según la norma DIN 2281-2

DC "Go" thread plug gauge

dimensions according to DIN 2281-1;

above nominal diameter of 40 mm as per DIN 2281-2

D5701-2

Tampones de roscas DC "No pasa"

dimensiones según DIN 2283-1;

a partir de un diámetro nominal de 40 mm según la norma DIN 2283-2

DC "No-Go" thread plug gauge

dimensions according to DIN 2283-1;

above nominal diameter of 40 mm as per DIN 2283-2

D5720

Tampones de roscas DC "Pasa" / "No pasa" cónico

con escalón de medida

DC "Go" / "No-Go" thread plug gauge conical

with step limit

Información importante

DC SWISS SA se especializa en la fabricación de tampones de roscas con pase de rosca extremadamente fino, como los que se utilizan con frecuencia en la industria relojera, especialmente para comprobar las roscas interiores de las cajas de los relojes. Si lo solicita, estaremos encantados de hacerle una oferta adecuada.

Important note

DC SWISS SA is specialised in the manufacture of thread plug gauges with extremely fine threads, such as those frequently used in the watchmaking industry, especially for checking internal threads in watch cases.

On request, we will be pleased to submit you an appropriate quotation.

CALIBRES DE ROSCAS DE PRECISIÓN — PRECISION THREAD GAUGES

D5704

Calibres anillos de roscas DC "Pasa"

dimensiones según DIN 2285-1

DC "Go" thread ring gauge

dimensions according to DIN 2285-1

D5714

Calibres anillos de roscas DC "No pasa"

dimensiones según DIN 2299-1

DC "No-Go" thread ring gauge

dimensions according to DIN 2299-1

D5721

Calibres anillos de roscas DC "Pasa" / "No pasa" para rosca externa cónico con escalón de medida

DC "Go" / "No-Go" thread ring gauge for tapered external thread with step limit

Calibres de entrega inmediata sin certificado de control.

Sobre pedido, los calibres pueden ser entregados con certificado en breve, servicio de pago.

Para nuevos calibres de roscas / incertidumbre de medida U95.

Al certificar, los calibres son marcados con el n° de identificación de los certificados correspondientes.

Thread gauges available from stock without test certificate.

However, all gauges can be delivered in short time with test certificate on demand, price for the certificate on request.

For new ordered thread gauges / measuring uncertainty U95.

All "certified" thread gauges will be marked with the identity number of the corresponding test certificate.

TABLA DE UTILIZACIÓN — APPLICATION CHART

DC Clasificación de los materiales

DC Material classification

| Grupos de materiales Material groups | Clasificación de los materiales | Material designation | Dureza Hardness (HB) | Resistencia Tensile strength Rm (N/mm ²) | Lubricante Lubricant Recubrimiento Coated |
|--|--|---|----------------------------|---|--|
| 10 Aceros Steels | 11 Aceros de decoletaje | Free-cutting steels | < 200 | < 700 | |
| | 12 Aceros de construcción / cementación | Structural, cementation steels | < 200 | < 700 | |
| | 13 Aceros al carbón | Carbon steels | < 300 | < 1000 | |
| | 14 Aceros aleados < 850 N/mm ² | Alloy steels < 850 N/mm ² | < 250 | < 850 | |
| | 15 Aceros aleados / tratados > 850 - < 1150 N/mm ² | Alloy steels hard. / temp. > 850 - < 1150 N/mm ² | > 250 | > 850 | |
| | 16 Aceros de alta resistencia ≤ 44 HRC | High tensile alloy steels ≤ 44 HRC | > 250 | > 850 | |
| | 17 Aceros mejorados > 44 - ≤ 54 HRC | Alloy steels tempered > 44 - ≤ 54 HRC | > 410 | > 1400 | |
| | 18 Aceros templados > 54 - ≤ 63 HRC | Alloy steels hardened > 54 - ≤ 63 HRC | > 560 | > 1980 | |
| 20 Aceros inoxidables Stainless steels | 21 Aceros inoxidables al azufre | Free machining stainless steels | < 250 | < 850 | |
| | 22 Austeníticos | Austenitic stainless steels | < 250 | < 850 | |
| | 23 Ferríticos y martensíticos < 850 N/mm ² | Ferritic and martensitic < 850 N/mm ² | < 250 | < 850 | |
| | 24 Ferríticos y martensíticos > 850 - < 1150 N/mm ² | Ferritic and martensitic > 850 - < 1150 N/mm ² | > 250 | > 850 | |
| 30 Fundición Cast iron | 31 Fundición gris | Cast iron | < 250 | < 850 | |
| | 32 Fundición de grafito + esferoidal y maleable | Spheroidal graphite + malleable cast iron | < 250 | < 850 | |
| 40 Titanio Titanium | 41 Titanio puro | Pure titanium | < 250 | < 850 | |
| | 42 Aleación al titanio | Titanium alloys | > 250 | > 850 | |
| 50 Níquel Nickel | 51 Aleación al níquel 1 ≤ 850 N/mm ² | Nickel alloys 1 ≤ 850 N/mm ² | < 250 | < 850 | |
| | 52 Aleación al níquel 2 > 850 - ≤ 1150 N/mm ² | Nickel alloys 2 > 850 - ≤ 1150 N/mm ² | > 250 | > 850 | |
| | 53 Aleación al níquel 3 > 1150 - ≤ 1600 N/mm ² | Nickel alloys 3 > 1150 - ≤ 1600 N/mm ² | > 340 | > 1150 | |
| 60 Cobre Copper | 61 Cobre puro (electrolítico) | Pure copper (electrolytic copper) | < 120 | < 400 | |
| | 62 Latón, bronce (virutas cortas) | Short chip brass, phosphor bronze, gun metal | < 200 | < 700 | |
| | 63 Latón (virutas largas) | Long chip brass | < 200 | < 700 | |
| | 64 Latón sin plomo | Lead free brass | < 220 | < 700 | |
| 70 Aluminio Magnesio Aluminium Magnesium | 71 Al no aleado | Al unalloyed | < 100 | < 350 | |
| | 72 Al aleado Si < 1.5 % | Al alloyed Si < 1.5 % | < 150 | < 500 | |
| | 73 Al aleado Si > 1.5 % - < 10 % | Al alloyed Si > 1.5 % - < 10 % | < 120 | < 400 | |
| | 74 Al aleado Si > 10 %, Aleaciones de magnesio | Al alloyed Si > 10 %, Mg-alloys | < 120 | < 400 | |

HERRAMIENTAS ESPECIALES A PEDIDO

Algunos procesos requieren herramientas especiales a demanda. DC SWISS puede crear herramientas de roscado a medida para satisfacer sus necesidades.

Con nuestra experiencia, podemos crear herramientas a medida que cumplen los requisitos más exigentes.

Para que pueda crear los conjuntos más complejos y variados que mejor se adapten a cada situación, DC SWISS le ofrece el acceso a su amplia experiencia. Las herramientas son, al fin y al cabo, elementos esenciales. Deben adaptarse a cada configuración, a cada material y a todas las técnicas de producción. Las formas y tamaños ya no son factores limitantes. DC SWISS desarrolla herramientas de forma natural, ya que los pedidos a medida son cada vez más habituales.

SPECIAL TOOLS ON DEMAND

Some processes require special on demand tools. DC SWISS can create custom-made threading tools to meet your requirements.

With our expertise, we can create on demand tools that meet the highest market requirements.

To enable you to create the most audacious and varied assemblies that are best suited to every situation, DC SWISS offers you access to its extensive expertise. Tools are, after all, essential items. They need to adapt to every configuration, every material and all production techniques. Shapes and sizes are no longer constraining factors. DC SWISS develops tools as a matter of course, because custom-made orders are becoming increasingly commonplace.

ESPECIFICACIONES — SPECIFICATIONS

TAN

TAZ

FA

- *Materia prima de primera calidad HSSE-PM*
- *La precisión y la repetibilidad de la herramienta al fabricar en una sola cogida*
- *Limpiar, cepillar o pulir el 100 % de las herramientas*
- *Recubrimiento óptimo adaptado a cada geometría*
- Top quality HSSE-PM raw material
- Accuracy and repeatability of the tool by manufacturing in a single clamping operation
- Cleaning, brushing or polishing of 100 % of the tools
- Optimal coating adapted to each geometry

TAN40

- *Para los agujeros pasantes < 2 x D*
- For through holes < 2 x D

TAN50

- *Para los agujeros ciegos < 2 x D*
- For blind holes < 2 x D

Aplicación

Para materiales fáciles de mecanizar, aceros, latón, oro amarillo, plata

Application

For easy-to-machine materials, steels, brass, yellow gold, silver

TAN40VS

- *Recubrimiento versátil de protección contra el desgaste "VS" para una larga vida útil en la producción en serie*
- Versatile "VS" wear-protective coating for long tool life in series production

TAN50VS

TAZ40VS

- *Para los agujeros pasantes < 2 x D*
- *Con una larga entrada adaptada al paso, para una mejor penetración en el material*
- For through holes < 2 x D
- With a long chamfer adapted to the pitch, for a better penetration into the material

TAZ50VS

- *Para los agujeros ciegos < 2 x D*
- For blind holes < 2 x D

Aplicación

Por materiales tenaces como aleaciones de níquel, aleaciones de titanio, materiales preciosos aleados

Application

For tough materials such as nickel alloys, titanium alloys, alloyed precious materials

- *Recubrimiento específico "VS" de última generación adaptado a la geometría de la herramienta*
- Specific "VS" coating of the latest generation adapted to the geometry of the tool

ESPECIFICACIONES — SPECIFICATIONS

FA80VS

- Para los agujeros pasantes y ciegos $< 2.5 \times D$
- Con una entrada extra corta de $1.5 \times P$ (para los hilos cercanos al fondo del agujero)

- For through and blind holes $< 2.5 \times D$
- With extra-short chamfer $1.5 \times P$ (for threads close to the bottom of the core hole)

FA83VS

- Para los agujeros pasantes y ciegos $< 2.5 \times D$
- Con una entrada corta $2.5 \times P$

- For through and blind holes $< 2.5 \times D$
- With short chamfer $2.5 \times P$

Aplicación

- Para cualquier tipo de material con una elongación $> 5\%$.
- Polígono hecho de 4 puntas de contacto de $\varnothing 0.5\text{ mm}$
- Mejora de la resistencia a la tensión del hilo

Application

- For any type of material with an elongation $> 5\%$
- Polygon made up of 4 lobes from $\varnothing 0.5\text{ mm}$
- Improved thread tensile strength

- Recubrimiento versátil de protección contra el desgaste "VS" para una larga vida útil en la producción en serie

- Versatile "VS" wear-protective coating for long tool life in series production

ESPECIFICACIONES — SPECIFICATIONS

CMS

CFA

- El grado de metal duro adaptado para la dureza y la resistencia a la torsión
- La precisión y la repetibilidad de la herramienta al fabricar en una sola cogida
- Calidad de superficie insuperable

- Hard Metal grade suitable for its hardness and torsional strength
- Precision and repeatability of the tool by manufacturing in a single clamping operation
- Unsurpassed surface quality

CMS50

CMS50VS

- Para los agujeros pasantes y ciegos $< 3 \times D$
- Con una revolucionaria geometría de entrada para una óptima penetración del material

- For through and blind holes $< 3 \times D$
- With a revolutionary chamfer geometry for optimal material penetration

Aplicación

- Para materiales frágiles, latón (virutas cortas), hierro fundido gris, Cube2, aleación de aluminio con Si $> 5 \%$.
- Recubrimiento específico "VS" de última generación adaptado a la geometría de la herramienta

Application

- For brittle materials like short chip brass, grey cast iron, Cube2, aluminium alloy with Si $> 5 \%$
- Specific "VS" coating of the latest generation adapted to the geometry of the tool

CFA80VS

- Para los agujeros pasantes y ciegos $< 2.5 \times D$
- Con una entrada extra corta de $1.5 \times P$ (para los hilos cercanos al fondo del agujero)

- For through and blind holes $< 2.5 \times D$
- With extra-short chamfer $1.5 \times P$ (for threads close to the bottom of the core hole)

CFA83VS

- Para los agujeros pasantes y ciegos $< 2.5 \times D$
- Con una entrada corta $2.5 \times P$

- For through and blind holes $< 2.5 \times D$
- With short chamfer $2.5 \times P$

Aplicación

- Para cualquier tipo de material no ferroso con una elongación $> 3 \%$
- Para materiales como: aleaciones de aluminio y cobre, oro amarillo y rojo, plata, etc.
- Versátil revestimiento de protección contra el desgaste "VS" para una larga vida útil en la producción en serie

Application

- For any type of non-ferrous material with an elongation $> 3 \%$
- For materials such as: aluminium and copper alloys, yellow and red gold, silver, etc
- Versatile "VS" wear-protective coating for long tool life in series production

DC Clasificación de los materiales

DC Material classification

| Grupos de materiales Material groups | Clasificación de los materiales | Material designation | Dureza Hardness (HB) | Resistencia Tensile strength Rm (N/mm ²) | Alargamiento Elongation A (%) |
|--|--|---|----------------------------|---|--|
| 10 Aceros Steels | 11 Aceros de decoletaje | Free-cutting steels | < 200 | < 700 | < 10 |
| | 12 Aceros de construcción / cementación | Structural, cementation steels | < 200 | < 700 | < 30 |
| | 13 Aceros al carbón | Carbon steels | < 300 | < 1000 | < 20 |
| | 14 Aceros aleados < 850 N/mm ² | Alloy steels < 850 N/mm ² | < 250 | < 850 | < 30 |
| | 15 Aceros aleados / tratados > 850 - < 1150 N/mm ² | Alloy steels hard. / temp. > 850 - < 1150 N/mm ² | > 250 | > 850 | < 30 |
| | 16 Aceros de alta resistencia ≤ 44 HRC | High tensile alloy steels ≤ 44 HRC | > 250 | > 850 | < 12 |
| | 17 Aceros mejorados > 44 - ≤ 54 HRC | Alloy steels tempered > 44 - ≤ 54 HRC | > 410 | > 1400 | < 2 |
| | 18 Aceros templados > 54 - ≤ 63 HRC | Alloy steels hardened > 54 - ≤ 63 HRC | > 560 | > 1980 | < 2 |
| 20 Aceros inoxidables Stainless steels | 21 Aceros inoxidables al azufre | Free machining stainless steels | < 250 | < 850 | < 25 |
| | 22 Austeníticos | Austenitic stainless steels | < 250 | < 850 | > 20 |
| | 23 Ferríticos y martensíticos < 850 N/mm ² | Ferritic and martensitic < 850 N/mm ² | < 250 | < 850 | > 20 |
| | 24 Ferríticos y martensíticos > 850 - < 1150 N/mm ² | Ferritic and martensitic > 850 - < 1150 N/mm ² | > 250 | > 850 | > 15 |
| 30 Fundición Cast iron | 31 Fundición gris | Cast iron | < 250 | < 850 | < 10 |
| | 32 Fundición de grafito + esferoidal y maleable | Spheroidal graphite + malleable cast iron | < 250 | < 850 | > 10 |
| 40 Titanio Titanium | 41 Titanio puro | Pure titanium | < 250 | < 850 | > 20 |
| | 42 Aleación al titanio | Titanium alloys | > 250 | > 850 | < 20 |
| 50 Níquel Nickel | 51 Aleación al níquel 1 ≤ 850 N/mm ² | Nickel alloys 1 ≤ 850 N/mm ² | < 250 | < 850 | > 25 |
| | 52 Aleación al níquel 2 > 850 - ≤ 1150 N/mm ² | Nickel alloys 2 > 850 - ≤ 1150 N/mm ² | > 250 | > 850 | < 25 |
| | 53 Aleación al níquel 3 > 1150 - ≤ 1600 N/mm ² | Nickel alloys 3 > 1150 - ≤ 1600 N/mm ² | > 340 | > 1150 | < 20 |
| 60 Cobre Copper | 61 Cobre puro (electrolítico) | Pure copper (electrolytic copper) | < 120 | < 400 | > 12 |
| | 62 Latón, bronce (virutas cortas) | Short chip brass, phosphor bronze, gun metal | < 200 | < 700 | < 12 |
| | 63 Latón (virutas largas) | Long chip brass | < 200 | < 700 | > 12 |
| | 64 Latón sin plomo | Lead free brass | < 220 | < 700 | > 15 |
| 70 Aluminio Magnesio Aluminium Magnesium | 71 Al no aleado | Al unalloyed | < 100 | < 350 | > 15 |
| | 72 Al aleado Si < 1.5 % | Al alloyed Si < 1.5 % | < 150 | < 500 | > 15 |
| | 73 Al aleado Si > 1.5 % - < 10 % | Al alloyed Si > 1.5 % - < 10 % | < 120 | < 400 | < 15 |
| | 74 Al aleado Si > 10 %, Aleaciones de magnesio | Al alloyed Si > 10 %, Mg-alloys | < 120 | < 400 | < 10 |
| 80 Materiales plásticos Plastic compounds | 81 Materiales termoplásticos | Thermoplastics | - | - | - |
| | 82 Materiales duroplásticos | Duroplastics | - | - | - |
| | 83 Materiales plásticos reforzados con fibras | Glass fibre reinforced plastics | - | - | - |
| 90 Metales preciosos Precious metals | 91 Oro amarillo | Yellow gold | - | - | - |
| | 92 Oro rojo | Red gold | - | - | - |
| | 93 Oro blanco | White gold | - | - | - |

CALIBRES TAMPÓN — THREAD PLUG GAUGES

METROLOGÍA — METROLOGY

PRODUCCIÓN — PRODUCTION

< 2.74 mm

UTILIZACIÓN

El hecho de que el giro inicial de la rosca y la punta del calibrador hayan sido aplanados asegura que la herramienta se enganche óptimamente en la rosca, lo cual es esencial para garantizar una medición correcta. Eso permite al calibre de comprobar la rosca a su máxima profundidad.

CONTROL DE PERFIL

Nuestra experiencia en el campo de la rectificación nos asegura un control perfecto de las tolerancias, de la forma del perfil y la calidad superficial.

ANILLOS DE CONTROL NO PASA

El corte en el diámetro exterior de nuestros medidores de anillo NO-GO asegura que los lados del tornillo se pueden comprobar óptimamente, eliminando el riesgo de cualquier inspección incorrecta causada por un bloqueo en el diámetro exterior del medidor.

SISTEMA MODULAR

Un tornillo de acoplamiento permite conectar el calibre GO a la sección NO-GO según sea necesario. La caja rígida protege los medidores durante el transporte. Su interior moldeado mantiene el producto limpio y lo protege de los impactos.

CONTRA CALIBRES — PLUG CHECK GAUGES

El contra calibre **NO-GO** sirve para qualificar el calibre anillo nuevo.

The **NO-GO** plug check gauge is the foolproofing device for the new ring gauge.

El contra calibre **GO** sirve para qualificar el calibre anillo.

The **GO** plug check gauge is used to check the quality of your ring gauge.

El testigo de desgaste **WEAR** extenderá la vida útil del calibre anillo hasta el límite de tolerancia dado por la norma.

The master plug gauge **WEAR** will extend the service life of your ring gauge up to a certain tolerance limit.

UTILISATION

The fact that the initial turn of the screw thread and also the tip of the gauge have been ground flat ensures that the tool engages optimally in the thread, which is essential for ensuring a correct measurement. This enables the gauge to check the thread at its maximum depth.

PROFILE CONTROL

Our expertise in the field of rectification ensures we have perfect control of tolerances for the shape of the profile and for surface textures.

NO-GO RING GAUGE

The cut-away on the exterior diameter of our NO-GO ring gauges ensures the sides of the screw can be optimally checked, eliminating the risk of any incorrect inspection caused by a blockage on the exterior diameter of the gauge.

MODULAR SYSTEM

A coupling screw enables the GO gauge to be connected to the NO-GO section as required. The rigid box protects the gauges during transportation. Its moulded interior keeps the product clean and protects it from impacts.

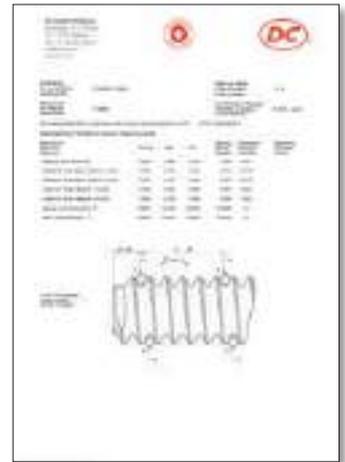

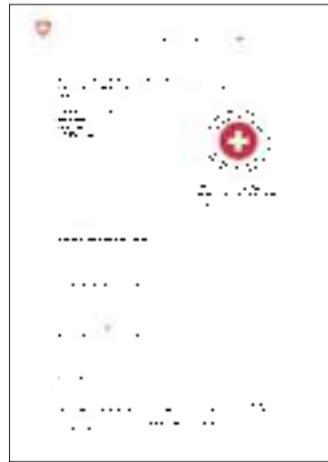

SCS CERTIFICADO DE MEDICIÓN

Un certificado es la confirmación por escrito de la calidad del equipo metrológico de una empresa. DC NANO TOOLS SA (acreditación SCS 0143), miembro del Grupo DC SWISS, puede inspeccionar y calibrar medidores de rosca para usted de acuerdo con la norma internacional ISO 17025. Ese servicio de pago está disponible para diámetros de flanco de 0.1 à 3.0 mm, y diámetros externos de 0.1 à 3.5 mm.

La totalidad de los calibres tienen certificado SCS.

ISO 17025:2017 ACCREDITED © DC NANO TOOLS SA

SCS MEASUREMENT CERTIFICATE

A certificate is written confirmation of the quality of a company's metrological equipment. DC NANO TOOLS SA (SCS accreditation 0143), a member of the DC SWISS Group, can inspect and calibrate thread gauges for you in accordance with the ISO 17025 international standard.

This chargeable service is available for pitch diameters of 0.1 to 3.0 mm and external diameters of 0.1 to 3.5 mm.

All plug thread gauges are SCS certified.

ISO 17025:2017 accredited © DC NANO TOOLS SA

DESCARGUE SU CONFIRMACIÓN DE CUMPLIMIENTO

Ahora puede acceder a su confirmación de conformidad en cualquier momento, en cualquier lugar desde su teléfono. Simplemente escanee el código QR en la tarjeta acompañando la caja y descargue el archivo pdf asociado.

La confirmación de conformidad que acompaña a cada caja confirma que la calidad ha seguido escrupulosamente el proceso de seguimiento posterior a la producción.

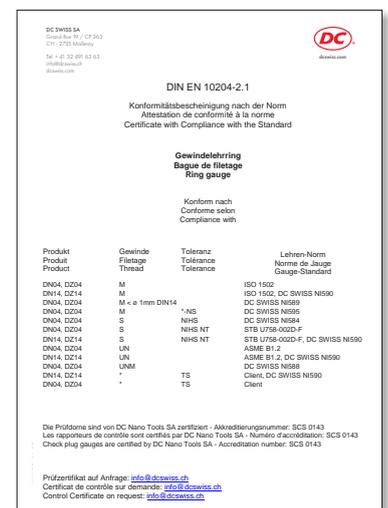

DC SWISS SA quality control

DOWNLOAD YOUR CONFIRMATION OF COMPLIANCE

You can now access your confirmation of compliance any time, at any place on your phone. Simply scan the QR code on the card inside the box and download the associated pdf file.

The confirmation of compliance accompanying each box confirms that the factory has scrupulously followed the post-production monitoring process.

El patrón roscado DC SWISS sirve para calibrar las maquinas de medición. Todos los patrones de nuestro programa son disponibles o sobre pedido en caso de ser específico. Son entregados con un certificado de homologación SCS que confirma que la producción a seguido estrictamente el proceso de medición al final de la fabricación según ISO 17025. Atesta de la calidad del equipo metroológico de DC NANO TOOLS SA (SCS 0143) centro de competencia y miembro del grupo DC SWISS.

The DC SWISS calibration thread plug gauge is used for the calibration of measuring machines. The calibration gauges from our catalogue, or made to your specific requirements, are delivered with a SCS measurement certificate. This confirms that the control process during production has been conscientiously followed to ISO 17025. It attests to the quality of the metrological equipment of DC NANO TOOLS SA (SCS 0143), centre of competence and member of the DC Group.

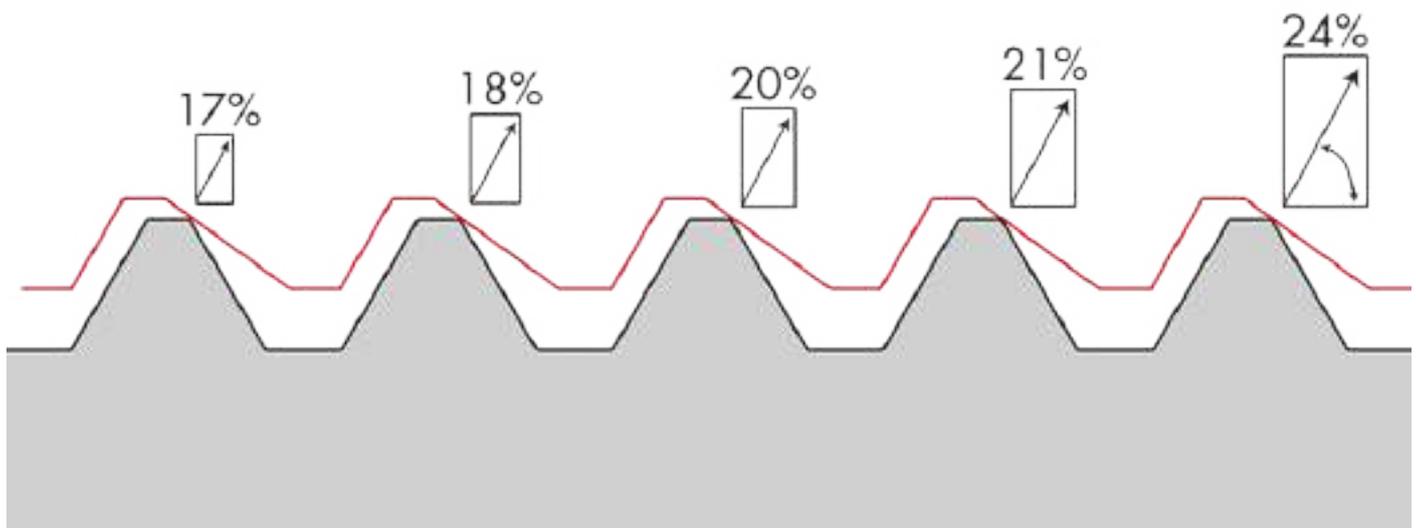

SCS certificate included.

La marca Micro-Safelock, registrada y protegida por DC SWISS, identifica las herramientas que se benefician del sistema Safelock que garantiza el conjunto de autobloqueo roscado, desarrollado y patentado por DC SWISS.

Para diámetros de menos de 1.5 mm, los requisitos para la tolerancia de roscado interior y exterior son tales que el método convencional de producción y medición no permite la producción industrial de componentes para conjuntos de tornillos asimétricos autobloqueantes convencionales.

Este microconjunto de rosca asimétrica autoblocante estándar para diámetros comprendidos entre 0.30 y 1.40 mm, que se adhiere a las tolerancias inherentes a las roscas de micro-tornillos, ha sido diseñado y patentado bajo el nombre de Micro-Safelock. Ofrece un rendimiento excepcional en cuanto a resistencia a golpes y vibraciones, basado en la tecnología utilizada para montajes de mayor escala e integrando completamente el gradiente de 30° en la rosca interior (tuerca), facilitando el montaje del tornillo.

Cuando se aplica el par de apriete, la fuerza de tracción ejercida sobre el tornillo lo fuerza a autocentrar, y los puntos del perfil del tornillo entran en contacto con los bordes del perfil asimétrico de la rosca interior del tornillo (pendiente), lo que conduce a un contacto tangencial y a una distribución regular de la carga en todos los hilos.

Reducir la carga en las primeras vueltas de la rosca y dirigir la tensión hacia la compresión del tornillo reduce significativamente la fatiga experimentada por el conjunto tornillo / tuerca, lo que permite montarlo y desmontarlo en numerosas ocasiones sin cambiar sus características.

Para corresponder a los requisitos dimensionales, el núcleo del tornillo se ha reforzado ampliamente en comparación con una rosca tipo NIHS o M de 60° de la misma dimensión.

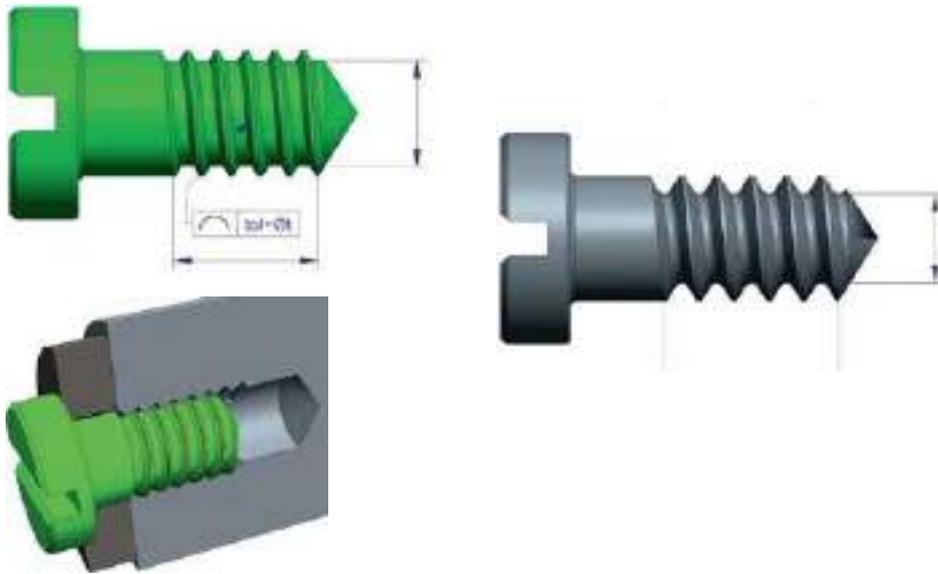

La longitud del paso se ha reducido en comparación con la norma NIHS con el fin de aumentar el área de contacto entre los dos elementos de fijación, manteniéndose igual la longitud útil. Evidentemente, esto ofrece ventajas considerables, especialmente cuando se trabaja con materiales blandos y tornillos de cabeza pequeña con una longitud de rosca reducida.

LAS VENTAJAS DEL AUTOBLOQUEO

- Distribuye la fuerza de tracción a lo largo de toda la longitud de la rosca del tornillo
- Par de bloqueo nominal hasta un 25 % menor que el de un conjunto convencional
- Completamente mecánico, sin aditivos químicos

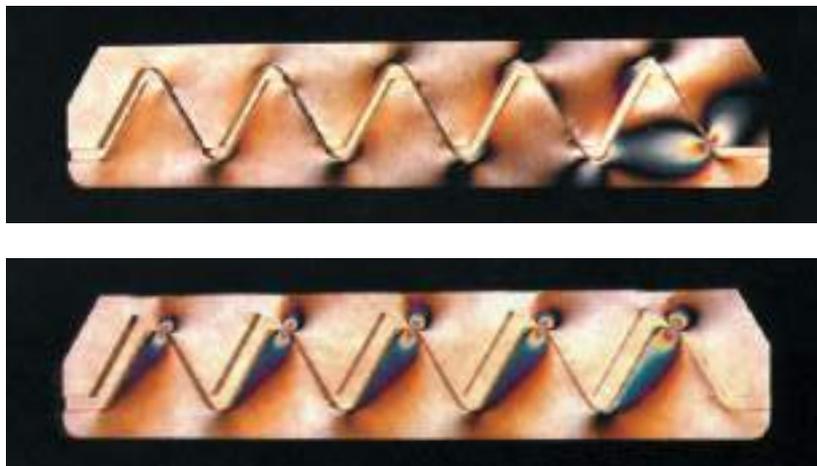

LAS VENTAJAS DEL TORNILLO

- Rosca de tornillo con tolerancias adaptadas a los requisitos, lo que permite un contacto ininterrumpido entre tornillo y tuerca
- Paso fino, aumentando la superficie en contacto con la tuerca para la misma longitud de rosca
- Mejor resistencia a la tracción gracias a un diámetro interior del perfil un 19 % mayor (más del 40 % en sección)
- Múltiples montaje / desmontaje sin cambios en las propiedades mecánicas

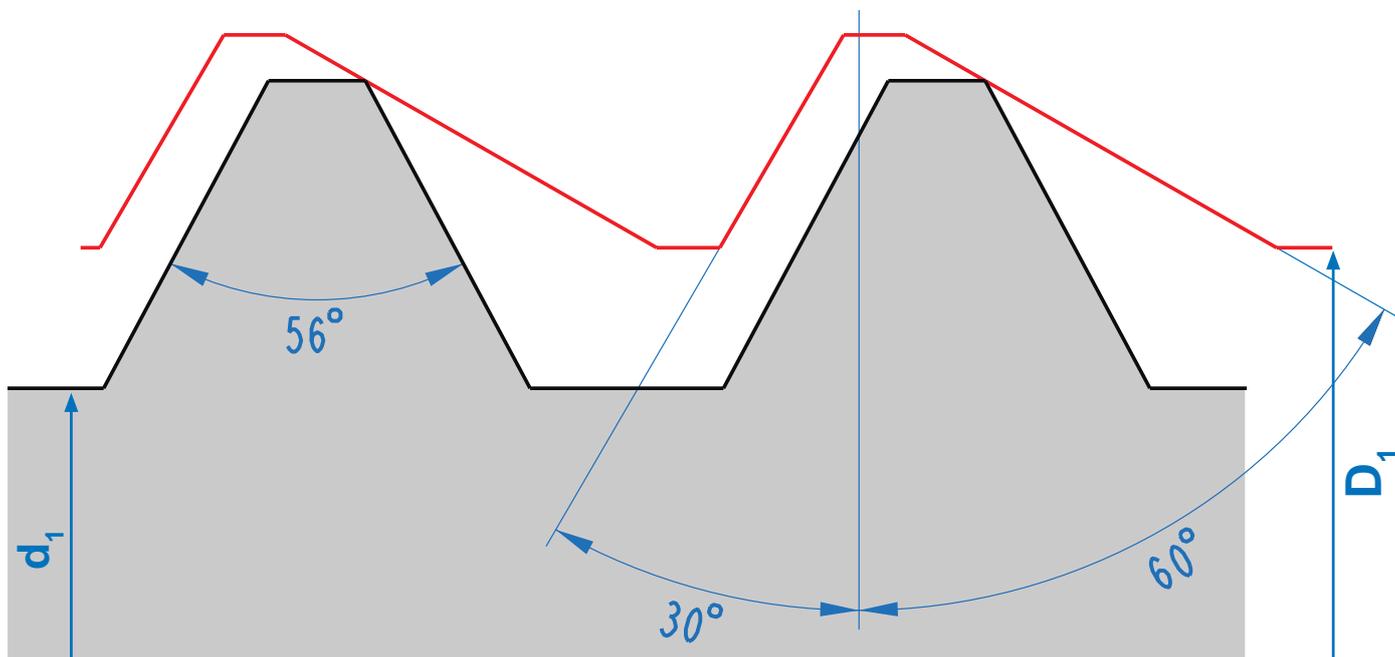

Las numerosas pruebas de resistencia al impacto que se han llevado a cabo muestran claramente que los conjuntos roscados son totalmente fiables y ahora ofrecen una respuesta creíble a los problemas que afectan a la resistencia de los tornillos.

Los pares de apriete aplicados a los tornillos muestra son un 25 % menores que los valores recomendados por los fabricantes de recubrimientos químicos para "bloqueo de roscas".

MICRO SAFELOCK

The Micro-Safelock brand, registered and protected by DC SWISS, identifies the tools benefiting from the Safelock system guaranteeing the threaded self-locking assembly, developed and patented by DC SWISS.

For diameters of less than 1.5 mm, the requirements for the interior and exterior threading tolerance are such that conventional method for production and measurement do not permit the industrial production of components for conventional self-locking asymmetrical screw assemblies.

This standard self-locking asymmetrical threaded micro-assembly for diameters ranging from 0.30 to 1.40 mm, which adheres to the tolerances inherent in micro-screw threads, has been designed and patented under the name of Micro-Safelock. It offers exceptional performance in terms of resistance to shocks and vibrations, based on the technology used for larger-scale assemblies and fully integrating the 30° gradient into the interior thread (nut), making it easier to assemble the screw.

When tightening torque is applied, the tensile force exerted on the screw forces it to auto-centre, and the profile points of the screw come into contact with the edges of the asymmetrical profile of the interior screw thread (gradient), thus leading to tangential contact and a regular distribution of load across all the turns of the thread.

Reducing the load on the first few turns of the thread and directing the stress towards compressing the screw significantly reduces the fatigue experienced by the screw/nut assembly, thereby making it possible to assemble and disassemble it numerous times without changing its characteristics.

To correspond to the dimensional requirements, the core of the screw has been amply reinforced compared with a 60° NIHS or M type thread of the same dimension.

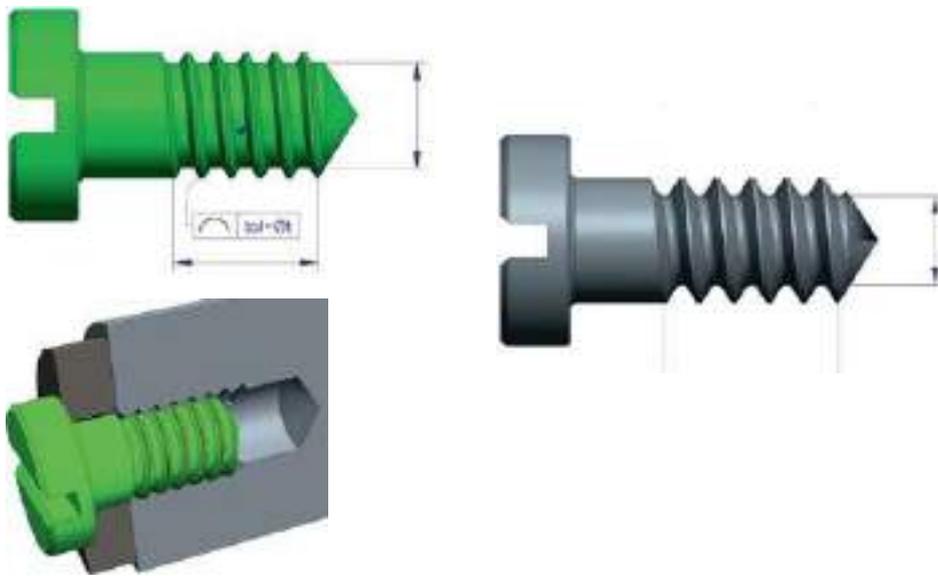

The length of the pitch has been reduced in comparison with the NIHS standard in order to increase the area of contact between the two fixing elements, with the usable length remaining the same. This obviously offers considerable advantages, particularly when working with soft materials and small-headed screws with a reduced thread length.

THE ADVANTAGES OF THE SELF-LOCKING

- Distributes the tensile force along the entire length of the screw thread
- Nominal blocking torque up to 25 % less than that of a conventional assembly
- Completely mechanical, with no chemical additives

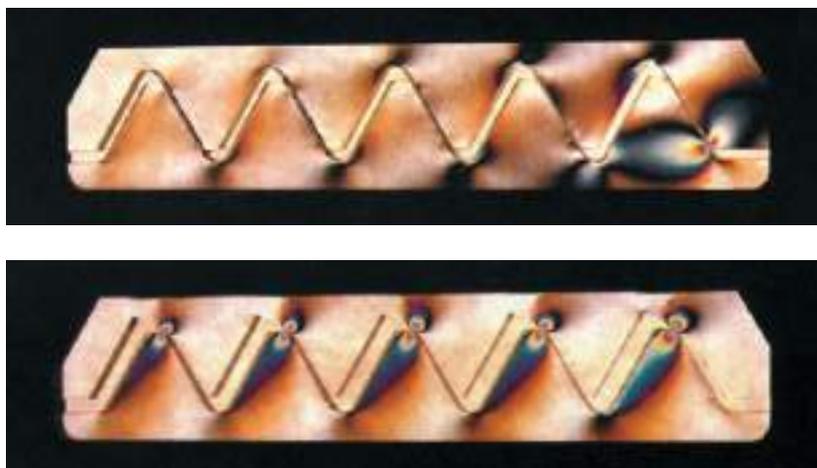

THE ADVANTAGES OF THE SCREW

- Screw thread with tolerances tailored to meet requirements, enabling uninterrupted contact between screw and nut
- Fine pitch, increasing the surface in contact with the nut for the same length of thread
- Improved tensile strength thanks to an interior diameter of the profile that is 19 % greater (more than 40 % in section)
- Multiple assembly / disassembly with no change in mechanical properties

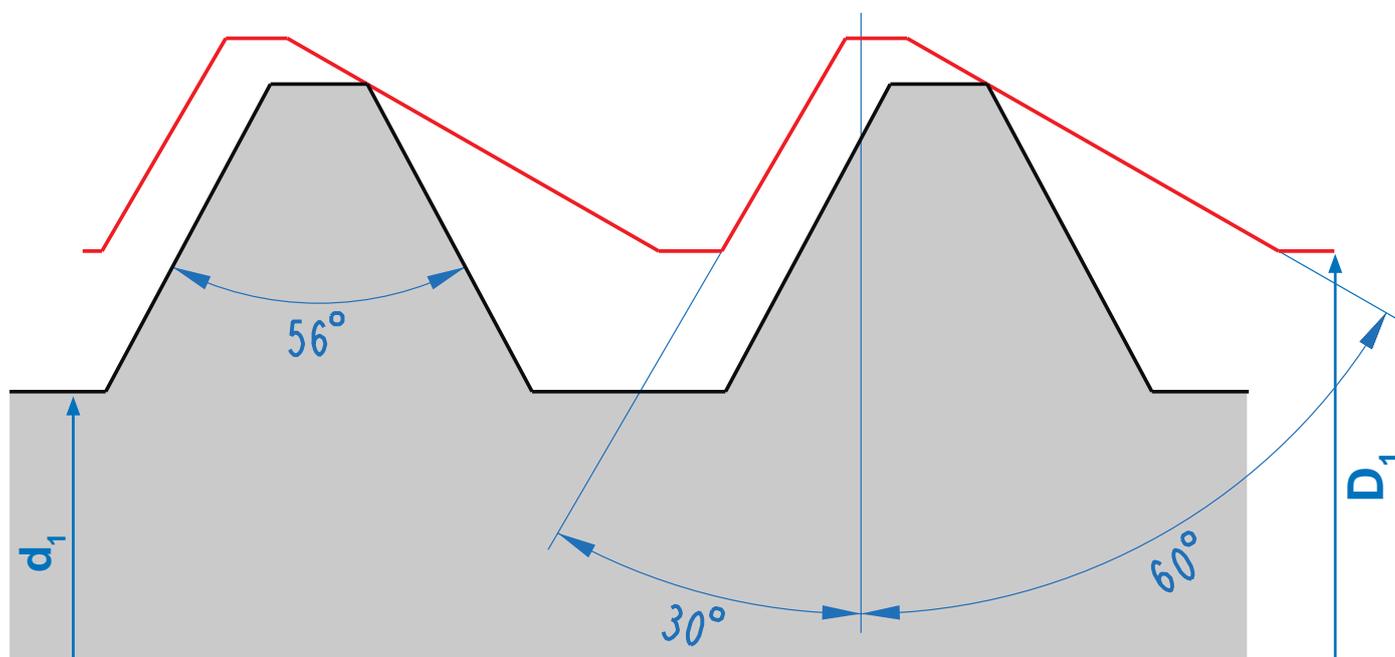

The numerous impact resistance tests that have been carried out, clearly show that the threaded assemblies are totally reliable and now offer a credible response to problems affecting screw resistance.

The tightening torques applied to specimen screws are 25 % less than the values recommended by manufacturers of chemical "threadlocking" coatings.

SAFELOCK DIMENSIONS AND STANDARDS

DESIGNACIÓN DE LAS TOLERANCIAS SEGÚN NORMA DIN EN 22857 PARA LOS MACHOS DE ROSCA MÉTRICA ISO

La norma DIN 802, parte 1, ha sido cambiada por la norma DIN EN 22857, conforme al modelo internacional.

La tabla comparativa siguiente informa de la relación entre las normas DIN EN 22857 y DIN 802, parte 1. El cambio más significativo se sitúa en la zona de tolerancia que se adapta a las nuevas categorías de utilización.

| Categorías de utilización de los machos según DIN EN 22857 | | Antigua norma DIN 802, parte 1. Categorías de tolerancias de los machos. | Zonas de tolerancias de roscado sobre la pieza | | | | |
|--|----------------|--|--|----|----|----|----|
| Denominación | Característica | | | | | | |
| Clase 1 | ISO 1 | 4H | 4H | 5H | - | - | - |
| Clase 2 | ISO 2 | 6H | 4G | 5G | 6H | - | - |
| Clase 3 | ISO 3 | 6G | - | - | 6G | 7H | 8H |
| | - | 7G | - | - | - | 7G | 8G |

Un periodo de transición debe ser previsto antes de la introducción definitiva de esas normas.

Las designaciones de tolerancias 7G / 8G y categoría "X" no figuran en la nueva norma DIN EN 22857. Por consiguiente, atenerse a la antigua norma DIN 802, parte 1.

TOLERANCE NOTATIONS TO DIN EN 22857 FOR TAPS WITH METRIC ISO THREADS

The standard DIN 802, part 1, has been withdrawn and replaced by DIN EN 22857.

The following chart gives a comparison between the standard DIN EN 22857 and the withdrawn standard DIN 802, part 1. An important change is the re-classification from tap tolerance classes to tap application classes.

| Application classes for taps to DIN EN 22857 | | Tolerance classes to withdrawn standard DIN 802, part 1 | Allotment of the tolerance zones of the nut thread to be cut | | | | |
|--|--------------|---|--|----|----|----|----|
| Name | Code | | | | | | |
| Class 1 | ISO 1 | 4H | 4H | 5H | - | - | - |
| Class 2 | ISO 2 | 6H | 4G | 5G | 6H | - | - |
| Class 3 | ISO 3 | 6G | - | - | 6G | 7H | 8H |
| - | - | 7G | - | - | - | 7G | 8G |

A suitable transition period is to be expected.

Codes for tolerance classes 7G / 8G and the "X" tolerance zones have not yet been standardised within DIN EN 22857 and the values from DIN 802 part 1 will continue to be valid.

ROSCA MÉTRICA ISO DIN 13

Otras combinaciones diámetro-paso

En caso de necesidad se admiten roscas con paso más pequeño que los indicados en el cuadro. Para estas roscas se calculan las medidas nominales y límites por adición o sustracción de la diferencia del diámetro nominal de esa rosca y de aquella con una rosca de paso deseada que figure en el cuadro. Por ejemplo se calculan las medidas nominales y límites de una rosca MF11 x 0.5 por adición de 5 mm a todas las medidas nominales y límites de la rosca MF6 x 0.5 del cuadro. Es ese caso las diferencias y las tolerancias no cambian. Lógicamente, para el diámetro de flancos, estas reglas son válidas solamente dentro de los límites de la gama de diámetros siguiente:

| | | | | | |
|---------|----------|---------|-----------|--------|----------|
| de 0.99 | a 1.4 mm | de 5.6 | a 11.2 mm | de 45 | a 90 mm |
| de 1.4 | a 2.8 mm | de 11.2 | a 22.4 mm | de 90 | a 180 mm |
| de 2.8 | a 5.6 mm | de 22.4 | a 45.0 mm | de 180 | a 355 mm |

Other diameter/pitch combinations

The nominal and tolerance values of other metric ISO threads not listed in this chart can easily be established for threads of the same pitch by the addition or subtraction of the difference in the nominal diameter: E.G. the nominal and tolerance values for an MF11 x 0.5 thread are obtained by simply adding 5 mm to the values for the thread MF6 x 0.5. However, this rule only applies within the following diameter ranges:

| | | | | | |
|-----------|-----------|-----------|------------|----------|-----------|
| over 0.99 | to 1.4 mm | over 5.6 | to 11.2 mm | over 45 | to 90 mm |
| over 1.4 | to 2.8 mm | over 11.2 | to 22.4 mm | over 90 | to 180 mm |
| over 2.8 | to 5.6 mm | over 22.4 | to 45.0 mm | over 180 | to 355 mm |

OBSERVACIONES INTERESANTES PARA ROSCAR

Las condiciones óptimas de utilización permiten reducir el tiempo de fabricación, así como optimizar el rendimiento.

Elección eficaz del macho La elección de un macho de roscar o de un macho de roscar por laminación es dependiente del material y de sus características.

Es admitido que los materiales con un alargamiento a la rotura de mínimo 10 % pueden ser deformados en frío.

Para una elección óptima de machos de roscar, ver nuestras tablas de utilización.

Taladrado

— Los agujeros taladrados deben estar limpios y sin virutas.

— Los diámetros de taladro son a escoger según la norma, extraída en la parte técnica de este catálogo, y según los problemas de roscados, alternarse a la parte superior del campo de tolerancia.

Lubricación Centro de mecanizado

El lubricante utilizado en un centro de mecanizado es a menudo muy flojo para el roscado. Si no es posible de aumentar la concentración, se puede resolver el problema pasando por otros caminos, por ejemplo:

Lubricar solamente con el aditivo de emulsión

A. Un aparato de lubricación, mandado por la máquina, proyecta el aditivo en el taladro previo o sobre el macho.

B. Una bomba mandada por la máquina trae el aditivo desde un recipiente separado en el taladro previo.

Roscar de segunda operación

Esa solución permite la utilización de un lubricante ideal.

Velocidad de corte machos de roscar

La velocidad de corte tiene una gran influencia sobre la evacuación de las virutas y sobre la duración de vida del macho. Es rentable determinar la velocidad ideal ensayando.

Valor indicativo: ver tablas de utilización de este catálogo. La velocidad de corte debe ser adaptada a las características y al equipo de la máquina.

Consecuencia de una velocidad de corte inadaptada:

- soldaduras frías
- rotura de la entrada provocada por sobrecarga de los dientes
- roscas arrancadas
- duración de vida del útil insuficiente
- roscados fuera de tolerancia

OBSERVACIONES INTERESANTES PARA ROSCAR

Soldaduras frías

Cuáles son las razones que provocan las soldaduras frías?

- Velocidad de corte muy alta o muy baja
- Mala elección del macho de roscar
- Macho de roscar con una geometría inadaptada
- Lubrificante inadecuado al material
- Lubrificante en cantidad insuficiente
- Presión o tracción sobre el macho de roscar
- Taladro previo muy pequeño
- Pared del taladro previo rugosa
- Virutas de taladrar en el agujero previo
- Error de alineación
- Agujeros ovalados

Consecuencias de las soldaduras frías:

- roscas arrancadas
- duración de vida del útil insuficiente
- roscado rechazado
- rotura del macho de roscar
- piezas rechazadas

Montaje del macho

- La fijación del macho debe estar en el mismo eje que el agujero a roscar.
- Si la máquina no está perfectamente sincronizada (interpolación - avance/rotación), recomendamos utilizar un porta-machos de roscar que permita compensar la diferencia entre el avance y el paso del macho.

Porta-machos para roscar

Si la máquina no está perfectamente sincronizada (avance/rotación), el avance debe ser programado de 5 a 10 % inferior al paso. En ese caso se debe utilizar un porta-machos de roscar que permita compensar la diferencia entre avance y paso del macho.

Es importante que el muelle de extensión sea reglado de manera que no ejerza una fuerte tracción sobre el macho.

El muelle de compresión es reglado de manera que el macho entre comprimiendo el muelle máximo hasta $0.5 \times P$.

Notas importantes:

Una buena estabilidad de la máquina y del porta-machos es un factor importante para obtener un rendimiento óptimo.

Asegúrese de seleccionar la velocidad de corte correcta.

Asegúrate de que se utiliza un refrigerante lubricante amplio cuando se da un golpecito.

INTERESTING HINTS FOR TAPPING

Optimum tapping conditions reduce effective machining times and increase tap life.

Selection of the most suitable tap

Which types of tap or whether or not a thread former can be used, depends on the type of material to be machined.

As a general guide, materials with an extension of at least 10 % can be cold-formed.

To determine the most suitable tap, refer to the DC application charts.

Core holes

—Core holes should be clean and swarf-free.

—Core holes should be of the prescribed size, see chart extract in the technical part of this catalogue, and dependent on the actual application, selected towards the upper diameter limit.

Lubricant in relation to machining centers

Frequently the coolants used on machining centers are insufficient for tapping because their percentage lubricant content is too low. If it is not possible to increase the percentage of lubricant in the emulsion, the lubrication problem can be solved in other ways, i.e.:

Lubricating with concentrated emulsion

- A. A lubricating unit, connected to the machine control, delivers at the required instant a specific quantity of concentrated emulsion into the core hole or onto the tap.
- B. A pump in a separate tank, controlled by the machine, delivers a specific quantity of concentrate into the core hole.

Tapping in separate operations

This procedure allows the use of the ideal tapping lubricant.

Cutting speeds for taps

The cutting speed has a great influence on chip flow and the life time of the tap. It is therefore worthwhile to establish the ideal cutting speed by tapping trials. Guide values see on the DC application charts.

The cutting speed should be in relation to the characteristics of the material to be performed, the machine and its equipment.

Effects of unsuitable cutting speeds

- forced tapping
- tap lead chipping caused by overloaded cutting tooth
- torn threads
- unsatisfactory tap life
- rejected threads

INTERESTING HINTS FOR TAPPING

Cold welding

What are the causes of cold welding?

- Cutting speed too high or too low
- Unsuitable tap selection
- Tap with non-adapted cutting geometry
- Coolant unsuitable for material
- Insufficient coolant
- Axial pressure (pull or push) on the tap
- Core hole too small
- Torn core hole walls
- Drill chips in the hole
- Centering error
- Concentricity error

Effects of cold welding:

- torn threads
- short tap life
- rejected threads
- tool breakage
- scrap workpieces

Tap fitting

- The tap must be clamped axially to the core hole.
- On non-synchronized machines (feed/speed), we recommend the use of a tapping spindle.

Tapping heads

With non-synchronized machine spindles (feed/speed) the feed rate should, as a rule, be programmed approx. 5 - 10 % lower than the thread pitch. In these cases a tapping chuck must be used which will compensate the difference between the feed rate and the thread pitch.

It is important that the tension spring in the axial compensation is set to a light rate to avoid axially loading the tap.

The compression spring, on the other hand, should be tensioned so that the tap starts to cut by compressing the spring at the most up to one half pitch.

Important hints:

A good stability of machine and equipment is a prerequisite for optimum quality and performance.

Ensure that the correct cutting speed is selected.

Make sure that ample lubricating coolant is used when tapping.

OPTIMIZACIÓN DE RENDIMIENTO DE MACHOS

| Problema | Causas | Remedios |
|-------------------------------------|---|---|
| Dientes del macho astillados | Virutas bloqueadas | Comprobar la velocidad de corte. Averiguar la elección del macho (K / N.62.-3 / Z.70VS). |
| | Macho tocando el fondo del agujero | Controlar la profundidad del taladro y del roscado. Taladrar más profundo. |
| | Irregularidades de las estructuras del material | Adaptar la velocidad de corte. Mejorar la calidad del lubricante. Usar un macho con otra geometría de corte u otro recubrimiento. |
| | Afilado incorrecto | Reafilarse el macho según los valores de origen del fabricante. |

| Problema | Causas | Remedios |
|---------------------|--|--|
| Uso excesivo | Velocidad de corte inadaptada | Elegir la velocidad correcta según el material trabajado. |
| | Lubricante inadaptado o en cantidad insuficiente | Asegurarse de la calidad del lubricante y averiguar que el líquido llega hasta el filo de corte. |
| | Superficie el agujero endurecido | Mejorar las condiciones de taladrar para que las paredes del agujero no estén endurecidas. Asegurarse de que la broca esté afilada. |
| | Sincronización | Comprobar el estado de la sincronización. Evite el roscado rígido en materiales con altas propiedades mecánicas. |

| Problema | Causas | Remedios |
|--------------------------|---|--|
| El macho se rompe | Mala elección del macho según el material trabajado | Verificar la elección del tipo de macho en relación con el material. |
| | Virutas | Adaptar la geometría a la profundidad de roscar. Adaptar la longitud de la ranuras si es necesario. |
| | Mala alineación | Asegurarse que el macho y agujero están perfectamente alineado en el mismo eje. |
| | Macho desgastado | Utilizar siempre los machos bien afilados. Proteja bien los machos en el momento del almacenamiento. |
| | Macho tocando el fondo del agujero | Utilizar un porta-machos con embrague (no es recomendado con máquina CNC) y compensación axial. |
| | Diámetro de taladro muy pequeño | Elegir el diámetro de taladro según tabla en la parte técnica de este catálogo. |

OPTIMIZACIÓN DE RENDIMIENTO DE MACHOS

| Problema | Causas | Remedios |
|---------------------------|--|--|
| Roscado muy grande | Mala elección del macho (geometría de corte no adaptada al material) | Verificar la elección del tipo de macho en relación con el material. |
| | Mala alineación | Asegurarse que el macho y agujero están perfectamente alineados en el mismo eje. |
| | Soldaduras frías | Asegurarse de la calidad del lubricante y averiguar que el líquido llega hasta el filo de corte. Adaptar la velocidad de corte. Analizar si es necesario un tratamiento o recubrimiento. |
| | Macho reafilado (la entrada cónica no es concéntrica) | Reafilarse la entrada del macho sobre una máquina rectificadora en perfecto estado de uso. |

| Problema | Causas | Remedios |
|----------------------|--|---|
| Error de paso | Mala elección del macho (geometría de corte no adaptada al material) | Verificar la elección del tipo de macho en relación con el material. |
| | Avance del porta-machos y velocidad de rotación mal sincronizada | Controla la programación o el paso del husillo patrón. Utilizar un porta-machos de roscar con compensación axial o un mandril de roscar con amortiguador axial. |
| | Sincronización | Comprobar el estado de la sincronización. Evite el roscado rígido en materiales con altas propiedades mecánicas. |
| | Macho con entrada en hélice utilizado con presión axial floja | Aumentar la presión de entrada. |

| Problema | Causas | Remedios |
|----------------------------------|-------------------|--|
| Entrada de la rosca ancha | Avance incorrecto | Utilizar un porta-machos de roscar con compensación axial. |

| Problema | Causas | Remedios |
|--|--|---|
| Mal estado superficie de la rosca | Mala elección del macho (geometría de corte no adaptada al material) | Verificar la elección del tipo de macho en relación con el material. |
| | Macho desgastado | Cambiar o afilar el macho. |
| | Afilado incorrecto | Reafilarse el macho verificando que la geometría de corte y el diámetro de entrada están adaptados al material trabajado. |
| | Lubricante inadecuado o en cantidad insuficiente | Asegurarse de la calidad del lubricante y averiguar que el líquido llega hasta el filo de corte. |

APPLICATION AND USE OF THREADING TAPS

| Problem | Causes | Solutions |
|--------------------------------|---|--|
| Partial chipping of tap | Swarf jamming | Check cutting speed. Use alternative tap type (K / N.62.-3 / Z.70VS). |
| | Tap hits bottom of core hole | Check hole and thread depths. Drill core hole deeper. |
| | Irregular workpiece material structure | Adjust cutting speed. Improve lubricating quality of coolant. Use tap with other cutting geometry / other coating. |
| | Tap incorrectly re-ground (lead-in diameter too small, therefore too few cutting teeth) | Ensure that original values are maintained when re-grinding. |

| Problem | Causes | Solutions |
|---------------------------|--|---|
| Excessive tap wear | Incorrect cutting speed | Adjust cutting speed to suit workpiece material. Use tap with recommended surface coating. |
| | Coolant lacking in lubricating qualities and / or quantity | Ensure the use of a suitable coolant and an ample supply. Check that coolant is reaching the cutting zone. |
| | Surface of the core hole is compacted | Check core hole drilling conditions (drill carefully to reduce risk of surface compacting). Check drill cutting edges. |
| | Synchronization | Check status of synchronization. Avoid rigid tapping in materials with high mechanical properties. |

| Problem | Causes | Solutions |
|---------------------|--|---|
| Tap breakage | Incorrect tap in use (cutting geometry unsuitable for application) | Use tap from the relevant material group. |
| | Bad swarf evacuation | Adapt cutting geometry to the depth to be tapped. Adapt length of flutes if necessary. |
| | Centering error | Ensure that axes of tap and core hole are aligned. |
| | Blunt tap | Re-grind tap. Ensure that taps are carefully stored. |
| | Tap has reached bottom of the core hole | Use tapping spindle with axial float and slipping clutch. |
| | Core hole too small | Select core hole as per chart in the technical part of this catalogue. |

APPLICATION AND USE OF THREADING TAPS

| Problem | Causes | Solutions |
|-----------------------------|--|---|
| Tapped hole oversize | Incorrect tap in use (cutting geometry unsuitable for application) | Use tap selected from the relevant material group. |
| | Faulty alignment | Ensure that the tap is correctly aligned with the core hole axis. |
| | Cold welding | Improve lubrication and direction of coolant. Adjust cutting speed. Use taps with recommended surface treatment or coating. |
| | Re-ground tap (lead-in is not concentric) | Re-grind tap lead correctly on a suitable tap grinding machine. |

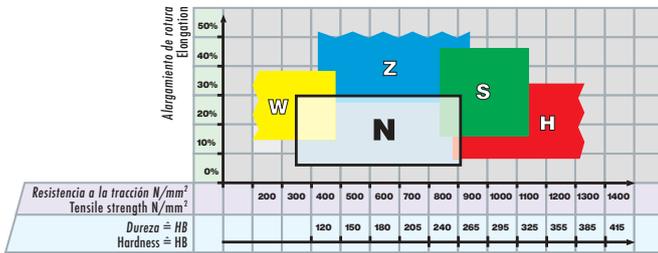

| Problem | Causes | Solutions |
|-------------------------|---|--|
| Stripped threads | Incorrect tap in use (cutting geometry incorrect for application) | Use a tap from the relevant material group. |
| | Spindle speed and feed rate not synchronized | Check feed rate programming and / or pitch of leading spindle. Use a tapping spindle with axial float or a tapping chuck with axial shock absorber. |
| | Synchronization | Check status of synchronization. Avoid rigid tapping in materials with high mechanical properties. |
| | Insufficient start pressure exerted on tap with peeling-cut | Increase start pressure. |

| Problem | Causes | Solutions |
|---------------------------------|---|---|
| Bell mouthed tapped hole | Incorrect start pressure applied to tap | Use a tapping spindle with axial float. |

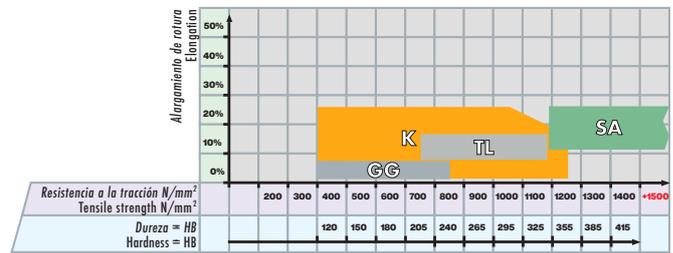

| Problem | Causes | Solutions |
|---|--|--|
| Unsatisfactory thread surface finish | Incorrect tap in use (cutting geometry unsuitable for application) | Select tap from the relevant material group. |
| | The tap is blunt | Replace or re-grind tap. |
| | Tap badly re-ground | Re-grind tap again. Check that cutting geometry is suitable for material. |
| | Coolant lacking in lubricating qualities and / or quantity | Ensure the use of a suitable coolant and an ample supply. |

SUPLEMENTOS DE PRECIO — PRICE SUPPLEMENTS

Posibles modificaciones de los machos estándar en blanco

Precio y plazo de entrega a petición

Modificación del ángulo de desprendimiento (desde \varnothing 5 mm)
Acondicionamiento de vanguardia ($\varnothing \leq 52$ mm)
Alargar la entrada (desde \varnothing 2.5 mm)
Acortar la entrada (desde \varnothing 2.5 mm)
Afilar la entrada en helice (desde \varnothing 5 mm)
Modificación de l_3 , d_2 , a o d_4
Alargando las ranuras ($\varnothing \geq 5$ mm - ≤ 48 mm)
Quitar la punta de centrado ($\varnothing \geq 1$ mm - ≤ 12 mm)
Alternar los dientes (a partir de un paso de 0.5 mm)
Truncar las roscas (desde \varnothing 3 mm)
La superficie de Grind Weldon ($\varnothing \geq 6$ mm - ≤ 16 mm)
Lubricación interna con salida frontal ($\varnothing \geq 3$ mm - ≤ 25.4 mm)
Lubricación interna con salidas radiales ($\varnothing \geq 3$ mm - ≤ 25.4 mm)
Plasma Nitrurado + tratamiento superficial "V"
Tratamiento superficial DC "V"
Revestimiento: TiN, TiCN, VS, CrN, HL, etc.
Marcaje suplementario
Acortando la parte de la broca espiral (N5951-SP; N5952-SP)

Por supuesto, también fabricamos herramientas de roscado específicas para el cliente según su dibujo. Precio y plazo de entrega a petición.

Possible modifications of non-coated and non-surface treated standard taps

Price and delivery time on request

Modification of cutting angle (from \varnothing 5 mm)
Conditioning of cutting edges ($\varnothing \leq 52$ mm)
Lengthening of chamfer (from \varnothing 2.5 mm)
Shortening of chamfer (from \varnothing 2.5 mm)
Grinding of peeling cut (from \varnothing 5 mm)
Modification of l_3 , d_2 , a or d_4
Lengthening of flutes ($\varnothing \geq 5$ mm - ≤ 48 mm)
Removal of center point ($\varnothing \geq 1$ mm - ≤ 12 mm)
Interrupted thread (from pitch 0.5 mm)
Truncated thread (from \varnothing 3 mm)
Grinding the Weldon Surface ($\varnothing \geq 6$ mm - ≤ 16 mm)
Internal coolant, with frontal outflow ($\varnothing \geq 3$ mm - ≤ 25.4 mm)
Internal coolant, with radial outflow ($\varnothing \geq 3$ mm - ≤ 25.4 mm)
NV-Plasma nitriding + "V" surface treatment
DC "V" surface treatment
Coatings: TiN, TiCN, VS, CrN, HL, etc.
Additional marking
Shortening of drill section (N5951-SP; N5952-SP)

**Of course we also produce customised threading tools as per your drawings.
Price and delivery time on request.**

CONDICIONES DE ENTREGA

| | |
|--|---|
| Pedidos | <p>Los pedidos que no puedan ser entregados de stock serán confirmados. Los artículos que ya no están en stock, pero todavía mencionados en el catálogo serán considerados como ejecuciones especiales y facturados como tales. Toda anulación de pedido debe ser aceptada por las dos partes y formulada por escrito.</p> |
| Ofertas y confirmaciones de pedidos | <p>Dado el constante desarrollo en la materia, las descripciones que figuran en nuestras ofertas, los documentos que las acompañan, las indicaciones de peso, medidas, ilustraciones y dibujos tienen carácter de indicaciones aproximadas. Estas informaciones tienen carácter obligatorio solamente en caso que éste último se especifique expresamente.</p> |
| Precios | <p>Nuestros precios implican entregas libres de gastos salida de fábrica o punto de venta y no comprenden gastos de embalaje, flete, portes ni seguros. En caso de aumento de precios, nos reservamos el derecho de facturar las herramientas confirmadas a los nuevos precios.</p> |
| Forma de pago | <p>Las facturas se pagan a los 30 días. En caso de incumplimiento de dicho plazo, un interés moratorio, a contar desde el vencimiento y calculado sobre la base de la tasa de descuento del momento, podrá exigirse. Los gastos de reembolso, de emisión de letras, etc., son a cargo del comprador.</p> |
| Reserva de propiedad | <p>El material queda de nuestra entera propiedad hasta el pago íntegro del precio total, gastos complementarios incluidos.</p> |
| Envíos | <p>Las mercancías se remiten por cuenta y riesgo del cliente.</p> |
| Plazos de entrega | <p>Los plazos de entrega se calculan lo más justo posible pero a título indicativo. En caso de demora, ninguna reclamación será aceptada ni los pedidos podrán cancelarse por este motivo.</p> |
| Fabricaciones especiales | <p>Por razones técnicas de fabricación, nos reservamos el derecho de entregar un 15 % de más o de menos sobre las cantidades de herramientas especiales pedidas, o en pequeñas cantidades por 1 o 2 piezas.</p> |
| Garantía | <p>Las herramientas reconocidas por nosotros como defectuosas son reemplazadas, sin ninguna clase de compensación.</p> |
| Reclamaciones | <p>Toda reclamación deberá llegarnos en un plazo máximo de 2 semanas después de recibir la mercancía.</p> |
| Planos y croquis | <p>Nuestros planos, croquis y otros documentos presentados no pueden ser reproducidos, copiados, transmitidos o cedidos a terceros. Debido a la evolución técnica y a una eventual entrada en vigor de nuevas normas, las indicaciones que figuren en nuestros catálogos, planos y croquis pueden sufrir modificaciones y son por lo tanto hechas sin compromiso.</p> |
| Condiciones especiales | <p>En caso de fuerza mayor, interrupción parcial o total de nuestra explotación, nos reconocemos el derecho a rescindir todos o parte de nuestros compromisos de entrega.</p> |
| Jurisdicción | <p>Los litigios se someten a la justicia suiza y la jurisdicción de la cual dependen es Moutier (Suiza).</p> |

DELIVERY AND PAYMENT CONDITIONS

| | |
|--|--|
| Orders | Orders, which cannot be delivered from stock, will be acknowledged. Items, which do not belong any more to our standard programme, although still featured in the catalogue, will be invoiced as «specials». Orders may only be cancelled by mutual written agreement. |
| Quotations and acknowledgements | For reasons of constant development in this field, all descriptions mentioned in our quotations, annexed documents, weight indications, measurements as well as illustrations and drawings are approximate indications. These technical data have binding value only if expressly specified. |
| Prices | Our prices are quoted for deliveries ex works Malleray, excluding VAT, packing, insurance, freight, customs' and legalisation duties. Should prices increase, we reserve the right to invoice tools already acknowledged at the new prices. |
| Payment | Payments must be made in advance or against irrevocable and confirmed documentary credit to be opened in our favour with a Swiss bank. All banking commissions and charges have to be borne by the buyer. |
| Right of ownership | We reserve the right of ownership of all goods supplied until the sales price, plus all incidental charges, have fully been paid. |
| Despatch | Deliveries take place at the purchaser's risk. |
| Delivery | Confirmed delivery dates are non-binding. We will do our utmost to maintain them. However, we cannot accept responsibility of direct or consequential losses due to delayed deliveries. |
| Special orders | For all special tools we reserve the right to over or under supply the ordered quantity by up to 15 %, or on small quantities by 1 or 2 pieces. |
| Guarantee | Tools recognised to be defective by DC will be replaced free of charge, but without prejudice. |
| Complaints | Complaints will be considered only within 15 days after receipt of the goods. |
| Drawings and sketches | The reproduction or transmission of drawings and other documents to a third party are prohibited. The information (drawings and prints) in our catalogue is for guidance only and is not binding. |
| Special conditions | In the case of partial or total disruption of our production; we reserve the right to partially or totally cancel our delivery commitments. |
| Tribunal | All disputes are subject to Swiss Law. The seat of court of law will be Moutier (Switzerland). |

SAS is a signatory of the multilateral agreements of the European co-operation for Accreditation (EA) for the fields of testing, calibration, inspection and certification of management systems, certification of personnel and certification of products, processes and services; of the International Accreditation Forum (IAF) for the fields of certification of management systems and certification of products, processes and services and of the International Laboratory Accreditation Cooperation (ILAC) for the fields of testing and calibration.

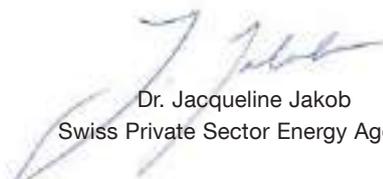

Certificate of the Swiss Private Sector Energy Agency

Voluntary Climate Protection and Energy Efficiency

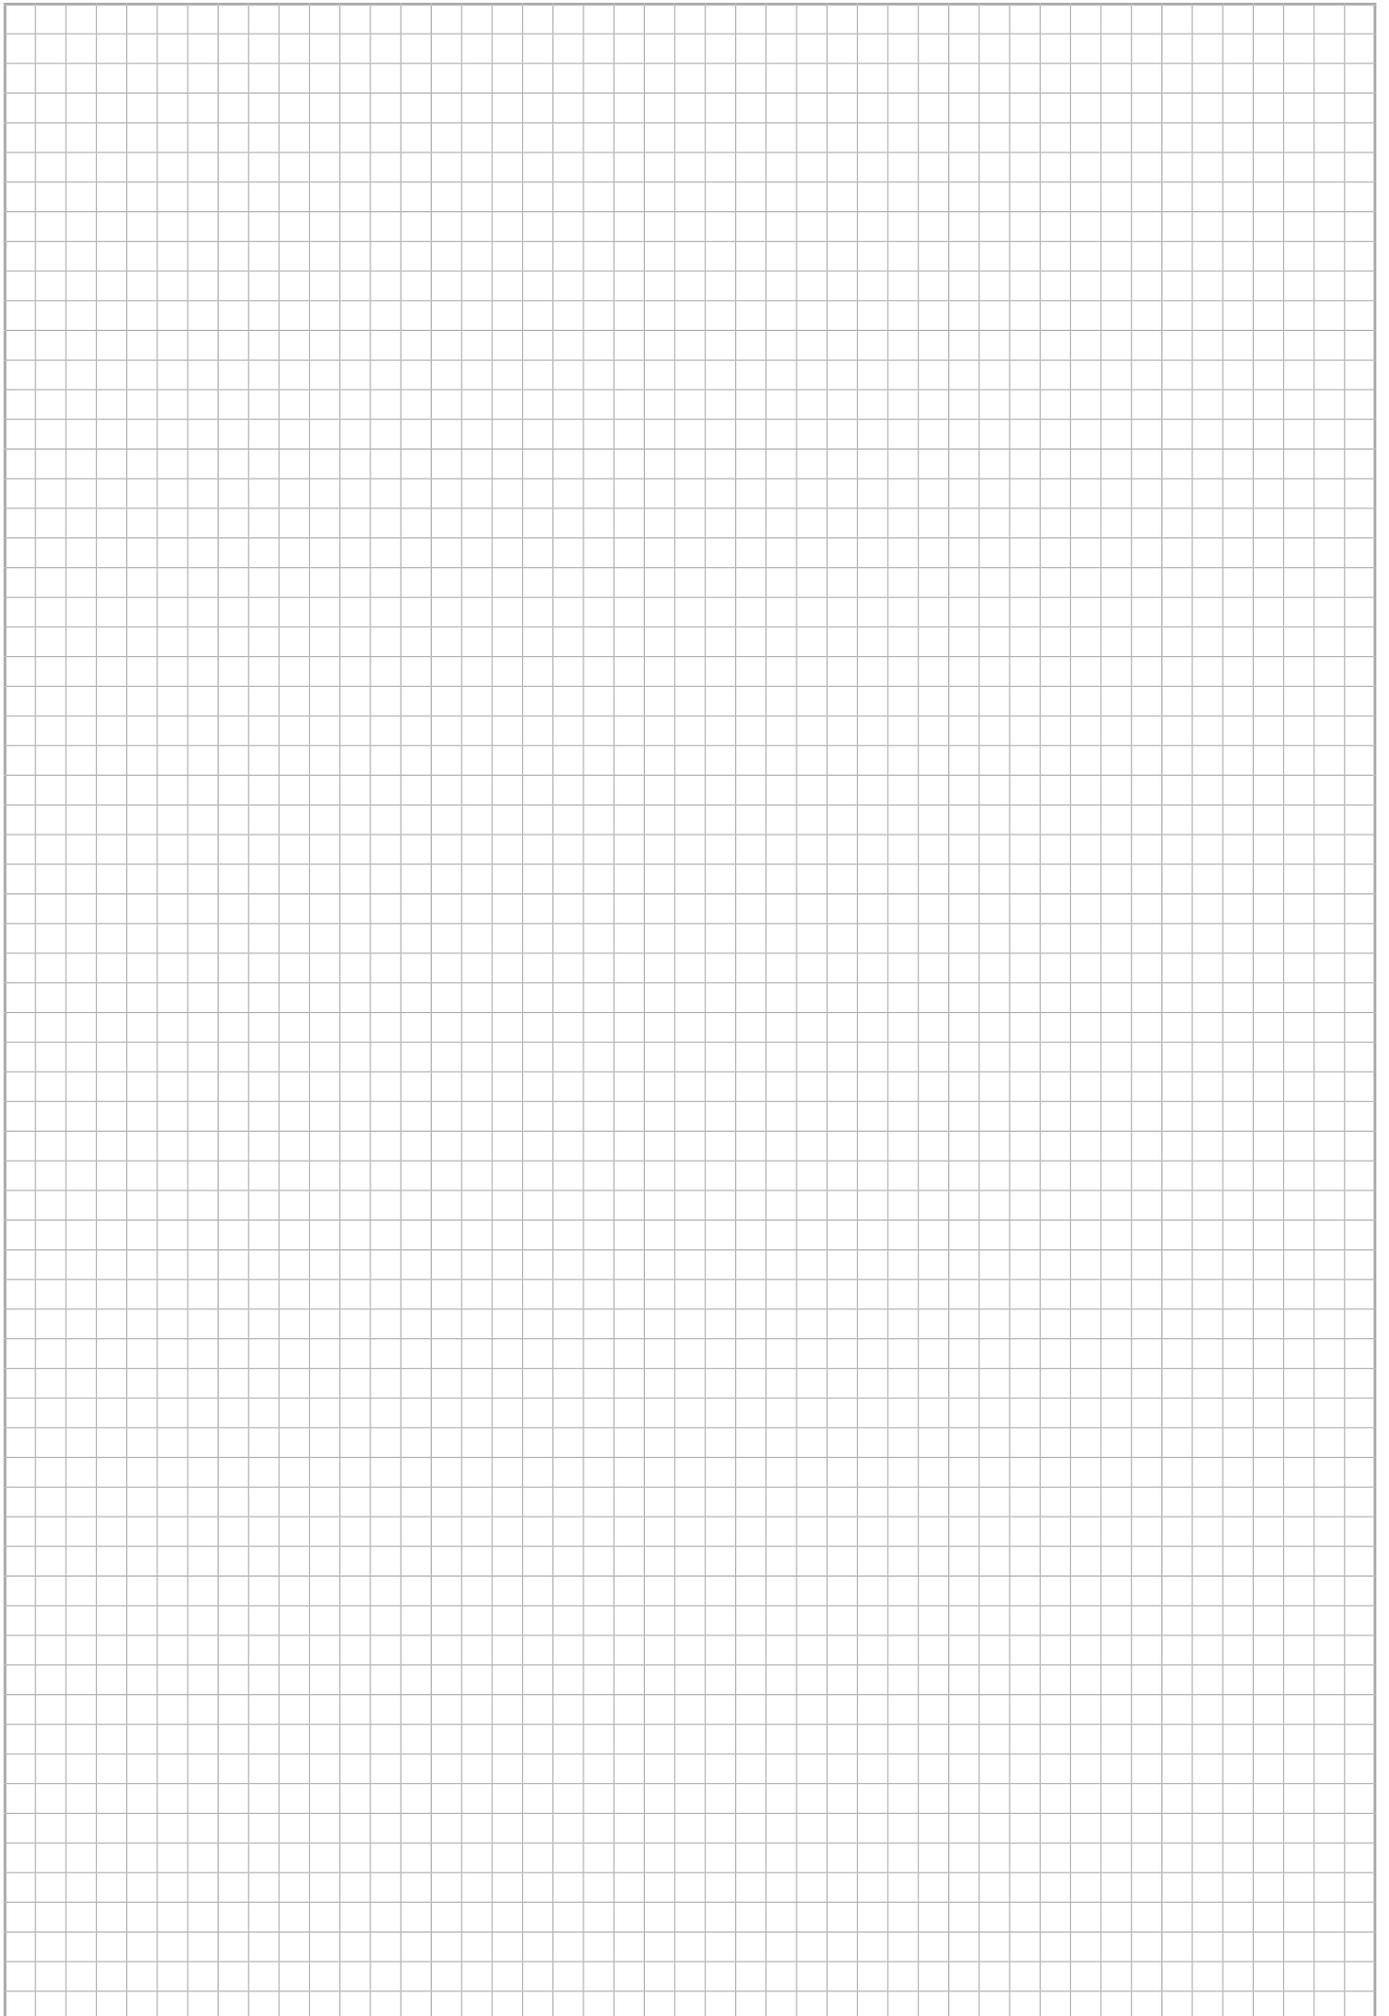

DC Swiss SA

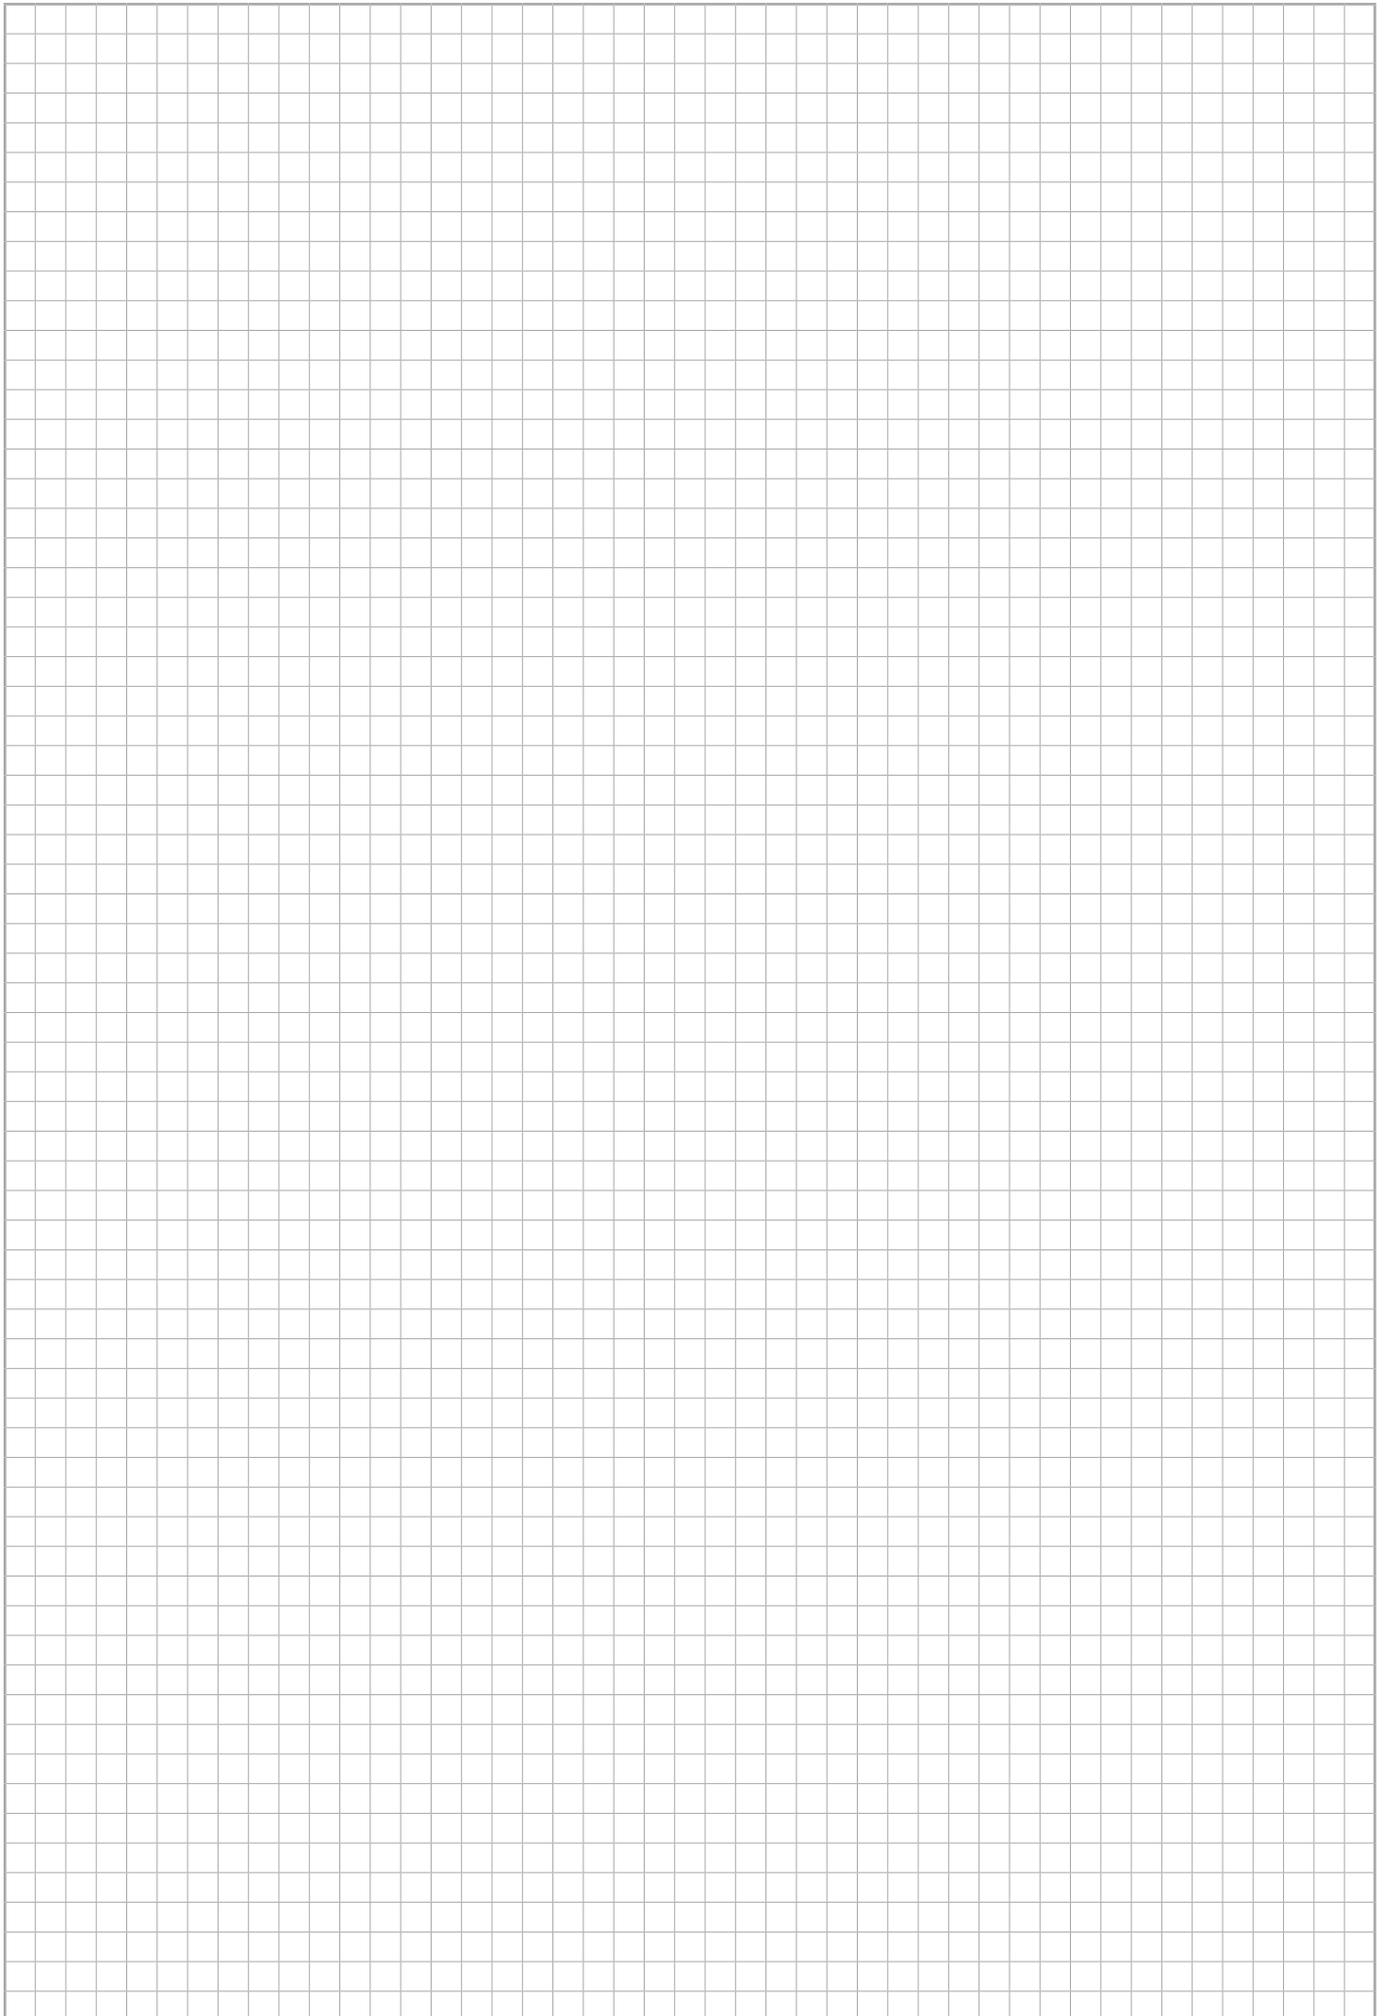

DC Swiss SA is convinced of the need to stand up for sustainable climate protection. By voluntarily declaring its adherence to the Swiss Private Sector Energy Agency programme, DC Swiss SA commits to actively reducing CO₂ emissions and optimizing energy efficiency. The Swiss Federal Government, cantons and private sector partners honor the target agreement.

ATENCIÓN

Un problema técnico o una negligencia pueden ser el origen que un herramienta se rompa parcial o totalmente, pudiendo afectar a la integridad física del operario. Es de obligado cumplimiento seguir escrupulosamente las normativas de seguridad y de salud de las empresas activas en el tratamiento de los metales. El uso de gafas de protección es indispensable.

El reafilado de útiles de roscado provoca partículas peligrosas para la salud y debe ser ejecutado según las instrucciones de seguridad necesarias.

WARNING

Thread tools can break or shatter either through technical failure or negligence, and can endanger the health of the operator. Always obey the safety and health regulations, also the wearing of safety glasses is compulsory.

The grinding of threading tools causes hazardous particles, and must be performed only under most rigorous safety standards.

Eventuales cambios de los datos técnicos, modificaciones de toda índole, errores de impresión, no dan en modo alguno derecho a indemnizaciones.

Las reproducciones de textos, imágenes o extractos están prohibidas.

We have made every effort to ensure that the information (drawings, prints, technical data) given is correct. However, we do not assume any responsibility for any errors, omissions or subsequent changes.

The reproduction of drawings and other documents and their transmission to a third party is prohibited.

La publicación de este nuevo catálogo anula y reemplaza todas las ediciones anteriores (excepto el catálogo TM.1)!

The publication of this catalogue renders all previous editions obsolete (exception: catalogue TM.1)!
