**FX-/GX-SERIES:** all model codes – 700 000km

# AN ISUZU 5-YEAR EXTENDED WARRANTY MAKES BUSINESS SENSE

BECAUSE YOU NEED TO KEEP BUILDING.

# WHAT ARE THE BENEFITS OF EXTENDING YOUR WARRANTY?

## Cost predictability

An extended warranty provides fleet owners with a predictable budget for maintenance and repairs. It covers the cost of

unexpected warranty repairs that may arise during the warranty period, reducing the financial burden on the fleet owner.

## Minimise downtime

Trucks are a crucial asset for fleet owners, and any downtime can result in significant revenue loss. With an extended warranty, repairs are often expedited,

minimising the time the truck spends off the road. This helps fleet owners maintain their operational efficiency and meet their delivery schedules.

## Manufacturer support

Opting for an extended warranty from the truck manufacturer or an authorised dealer ensures that repairs are performed by qualified

technicians using genuine parts. This can help maintain the truck's reliability, performance, and overall value over its lifespan.

## Long-term cost savings:

While there is a small upfront cost associated with purchasing an extended warranty, it can potentially save fleet owners money in the long run. The warranty coverage can offset the

expenses of major repairs, which can be significantly higher than the cost of the warranty itself. This can result in overall cost savings for the fleet owner.

## CLAIMING YOUR EXTENDED WARRANTY

At the point of purchase, you have the option to extend your new ISUZU truck's warranty from 2 to 5 years at a nominal payment\*. This once-off cost is dependent on the model selected:

### Nominal upfront payment of:

- R5000 for N-SERIES
- R7500 for F-SERIES

\*Maximum mileage limitations apply.

To ensure that your warranty remains valid, as the owner you need to ensure the following when it comes to the upkeep of your vehicle:

Adhere to the standard dealer service schedules

Use genuine ISUZU parts

There are **NO** mandatory parts replacement requirements other than during regular services with the ISUZU Extended Warranty.

**5 Years** seems insignificant in the lifetime of a truck, especially when it's **an Isuzu**.

But when you're **building for life**, a little added confidence goes a long way.
