Customer Satisfaction Is Our Priority

Dear Valued Owner,

Isuzu Motors South Africa (PTY) Ltd is committed to providing you with customer service of the highest standard.

Similarly, the dealer network is focused on delivering excellent customer service. You may therefore be contacted from time to time to ascertain your satisfaction with the Isuzu dealer you are currently utilizing.

Isuzu offers a comprehensive roadside assistance programme with a 24 hour help line in place, which is a free service for **two years** from date of sale of a new vehicle, unless an optional extended warranty is selected, in which case the road side assistance will be extended to **five years** or the **mileage as stipulated by the extended warranty**, whichever occurs first. Should you experience any problems - such as a breakdown, locking your keys in the vehicle, or running out of fuel - you may call our toll-free number **08600 47898 (08600 ISUZU)** if you are within South African borders, or **+27 (41) 403 2555** if you are outside South Africa, for immediate assistance. Please note that this service is only supported in South Africa, Namibia, Lesotho, Botswana and Eswatini.

Our dealers take pride in their standards and would like to be given the opportunity to resolve any problems you may experience. Should you have any queries or items of concern, the following process will ensure you receive the desired response. Explain your concern to your Dealership's Service Manager. Should your query not be resolved at this point, you should then ask to speak to the Dealer Principal / Managing Director of the Dealership.

We encourage you to always address your concern with the Dealer Principal first before you refer the matter to Isuzu Motors SA.

If your concern is not resolved by the Dealer Principal / Managing Director, it is suggested that you refer the matter to Isuzu Customer Care. Our toll-free contact number is **08600 47898 (08600 ISUZU)**, or if you are a customer outside the South Africa borders **+27 (41) 403 2555** or customercare@isuzu.co.za.

Your concern will then be logged and handled in conjunction with the Dealership concerned and every effort made to resolve it.

This Warranty and Service Guide booklet belongs to your vehicle and should therefore remain with the vehicle when you sell it. It contains the applicable warranty conditions for your vehicle, documentation on the service and maintenance work carried out and information required in the event of a breakdown. Please take this guide with you whenever you bring your vehicle to an Isuzu workshop for service or maintenance. Proof of all service checks and work carried out in accordance with the work specification is required before any warranty claims are to be met and is advantageous when selling the vehicle.

OPTIONAL EXTENDED WARRANTY PLAN

An optional extended warranty plan is available, increasing the standard new vehicle warranty coverage from 2 years (24 months) to 5 years (60 months). This extended warranty coverage expires upon reaching either the time limit or the mileage threshold outlined in the table below - whichever occurs first.

MODEL	N - Series (150/250/275)	N - Series (300/400/500)	F, G, FX, GX, & FYH - Series
MAXIMUM DISTANCE	345,000 km	500,000 km	700,000 km

Terms & service intervals

The vehicle's service & maintenance must be performed by an appointed Isuzu dealer at the stipulated service intervals to prolong the vehicle's life and to comply with the **extended warranty** plan. The vehicle owner must adhere to the service intervals stipulated for their particular vehicle's operating conditions. Refer to the owner's manual or alternatively consult your Isuzu dealer for more information.

The following are the terms and conditions for the **extended warranty** plan:

- The **extended warranty** plan is available at point of sale for vehicles sold, registered and operated in South Africa Customs Union markets.
- The vehicle must be serviced and maintained at an Isuzu dealer in accordance with its service schedule which can be obtained from any Isuzu dealer, or from the Isuzu website (<https://www.isuzu.co.za/complete-care/servicing>).
- Non-warranty wear-and-tear parts, as indicated on the extended warranty contract, must be replaced with genuine Isuzu parts by an appointed Isuzu dealer as and when required.
- Isuzu reserves the right to repair or replace any component under the extended warranty plan when a component proves to be defective.
- Any Isuzu approved or remanufactured part, replaced during the warranty period, will have warranty until the specific vehicle's warranty expires, or until the specific component's warranty period expires, whichever comes first.
- This optional extended warranty plan runs concurrently with any warranty imposed by law.
- The optional extended warranty plan is not available for **tipper** and **compactor** vehicle applications.
- The mileage coverage period for the optional extended warranty plan starts on the date on which the vehicle was first put into service as a new vehicle with zero kilometers.

GENERAL INFORMATION

Our Dealers

To locate your nearest Isuzu Truck Dealer, call our toll-free number **08600 47898 (08600 ISUZU)**. Alternatively, please visit the Isuzu SA website www.isuzu.co.za where you may use the dealer locator facility to find the dealer nearest to you or along any routes that your truck may travel.

Pre-Delivery Inspection

The pre-delivery inspection will ensure that your truck is delivered in perfect condition and properly prepared for use.

Owner's Identification Certificate

The selling dealer will fill in the information inside this service booklet. Keep this book in your truck and present it to any authorized Isuzu Truck Dealer in South Africa and adjacent territories which will entitle you, the owner, to receive service in accordance with the Isuzu Motors South Africa (PTY) Ltd policy.

Installation of Parts Furnished Under Warranty

Please note that warranty claims can only be processed through authorized Isuzu truck dealers. Parts supplied under the new vehicle warranty will be installed either by the selling dealer or, if the truck is away from its normal location, any authorized Isuzu truck dealer in South Africa and adjacent territories.

Product recalls

We care about peace of mind and when applicable, will send you a notification if your vehicle is subject to a recall. Once notified, it is your responsibility to ensure that the vehicle is attended to as soon as possible. Each vehicle is uniquely identified by the Vehicle Identification Number (VIN) found on the license disc or on the vehicle. For recall information, you can check our website <https://www.isuzu.co.za/ongoing-maintenance/field-action>, or call our Customer Care Centre with your VIN.

Service Schedules

Services performed by trained Isuzu dealer personnel at regular intervals will prolong the life of your truck. It is mandatory that you have the vehicle serviced at the intervals recommended by your Isuzu dealer. The service intervals are dependent on operating conditions, and more frequent service is required when the vehicle operates under severe operating conditions. Please refer to page 25 of this guide for more information on this. If your vehicle has a Service plan, the additional costs from more frequent servicing are not covered.

Supplementary Oil and Fuel Additives

Do not use supplementary fuel and oil additives in Isuzu vehicles. It could result in increased operating costs and component failure.

The lubricants, fuels and fluids recommended in the owner's manual meet the highest specification laid down by Isuzu Motors South Africa (PTY) Ltd for use under all operating conditions.

A stress-free experience should be like having one's own personal assistant a mere phone call away...

08600 47898 (08600 ISUZU toll free in South Africa or
+27 41 403 2555 for outside South Africa.

In the unfortunate event of a vehicle breakdown, we are committed to ensuring that you can still reach your destination as quickly and as safely possible. Please note that this service is only supported in South Africa, Botswana, Lesotho, Namibia and eSwatini.

Services Include:

Technical Assistance and thereafter towing as last resort:

In the event of a vehicle breakdown, we will arrange that either an Isuzu dealership technician or a Roadside Assistance technician be dispatched to your location to assist you with your vehicle concern.

Should the Isuzu Dealer technician or Roadside Assistance technician be unable to diagnose or repair your commercial vehicle, you will be assisted with best alternative arrangements.

Other Services:

- Safety at roadside (if you feel unsafe, a security vehicle will be dispatched, subject to availability).
- Safe overnight storage of vehicles where possible.
- Changing flat tyres (owner to provide wheel assembly required).
- Keys locked in car (owner pays for keys & programming when keys are lost or damaged).
- Fuel Assistance (owner pays for fuel supplied).
- Transmission of urgent messages to family members or employer, or assistance with directions
- Information services (closest dealer, filling station, vehicle warning systems, tyres).

NEW VEHICLE WARRANTY TERMS

SUZU Motors South Africa (Pty) Ltd as manufacturer, warrants each new truck and chassis, including all equipment and accessories thereon (except tyres and tubes) to be free from defects in material and workmanship under normal use and service subject to the exclusions stated below.

The manufacturer's obligation under this warranty is limited to repairing or replacing at its option any part or parts which shall be returned to an Isuzu authorized dealer at such dealer's place of business and which on examination shall disclose to the manufacturer's satisfaction to have been defective, provided that such return effected as follows:

- All Isuzu trucks carry a 2-year unlimited mileage warranty.
- If the owner opts for an extended warranty, the time and mileage coverage as stated on page 7 will apply.

The repair or replacement of defective parts under the normal 2-year warranty will be made by such dealer without charge for parts, and if made at such dealer's place of business, without charge for labour (If repairs are carried out after normal business hours a negotiable charge for overtime may be requested from the owner)

The provisions of this warranty shall not apply to any vehicle or chassis which has not been serviced in accordance with the Isuzu service schedule, or which has been subjected to misuse, negligence or an accident, or which has been loaded in excess of the manufacturer's recommended mass, or which has been repaired by anyone other than an Isuzu approved dealer or altered in any way so as, in the judgement of the manufacturer, to affect adversely its performance and reliability, nor to normal maintenance services (such as engine tune-up, fuel system cleaning and wheel, brake and clutch adjustments) and the replacement of service items (such as filters, brake and or clutch lining etc.) and or in connection with such services, nor the normal deterioration of soft trim and appearance items due to wear and exposure nor to special bodies, body conversions or equipment not manufactured or supplied by Isuzu Motors South Africa (Pty) Ltd.

This warranty expressly excludes liability for consequential damages caused by latent defects and is in lieu of any other warranties, expressed or implied, including any implied warranty of merchantability or fitness for a particular purpose, and of any other obligations or liability on the part of the Manufacturer, and Isuzu Motors South Africa (Pty) Ltd neither assumes nor authorizes any other person to assume for it any other liability in connection with such vehicle or chassis.

If the vehicle is resold prior to the expiration of its warranty, the balance of this warranty is transferable to the new owner.

.....
Customer's Signature:

What is covered?

Defects: This warranty covers any repairs needed to correct defects in material or workmanship.

Warranty	Distance	Time
Mechanical & Electrical	Unlimited	2-years
Corrosion	Unlimited	3-years

Warranty Begins: The warranty period begins on the date of sale of the vehicle to the original retail purchaser.

No Charge: Warranty repairs (parts and labour) will be provided at no charge. A reasonable time must be allowed after taking the vehicle to the dealer.

Warranty Application: This warranty is for vehicles registered and normally operated in the Republic of South Africa and adjacent territories.

What is not covered?

Tyres: Subject to warranty terms (see page 11).

Damage due to Accidents, Misuse or Alterations:

Accidents or damage from objects striking the vehicle, misuse of the vehicle, such as driving over kerbs, overloading, racing, modifications including performance enhancements to increase engine power output etc. Refer to **"New Vehicle Warranty Terms"** page 9.

Indirect Expenses: This warranty does not cover payment for the loss of the use of the vehicle during warranty repairs, lodging bills, car rentals, other travel costs or loss of income.

Damage from Environment: Airborne fallout (chemicals, tree sap, etc.), salt, hail, windstorm, lighting, etc.

Damage due to lack of Maintenance: Lack of proper maintenance as per the service schedules.

Maintenance: Cleaning, polishing, lubricants and filters, engine tune-up and replacing worn brake and clutch linings are some of the normal maintenance items which all vehicles require and are for the owner's account.

NEW VEHICLE WARRANTY TERMS

- Isuzu warrants each new vehicle, including Isuzu factory fitted equipment and accessories to be free from defects in material and workmanship under normal use and service subject to the exclusions stated below.
- The vehicle warranty is valid for 2 years and corrosion warranty is valid for a 3-year unlimited mileage period, from date of sale of the new vehicle with the following exceptions:
 - a) Tyres
 - i. For imported vehicles, tyres are covered for a period of 12 months for manufacturing defects only.
 - ii. For locally produced vehicles, the tyre manufacturer will cover the warranty on tyres for manufacturing defects only.
 - b) Batteries are covered for a period of 24 months for manufacturing defects only.
 - c) All trim items, driveshaft joints, exhaust system including catalytic converter, in-car entertainment and infotainment are warranted for a period of 80,000km or 2 years, whichever comes first.
- Any unexpired portion of the warranty period is transferable to the subsequent owner(s) without further reference to Isuzu, provided this warranty and service guide remains with the vehicle.
- Isuzu reserves the right to repair or replace any component under warranty, where the component proves to be defective.
- Any Isuzu approved or remanufactured part, replaced during the warranty period, will have warranty until the vehicle's warranty expires or as the specific component's warranty period expires, whichever comes first.
- Any damage or consequential damage which may occur when servicing the vehicle outside the Isuzu approved dealer network may void the warranty.
- This warranty runs concurrently with any warranty imposed by law.

When does the warranty coverage not apply?

This warranty does not cover damages or failures resulting directly or indirectly from any of the following:

- the vehicle has been used for competitions, races, rallies, record attempts or similar sports events or activities
- the vehicle or any parts thereof have been modified to increase vehicle performance
- accidents, alterations or misuse of the vehicle including overloading
- misuse of the vehicle by using it for a purpose it is not intended for
- installation of parts or accessories not approved by Isuzu Motors South Africa for the vehicle
- improper repairs
- altering or removing the vehicle identification number (VIN)
- tampering with, altering, or disconnecting the odometer
- any alteration to the vehicle which is not approved by Isuzu Motors South Africa
- the fuel tank has run empty on diesel powered vehicles, which allowed air to enter the fuel system
- failure to present the vehicle to an Isuzu approved dealer or body repairer, as applicable, as soon as a problem exists
- failing to present the vehicle to an Isuzu approved dealer for a scheduled service and corrosion inspection on time i.e., within 2000 km or 3 months either side of the stipulated 15,000 / 20,000 km interval or 12-month interval respectively
- lack of or improper maintenance including failing to service the vehicle at the stipulated service intervals as specified in the Isuzu service schedule
- use of lubricants which do not meet Isuzu specifications, fuel additives, contaminated or incorrect fuel or where contamination is from an external source
- damage or consequential damage caused by the actions or omissions of anyone other than an Isuzu approved dealer will not be covered.

NEW VEHICLE WARRANTY TERMS

Isuzu Recommends

- having maintenance services performed by an Isuzu approved dealer, as they are best equipped and trained to take care of your vehicle
- using only Isuzu genuine approved parts when you need to replace a part on your vehicle
- using only an Isuzu approved body builder for body conversions.

You are responsible for ensuring that your vehicle is operated and maintained according to the instructions in the owner's manual and this guide to ensure that your warranty coverage remains intact. Where servicing is not performed by an Isuzu approved dealer, you should keep detailed records of vehicle maintenance, since under some circumstances they may be required for warranty coverage. These records should include the date of service, mileage at time of service and a description of services performed, parts installed, and fluids and lubricants used. If you sell your vehicle, you should give your maintenance records to the new owner.

Warranty Exclusions

- Normal tyre wear or wear-out. Road hazard damage such as punctures and cuts resulting from pothole impact, kerb impact or from other objects and damage due to improper inflation, spinning, racing, misuse, negligence, alteration, vandalism or misapplication.
- Normal wear and tear items (for example brake linings, drums disc and disc pads, clutch and pressure plates, release bearings, wiper blades, auxiliary drive belts, timing belts and poly-v belts, interior and exterior trims, moldings, weather strips, seat and backrest covers, floor coverings, glass breakage due to external influence, key FOB or remote-control batteries).
- Incidental or consequential costs associated with a warrantable condition such as lodging, car hire and loss of property or income.
- The cost of scheduled servicing, non-scheduled servicing due to severe operating conditions, consumable items such as filters, gaskets, air conditioner refrigerant and fluids like oil, coolant, and brake fluid.
- Damage caused by airborne fallout, chemicals, tree sap, stones, hail, earthquakes, water or flood, windstorms, lightning, the application of chemicals or sealants subsequent to manufacture.
- Damage to the fuel injection system and engine caused due to the use of poor quality or contaminated fuel (dirt, water, paraffin etc.).

- Any other components non-warranty related or that has failed through normal or fair wear and tear.

I acknowledge that I have read and understood the warranty terms which have been clearly explained by the dealer. I understand that the owner's manual contains important information regarding the safe and efficient use of the vehicle and possible risks of accident and injury that may result from improper use of the vehicle.

Policy On Tyres

In view of the abnormal stresses and strains to which tyres and tubes are or may be subjected, local tyre manufacturers stipulate that they make no representation whatsoever and give no guarantee against latent or patent defects, or in any other manner whatsoever in respect of products manufactured, sold or supplied by them and all conditions and warranties whatsoever, whether statutory, implied or otherwise are expressly excluded.

It is an express condition subject to which persons are given permission to use and sell the patented or branded goods of such manufacturers that a manufacturer will be under no liability, whether in contract or in delict for any injury, loss or damage to any person or property, by or arising out of the use of such goods.

A manufacturer is prepared to give the most sympathetic consideration to any complaint as to either manufacture or workmanship and if, in its sole discretion, it concludes that such a complaint is justified, it will be prepared to deal with the same.

The tyre manufacturers further stipulate that no person shall advertise or issue any guarantee in connection with the sale of their patented or branded goods in any form that differs in effect from the foregoing, or that conveys any greater benefit or obligation than that set out above.

It is for these reasons that Isuzu Motors South Africa (PTY) Ltd must exclude tyres and tubes from its warranty.

Policy On Rust & Corrosion

In the event of body corrosion occurring during the period of the warranty, or up to a maximum of thirty-six (36) months from the original date of sale, the corrosion will be rectified. The cost to rectify the corrosion will be at Isuzu Motors South Africa (PTY) Ltd.'s discretion and will either be absorbed in full by Isuzu Motors South Africa (PTY) Ltd, or on a participation basis, i.e. 50% or 70% etc. depending on how well the vehicle has been maintained and cared for.

At the discretion of Isuzu Motors South Africa (PTY) Ltd, the repair or replacement of defective parts will be carried out in accordance with accepted commercial standards.

Claims in respect of corrosion will not be entertained in the following circumstances:

1. If the corrosion is attributable to or is in respect of external or mechanical damage (including stone damage), or industrial pollution or chemical action.
2. If repairs and maintenance of the vehicle have not been done by an authorised Isuzu Truck Dealer/Agent.
3. If, when the corrosion has been detected, there is a delay in lodging the claim, i.e. body panels allowed corroding to the point where large areas are affected.
4. If any form of aftermarket rust proofing has been applied, e.g. extended rust warranty contract

It is mandatory that vehicles be thoroughly inspected for signs of corrosion at every service. Dealer records substantiating that these inspections have been performed must be maintained.

If corrosion is detected, the affected area must be repaired within thirty (30) days of detection. Only genuine Isuzu parts/panels may be used. All body repairs must be performed by an approved Isuzu authorized body repairer.

<https://www.isuzu.co.za/isuzu-authorized-body-repairers>

Transfer of rust / corrosion warranty is the same as for the new vehicle warranty.

COLLISION & BODY REPAIRS

An accident or damage to your vehicle is always unfortunate for everybody involved, no matter whose fault it is. If you are involved in an accident or sustain damage to your vehicle, please refer to the information below that will help you to ensure that you and your ISUZU are back on the road as quickly and safely as possible.

Your insurance company may pay for the repair, but you need to be satisfied that the repair is done well and with the best quality parts, to ensure your vehicle remains in the best and safest condition, and that any repairs done do not adversely affect, void or violate the terms of your ISUZU vehicle warranty.

ISUZU AUTHORISED BODY REPAIRERS

Your insurer may have recommended repairers; however, you have the final say in where your vehicle is repaired. Always ask for an ISUZU Authorised Body Repairer to ensure that those repairing your vehicle are experts authorised to repair ISUZU vehicles under warranty, using only ISUZU Genuine Parts. You can find details of your closest ISUZU Authorised Body Repairer on our web site at <https://www.isuzu.co.za/ongoing-maintenance/parts-and-repairs>, but also remember to always look out for **ISUZU Authorised signage** and certification at your body repairer of choice.

ISUZU GENUINE PARTS

Always insist that your insurer or body repairer uses ISUZU Genuine Parts. Only ISUZU Genuine Parts are covered by the ISUZU vehicle warranty, guaranteed to meet all manufacturer specifications. Other parts may look the same as ISUZU Genuine Parts, however they may use cheaper materials or be recycled or second-hand parts. These parts may not perform in the same way or have the same safety features as ISUZU Genuine Parts.

Your ISUZU is designed with advanced safety features to ensure that it is as safe as possible if you are in an accident. To ensure that you are using the parts designed to work seamlessly with your ISUZU and all its safety systems, always insist that your vehicle is repaired using only ISUZU Genuine Parts.

You may call the ISUZU Customer Care Assistance Centre on its toll-free number **08600 47898 (08600 ISUZU)** should you require further information.

SERVICE PLAN

An **Isuzu Mobility** service plan is available at an additional cost during the purchase of a new vehicle. The service plan will cover the cost of the scheduled services as long as the vehicle is serviced at an Isuzu appointed dealer. The service plan will cover the cost of the scheduled services (wear & tear component replacements excluded) up to a pre-defined distance and vehicle age, whichever occurs first. Please refer to the Isuzu website via the link below for the service plan terms and conditions.

SERVICE SCHEDULE

It is the vehicle owner's responsibility to ensure that their Isuzu is serviced in line with the Isuzu service schedule. The service schedule contains specific inspections and component replacements which are periodically required to maintain reliable vehicle operation. Please refer to the Isuzu website via the link below to obtain a copy of your vehicle's service schedule or request a copy thereof from your Isuzu dealer.

<https://www.isuzu.co.za/complete-care/servicing>

It is mandatory for the Isuzu dealer to complete the vehicle service records at the back of this booklet after every scheduled service of the vehicle, as this will be reviewed before any warranty claims can be approved. Your dealer will also conduct a corrosion inspection at each service and the completed vehicle inspection sheet detailing any body damage or corrosion will be filed with the job-card.

1. Front Wheel Alignment and Wheel Balance

Front wheel alignment and wheel balance are affected by operating conditions such as corrugated roads or driving against the kerb, rapid starts and stops, tyre skidding, etc. Wheel alignment and balancing service contributes to longer tyre life and better vehicle handling.

We recommend wheel alignment checks and adjustments at every 7,500km where possible, but strongly recommend wheel alignment checks and adjustments to be performed at every vehicle service.

Furthermore, it is recommended to retain the wheel alignment check and adjustment reports for future reference.

2. Tyre Rotation

Incorrect inflation pressures, rapid acceleration, quick stops, high vehicle speeds and loads, all affect tyre life and can cause uneven wear. Tyres must be rotated regularly to ensure uniform wear and maximum life. Refer to the Owner's manual for correct tyre rotation procedure.

3. Differential / Transmission Oil Change

Extended use and contamination affect rear axle/transmission oil. To ensure efficient operation, rear axle/transmission oil must be changed at the recommended intervals stipulated in the service schedule. Where a vehicle operates in muddy areas, on a beach, creeks/flooded areas etc., drive train components should be serviced as soon as possible, as damage caused by water entry or corrosion is not covered under warranty.

4. Brake and Clutch Adjustments

Brake and clutch linings are subject to wear from usage depending upon driving conditions and driving habits. A periodic check of brake lining condition and clutch linkage adjustment is recommended for safe and trouble-free operation.

5. Engine Oil Change and Filters

Changing engine oil, air cleaner and oil filter elements at recommended intervals is your best investment in prolonged engine life, efficiency and performance. Should a vehicle not be in operation for longer than six (6) months, the oil must be changed before the vehicle is put into operation.

6. Belt Adjustments

To ensure proper performance of belt-driven engine components, all belts must be checked and adjusted periodically.

NOTE: Drive belts must be replaced at intervals as specified in the service schedule.

7. Valves and Carbon Deposits

A degree of carbon build-up is normal in the combustion chambers of any engine, but it also depends on fuel quality and operating conditions. For the best results, follow the recommendations of your dealer on types and grades of fuels and oils which should be used.

8. Lubrication

Heat, cold, dusty conditions or unusually wet weather all contribute to the need for lubrication at regular intervals. Throttle linkage, parking brake linkage and body parts such as door and cab latches and hinges, weather stripping, etc. should receive attention at every scheduled service.

9. Engine Tune-up and Electrical Checks

Fuel and electrical systems are subject to wear and contamination and require periodic cleaning and adjustments to maintain optimum economy and performance.

10. Positive Crankcase Ventilation Valve

Crankcase vapors and other impurities can cause malfunctions of the crankcase ventilation valve. Periodic inspection or replacement may be necessary for smooth engine operation.

11. Paint and Trim

These are affected by normal wear and exposure. Proper maintenance and care of these items can add to their appearance and durability.

12. Wiper Blades

Their life is dependent upon use and climatic conditions, and they should be replaced annually.

13. Diesel Injection Equipment

Diesel injection equipment is subject to wear and can go out of adjustment, therefore servicing at the required intervals in accordance with the service schedule is necessary for optimum performance and economy.

14. Diesel Injectors

All hoses must be checked and replaced if necessary and as specified in the service schedule.

15. Diesel Fuel System

The fuel tank should never be run dry or empty. The tank must be filled immediately if the low fuel level indicator illuminates. The diesel injection pump is reliant on lubrication from the diesel fuel and any interruption in the flow of fuel will result in permanent damage to the injection pump's internal components.

16. Vehicle Storage

Should you consider storing your vehicle for any length of time, consult with your Isuzu truck dealer for the correct procedures to be adopted.

17. Cooling System Hoses

All cooling system hoses must be checked and replaced if necessary and as specified in the service schedule.

18. Vehicle Storage

Should you consider storing your vehicle for any length of time, consult with your Isuzu truck dealer for the correct procedures to be adopted.

FACTS ABOUT OIL AND OIL CONSUMPTION

Internal combustion engines rely on oil to lubricate cylinder walls, pistons and piston rings. With each stroke of the piston, a thin film of oil remains on the cylinder walls, and on the firing stroke it is burned away by the combust flame. If an engine burned just one drop of oil during each combustion cycle, it would require approximately 400 ml per kilometer. Consumption of this magnitude is unheard of. However, internal combustion engines, irrespective of how efficient they are, do use some oil to prevent rapid engine wear.

The rate of consumption depends on the quality and viscosity of the oil, the engine load and speed, the temperature and the amount of dilution and oxidization in the crankcase.

The engine should remain switched off for at least ten minutes to allow oil to drain back to the engine oil sump, before taking an oil level reading with the dipstick.

When the engine oil level is checked, it may indicate full on the dipstick, but this may be misleading when the vehicle is operated in city or under congested traffic conditions. This type of operating conditions usually results in a build-up of condensate and unburnt fuel in the combustion chamber, which then passes into the crankcase, and which then results in a false dipstick reading.

Should the vehicle then be driven at high engine speed for a fairly long journey, the unburnt fuel will boil off rapidly and the engine will then appear to have consumed a considerable amount of engine oil.

High speed operating conditions will greatly increase engine oil consumption due to the inability of the piston rings to scavenge the oil completely at higher engine speed and high engine temperatures.

Automobile manufacturers have proved in tests that an internal combustion engine uses up to seven times the quantity of engine oil at 100 km/h compared to what it would at 60 km/h.

No standard rate of consumption can be established due to the varying combinations and conditions. As a guide, Isuzu therefore considers the following as normal oil consumption on diesel engines.

On diesel engines, the oil consumption in a tuned and efficient engine can be related to the amount of fuel consumed. The typical oil consumption should be in the vicinity of 0.1% of the total amount of fuel consumed, which under normal conditions would be approximately 1 liter of oil for every 1,000 liters of fuel consumed.

NOTE:

Engines equipped with chromed cylinder liners or chrome faced piston rings may require approximately 15,000 kilometers before the piston rings bed into the liner. Therefore, no oil consumption tests should be considered before the vehicle has completed this distance.

WARNING: EXTENDED OIL CHANGE INTERVALS

Before considering the above, it is imperative that your Isuzu truck dealer be consulted as only certain grades of lubricants are approved for this purpose.

IMPORTANT: It is the driver's responsibility to check the following items before starting daily operations

N-Series

Daily	Weekly
• Engine oil level • Coolant level • Tyre pressures/condition • Check for fluid leaks • Hooter, all lights & instruments • Exhaust smoke condition • Lights	• Wheel nut tightness • Clutch free travel • Fan belt condition & tension • Electrolyte in battery • Breathers on engine & fuel tanks • Wiper blades

F-Series

Daily	Weekly
• Engine oil level • Coolant level • Tyre pressures/condition • Drain air tanks • Check for fluid leaks • Hooter, all lights & instruments • Exhaust smoke condition • Lights	• Wheel nut tightness • Clutch free travel • Fan belt condition & tension • Electrolyte in battery • Breathers on engine & fuel tanks • Wiper blades

FX/FYH-Series

Daily	Weekly
• Engine oil level • Coolant level • Tyre pressures/condition • Drain air tanks • Check for fluid leaks • Hooter, all lights & instruments • Exhaust smoke condition • Lights	• Wheel nut tightness • Clutch free travel • Fan belt condition & tension • Electrolyte in battery • Breathers on engine & fuel tanks • Wiper blades

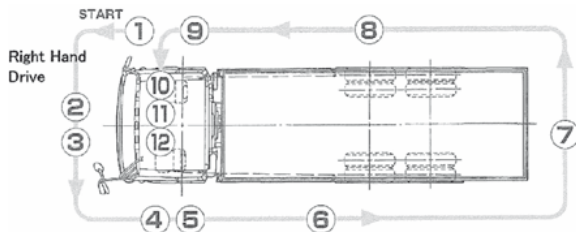

NOTE: Please ensure that all maintenance inspections are carried out in accordance with the service schedules.

A QUICK FIVE-MINUTE CHECK

A daily inspection requires only 5 minutes. Before inspection, the vehicle should be parked on a flat area.

Once you become accustomed to the daily inspection, it is a straightforward process that can be finished without impacting on the daily schedule. Start from the front of the cab and do one circle around the truck.

Take the time to inspect your truck before daily use. Also, in addition to these items, be sure not to forget to check the points where there were problems from the previous inspection or the most recent trip.

1. Inside the cab

- Ensure that no loose equipment or items are lying around inside the cab prior to tilting the cab.
- Check headlights & windshield for cracks, flaws or smudges.

2. Move around to the front of the truck

- Check the posture of the vehicle (leaning to the left or right).
- Check headlights & windshield for cracks, flaws or smudges.
- Check the wiper blades for damage.
- Check the condition of the mirrors.

3. Open the front panel (for models equipped)

- Clean the air-conditioner.
- Check the level of the clutch fluid.
- Check the window washer fluid level.
- Check the engine oil level, staining, colour and smell.
- Remember to close the front panel when you are finished.

4. Move to the left-hand side of the truck & raise the cab

- Check the inflation pressure, condition, and the depth of the grooves of the left side front tyre.
- Check that the wheel nuts are properly tightened.

5. The engine compartment

- Check the fan belt & air-conditioner belt for tension & damage.
- Check the power steering fluid level.
- Check for any leakage of fuel, oil or water.

6. Lower cab side inspection

- Check for the presence of water in the sediment separator.
- Check the inflation pressure, condition & groove depths of the left-side rear tyres.
- Check that the wheel nuts are properly tightened.

7. Move around to the rear end of the truck

- Check the rear lights for cracks, damage or dirt.
- Check the condition and inflation pressure of the spare tyre.
- Check the inflation pressure, condition and the depth of the grooves of the right-side rear tyres.
- Check that the wheel nuts are properly tightened.
- Check the battery fluid level.
- Drain the water from the air tank.
- Check the coolant level of the radiator purge tank.

8. Climb into the cabin

- Check the steering wheel free play.
- Check the brake pedal free play.
- Check the brake pedal stroke and air release sound.
- Check the clutch free play and stroke.
- Check the condition of the parking brake.
- Check the operation of all lights.
- Check that the windshield washer sprays correctly.
- Check the condition of the outside rear view mirrors.
- Check the inflation pressure, condition & groove depths of the right-side front tyre.
- Check that the wheel nuts are properly tightened.

9. Start the engine

- Check that the engine starts correctly & that there are no abnormal sounds.
- Check the brake system air pressure.
- Check the engine's idling speed.

10. After starting the engine

- Check smooth starting.
- Check braking power and even braking.

SERVICE INTERVALS – NORMAL & SEVERE OPERATING CONDITIONS

Vehicle service intervals are based on any of the following:

- Distance travelled.
- Time elapsed, in months.
- Engine running hours.

Please refer to the **Service & Maintenance** section in the vehicle **Owner's & Driver's Manual** for detailed information on the maintenance requirements of the vehicle, as well as checks which may need to be carried out between vehicle services.

The manual also provides information on **Severe Operating Conditions**, which necessitates more frequent service or shorter service intervals. For **severe operating conditions**, the distance or time between services must be half (50%) of that when the vehicle operates under **normal operating conditions**, e.g. a 20,000km or 12-month service interval is reduced to a 10,000km or 6-month service interval.

Service schedules may be obtained from an Isuzu approved dealer, or from the Isuzu website: <https://www.isuzu.co.za/complete-care/servicing>

N-Series Trucks

Normal Operating Conditions	Severe Operating Conditions (refer to owner's manual)
• Furniture • Bulk cement • Farm harvesting • Bread/milk deliveries • Aerial platform • Goods • Refrigeration • Livestock • Refuse collection	• Quarry /construction site operation • Quarry dumper • Road construction dumper • Construction site dumper • Gravel road - more than 20% of overall vehicle use (bakery)

F/FX/FYH/GX – Series

Normal Operating Conditions	Severe Operating Conditions (refer to owner's manual)
• Furniture • Goods • Bulk cement • Refrigeration • Farm harvesting • Livestock • Bread/milk deliveries • Aerial platform	• Quarry/construction site operation • Quarry dumper • Road construction dumper • Construction site dumper • Gravel road - more than 20% of overall vehicle use (bakery) • Mining dumper • Compactors • Tippers • Street sweepers

NOTE:

Vehicles equipped with an hour meter to record engine run time must be serviced at the hour intervals stipulated by the **service schedule**, irrespective of the distance covered or the type of work performed by the vehicle.

If an hour meter is fitted to record the operating time of another system on the vehicle, the run time must be used to determine the service requirement of that system by the responsible body builder.
