**Proposal title:** The light of the sea

**School name:** Platero Green School

**School Team's name:** Science Department

**Country:** Spain

**Supervisor-Professor Full Name:** Francisco Fernández Castro

**What are you creating?** Acting and musical performance / Visual Art / Short film

**Phone number** +34 625598495

**Email** [pfernandez@colegioplatero.es](mailto:pfernandez@colegioplatero.es)

## Summary

The interaction between The Sea and The Earth evokes as well the interaction between visual art and music. The short film unveils the mise en scene of a performance that joins together varied aspects: Debussy's music and the creation using chalk pastel techniques. Altogether, the project interconnects twenty different languages reflecting the centre of our creation, The Sea.

In an oniric atmosphere, the project drives us to the process in which the sea appears as an eternal source of inspiration that joins humans and blue energy in an unavoidable link.

Therefore, this is a double project, the short film shown and a live performance.
