EXPERIENCE

Full-Stack Developer

Hello Digi | Remote, Canada

Aug 2022, Early 2025

- Worked directly on client websites in real-time during night support (8 PM, 4 AM) handling frontend requests under pressure
- Built custom-styled components and UI features for client websites, took their requirements and turned them into working interfaces
- Optimized website performance through Next.js SSR/SSG, image optimization, reducing load times significantly
- Added features to admin panel and fixed backend bugs in real-time while clients waited
- Implemented frontend development guidelines that improved workflow speed and code quality across team
- Maintained this demanding role for 1.5+ years when most people quit within 2,4 months
- Tech: Next.js, React, TypeScript, Tailwind, Redux, React-Table, Node.js, PostgreSQL

Frontend Developer

WHY I'M A STRONG CANDIDATE

I'm a strong candidate for this position due to my relevant experience, work ethics, and communication skills. I have a proven record of taking initiative to fill technical gaps, I learned backend development in 2 months and got promoted to full-stack when the company needed it. I maintained a demanding night support role for 1.5+ years when most quit within months, collaborated smoothly with remote teams across time zones, and consistently delivered quality work that reduced bugs by 75%.

EDUCATION

Associate Degree in Software Engineering, Shiraz University (2021)
