

Rocky Mountain Hardware introduces five new hardware collections by respected San Francisco-based furniture designer Ted Boerner, whose work is known for its sophistication, comfort and organic sensibility. Cast in recycled, art-grade bronze, the five collections include both door hardware and cabinet pulls. Offering a range of sculptural looks, including chunky handles and asymmetrical knobs and pulls, each embraces Boerner's signature balance of intimacy and emotion.

Ted Boerner discovered his passion for design in the theater, as his natural talent in set design evolved into furniture. Influenced greatly by his artist grandfather, Boerner is both a creator and craftsman who produces all original work. With a well-earned reputation as a provider of exceptional products and services for more than two decades, Boerner has created pieces for a range of markets, from medium range prêt-à-porter furniture to high-end, made-to-order couture work. From collections for Henry Hall, Conde House, Brownstone and Design Within Reach to his eponymous Ted Boerner line, Boerner's work combines a delightful flavor of wit with the ease and comfort of good design.

Patina Options

The entire collection is available in your choice of nine patina finishes as pictured to the right. The photos in this brochure give a close representation of these patinas; however, the various elements of time, touch and climate work together with the bronze to create a unique hue. Each piece, then, distinctly reflects its surroundings.
