Simply Securing Safe Spaces

Why SHELTER?

BEST SHELTER, a unique combination of code-compliant mechanical hardware and proven technologies, is a responsive lockdown solution ideal for all types of buildings/environments and budgets.

- **Safe:** 9K chassis / push of a button lockdown
- **Scalable:** From fob only to a full-scale platform, you can retrofit doors as your budget allows
- **Communicative:** Repeater relays can be tied into existing alarm or EAC systems to send early notification of a lockdown to first responders
- **Configurable:** The fob can be programmed to lock down one door, set of doors or entire building
- **Engineered by Experts:** Designed with input from those who have been in live lockdown situations and are responsible for managing a building and its occupants in an emergency
