The Schlage® L Series mortise locks

Security has always been at the heart of all our products. But, today we offer so much more. Since our beginning nearly 100 years ago, Schlage® has consistently delivered innovation and continuous improvement to the solutions you've grown to trust. And the L Series mortise locks are no exception.

Proven technology

The L Series is built to withstand the rigors of daily use without fail and is among the most durable, dependable and intelligent family of products on the market today. When you choose a Schlage lock you can have confidence you've chosen a solution that will provide protection at the most critical moments.

Comprehensive offering for every opening

Mechanical, wired electrified, wireless electronic and multi-point solutions allow a common aesthetic and consistent user experience throughout the building while lowering the total cost of ownership.

And, with an extensive list of functions, keying, trim, levers and finish options the L Series works for any application.

World-class style and design

Door hardware is both a functional component and an architectural element. All the more reason to select durable door hardware that can be suited across a facility—all the more reason to select Schlage along with other Allegion brands.

With an expansive selection of levers that are packed with style and durability, a lineup of finishes to enhance any environment, and options to suite with cylindrical and tubular locks and exit devices means that you have more choices that support your goals for aesthetic consistency throughout a room, a floor, or an entire facility.

Mortise lock comparison

L mechanical

**Applications**

The Schlage L Series has long been the benchmark for mortise locks. Beyond strength and security – it offers tremendous flexibility to allow it to meet the needs of most every application.

The ability to suite across electronic, tubular, exit trim, and multi-point locks allows the Schlage L Series mortise lock to integrate seamlessly into any environment.

Key features

- Exceeds ANSI/BHMA Grade 1 operational and security standards
- Expansive list of configurations and options, including retrofit indicators
- 50 standard mechanical functions, custom functions also offered
- “The Original” universal lock case allows creation of 10 functions from a single lock body
- 14 finishes and 33 levers, two knobs, five roses and three escutcheon designs
- Supports standard, SFIC and FSIC cylinder formats
- Multiple key systems available – open, patented, restricted, geographic exclusive, UL 437

L wired electrified

**Applications**

The wired electrified L Series is ideal for new construction and high traffic areas where hardwired power ensures continuous operation and where electrified door prep, hinges and wiring can easily be incorporated into the building.

The electrified L Series is regularly used as part of an access control system for high security areas, or independently in areas that require a remote access switch.

Key features

All mechanical features plus:

- Auto-detect 12/24 VDC
- Selectable EL/EU
- 10 electrified functions
- Advanced features: RX, DPS, latchbolt monitor and deadbolt monitor for application flexibility
- Leading energy efficiency that eliminates “hot levers”
- Advanced motor-driven electrified functions – quieter, smoother, more secure operation

LE wireless electronic

**Applications**

The Schlage LE wireless mortise lock with ENGAGE™ technology is designed to affordably extend electronic access control deeper into the building beyond traditional perimeter and high security openings.

The LE is ideal for commercial real estate, K-12, higher education, assisted living, medical offices, or multi-family applications. Facilities can benefit from the enhanced security, efficiency, and convenience of upgrading to electronic credentials.

Key features

All mechanical features' plus:

- Six functions with LED indicator, deadbolt, and interior pushbutton options
- Sectional and escutcheon trim options
- 31 levers, 2 knobs and 9 finishes
- Integrated multi-technology card reader, door position sensor (DPS) and request to exit (RX)
- Built-in Bluetooth® enables wireless configuration from smart phones/tablets
- Built-in Wi-Fi® enables automatic daily updates sent directly from host software
- Capable of networked real-time communication with the ENGAGE Gateway and software alliances
- Up to 2 years of battery life

L400 mechanical

Applications

L400 Series locks are designed for use as primary locks where no latching is required, such as restrooms and small doors to utility spaces.

It also offers optimum security when used as an auxiliary lock in other applications.

Key features

- Six available functions
- 12 finishes
- 1" (25 mm) stainless steel throw deadbolt
- Deeper retainer groove in cylinder shell increases security against wrenching and pullout; all cylinders backward compatible
- 6-pin Everest® 29 cylinder with patented keys standard
- Steel case and parts are corrosion resistant

LM9200 multi-point

Applications

The Schlage LM9200 series lock utilizes latches in the top and bottom of the door, rather than the side on single or double sets of doors.

Compatible with wood or hollow metal doors, the LM9200 Series is ideal for conference rooms, corridors, office suites, elevator lobbies, and openings where flush bolts and coordinators are not desired.

Key features

- Concealed vertical cables provide simple installation and reliable performance
- Compatible with sectional and escutcheon trim; does not require "backer plates" or metal wraps for fire protection
- Fire-rated for up to 60 minutes for wood door applications; 90 minute fire rating for hollow metal door applications
- 33 lever designs
- 13 functions (mechanical and electrified)
- Available without the bottom latch for single point latching

LM9300 multi-point

Applications

The LM9300 Series is part of a three-point locking system designed for tornado, hurricane or high security applications, providing superior protection with familiar operation.

Latches at the top, side and bottom of the door provide protection from high wind speeds and 15-lb. projectile impacts up to 100 mph when paired with a Steelcraft Paladin tornado-resistant door.

Key features

- All three latches engage when the door is shut and retract simply by rotating the lever
- Compatible with sectional and escutcheon trim
- 33 lever designs
- Six available functions
- Complies with FEMA 361 and ICC500 tornado shelter guidelines and Florida Building Code Enhanced Protection Area (EHPA) standard when paired with appropriate Steelcraft doors
- Vertical rods ship pre-aligned and pre-installed with Steelcraft doors, enabling quick and simple installation

From mechanical to wired electrified to wireless electronic the L Series offers a grade 1 solution for the entire project.

L mechanical

Suitable for all openings

L wired electrified

Ideal for high-traffic access control

LE wireless electronic

Ideal for low-traffic access control

STRONG

The Schlage L Series has long been the benchmark for heavy-duty mortise locks.

- Exceeds Security Grade 1 and Operational Grade 1 ratings
- Every Schlage lock and deadbolt undergoes intensive testing to determine its ANSI grade level:
 - Cycle tests
 - Resistance tests
 - Door impact tests
 - Warped door tests
 - Bolt strength tests
- Levers constructed of solid brass or solid stainless steel for a strong-yet-comfortable feel
- Whether the application calls for high abuse resistance or just operation over millions of cycles without any degradation in performance, users can have confidence that the locks will last

SECURE

A strong lock is only part of the security equation—proper key and card access control is equally important.

- Everest 29™ cylinder with S123 keyway is provided standard which prohibits unauthorized key duplication at local stores; patent protected until 2029
- Dealer and end user restricted geographically exclusive Primus XP options for advanced key control
- SL cylinders are uniquely designed to accept the same Schlage A2 key system used in SFIC cylinders, enabling one key system to span three unique cylinder formats for better control
- Wired electrified and wireless electronic locks enable the use of electronic credentials for increased visibility and control over access
- Schlage smart credentials using MIFARE® DESFire® EV1 technology utilize encryption, mutual authentication and key diversification to ensure the highest levels of security

■ SMART

Smart means using innovation to make solutions more efficient, flexible, and easier to install and use.

- One platform, three solutions (mechanical, wired electrified, wireless electronic)—same look and feel throughout the building for a common user experience and lower cost of ownership
- Wired electrified lock has autodetecting 12/24V input and selectable EL/EU operation
- RX switch monitors the inside lever to balance security with lever actuation sensitivity
- Energy efficient design allows multiple locks on a single power supply with no "hot levers"
- Wireless electronic locks with ENGAGE™ can be managed with an access control system or with convenient ENGAGE web and mobile applications
- Wireless electronic locks provide the option to leverage existing network infrastructure for offline or real-time applications

More than just locks, Schlage delivers a complete portfolio and an infrastructure of support throughout the entire build and ownership process.

- From mechanical locks and keys to wireless electronic locks, readers and credentials, Schlage ensures you can create the most secure, efficient and convenient solution – all with a single brand
- Schlage products suite with other Allegion brands including Von Duprin® exit devices, LCN® door closers, Ives accessories and Steelcraft® doors and frames
- A trusted partner for nearly 100 years - consistently delivering proven and innovative solutions to serve the needs of our customers
- Comprehensive support from our sales offices including consultation, master key development and training; industry and code training, specification writing, and product service

2. Available in 630 and 630AM only.

Note: ME1, ME2 and ME3 ergonomic levers designed with Gensler as product design consultant.

All 18 of the M Collection designs can be paired with any of the following commercial graded products for suiting across an office, a floor, or an entire building.

Schlage locks

LT Series tubular locks / Grade 2

The perfect compliment to the Schlage L Series or the Von Duprin exit devices, the LT Series tubular chassis is based on venerable L Series mortise lock and provides an alternative for lever suiting interior doors.

Von Duprin exit devices

98/99 exit devices / Grade 1

Von Duprin created the first exit device in 1908, and continues to redefine the industry today with unsurpassed quality and industry-unique features such as concealed vertical cables. The 98/99 Series exit device is intended for standard-stile doors. Available on 996L trim only.

33A/35A exit devices / Grade 1

Offering the same innovative features as the 98/99 Series, the 33A/35A Series of exit devices is intended for narrow-stile doors. Available on 360L trim only.

94/95 exit devices / Grade 1

The 94/95 pushbar is recessed into the door to minimize the external profile, allowing more room for people and equipment to pass through. Available on 940L trim only.

Ives pulls and accessories

IVES / Grade 1

Finish the door opening with pulls and accessories that not only deliver exceptional quality, but provide a modern or elegant look depending on the architectural design.

Designs and finishes

The Standard Collection

The Standard Collection levers can be paired with exit devices and locks from our trusted Schlage and Von Duprin brands. And, they are built to the same exacting standards. Our Standard Collection levers offer a more traditional style that is appropriate for use in a number of commercial applications.

Complementing locks and latches

HL6 quiet push/pull mortise lock

The HL6 push/pull latches are ideal for healthcare applications, restrooms, commercial and institutional doors. The short throw angle allows door opening with an easy push or pull action.

- Variety of vertical or horizontal mounting positions
- 16 mortise functions, including electrified
- 10 finishes, including antimicrobial options
- Quiet operation designed for healing environments
- Optional engraving on handles
- Available with lead lining
- ASA strike available
- Also available in tubular latching only or privacy models

Ligature resistant solutions

Specifically designed with multiple safety facets including recessed trim, sloped surfaces and concealed fastening hardware to reduce the risk of injury or death due to ligature strangulation in hospitals, behavioral health facilities and detention centers.

- Available with lever, knob, thumbturn and cylinder rings
- 25+ mortise functions, including electrified
- Available as a complete new lock assembly or as a conversion to an existing lock

SL1 lever

SK1 knob

LT Series decorative tubular locks

LT Series locks are built from the same foundational technology of the L Series mortise locks to provide durable, reliable performance and allow for a near seamless feel between the two types of locks. The LT Series seamlessly suites with the L Series by utilizing the same levers, finishes and roses to provide a consistent look and feel throughout the project.

Vandlgard®

The Vandlgard option is ideal for areas subject to abuse or anywhere vandalism is likely to be present. The outside lever rotates freely down when locked, limiting the ability of vandals to apply excessive force to the chassis which could damage internal lock components. Order available functions with the LV prefix.

Accessibility and life safety

Door hardware should be as effective in helping people go about their lives as it is in securing their environments. The Schlage L Series is designed with these requirements in mind.

Accessibility

All Schlage L Series levers comply with the Americans with Disabilities Act (ADA), which requires that “Operable parts shall be operable with one hand and shall not require tight grasping, pinching, or twisting of the wrist. The force required to activate operable parts shall be 5 pounds (22.2 N) maximum.”

Life safety

The Schlage L Series is UL listed for use on 3-hour fire doors (except L9076 and L9077).

All levers with returns comply with the California State fire code for return to within 1/2" of the door face.

Lead lined solutions

Lead lined locks are intended for use in X-ray or other rooms with radiation concerns. Add option XL11-515 (L9000) or XL12-216 (L400) on order.

Bullet resistant locks

The L9453P lock has been approved as a UL Listed Bullet Resistant Device (Levels 1, 2, and 3) when installed with other rated products to create a bullet resistant assembly.

Tactile warning for the visually impaired

Tactile warning is a special knurled surface used to alert the visually impaired to a potential hazard on the opposite side of the door (exit to street, a workshop or other hazardous areas). Tactile warning is typically applied to the outside lever only, and is specified by an 8 prefix on the lever number.

Available on 01, 02, 03, 05, 06, 07, 12, 17, 18, M51, M52, M81, ME1, ME2, ME3 lever designs

Milled

Milling pattern for backside of 01, 06, 07, 17 and 18 levers.

Knurled

Knurling pattern for 02 lever.

L Series mechanical locks

The Schlage L Series mechanical lock is the industry standard of mortise locks. It has earned its unparalleled reputation over its long history through consistently delivering reliable, durable and flexible performance.

The L Series not only exceeds ANSI/BHMA Security Grade 1 AND Operational Grade 1 standards, it also serves as the foundation for the Schlage L wired electrified, LE wireless electronic and multi-point mortise lock portfolios.

In addition to its strength and performance capabilities its 33 levers and 14 finishes allow seamless suiting across other Allegion lock styles and exit trim to create truly beautiful environments.

Features

- Exceeds ANSI/BHMA Grade 1 operational and security standards
- Expansive list of configurations and options
- 50 mechanical functions meet the requirements of most applications
- Universal lock case that supports 10 different functions
- 14 finishes paired with 33 levers, two knobs, five roses and three escutcheon designs to enhance any building style
- Levers constructed of solid brass or solid stainless steel for a strong-yet-comfortable feel
- Supports standard, SFIC and FSIC cylinder formats
- Multiple key systems available

L Series wired electrified locks

The Schlage L Series wired electrified lock complements the L mechanical lock by working with access control systems to provide advanced security in high traffic areas. Because the electrified L uses a motor instead of a solenoid, it offers unparalleled energy efficiency, flexibility and quiet operation in wired electrified applications.

The electrified L also comes standard with an Allegion Connect Molex™ connector for simplified installation and maintenance.

Features

- Universal input voltage – accepts 12 or 24V DC for installation flexibility
- User selectable fail safe/fail secure – changing mode between EL and EU is as simple as flipping a switch on the lock case
- Low maximum current draw – 0.4amps - allows multiple locks on a single power supply
- Low holding current – 0.01 amps – produces minimal heat, eliminating “hot levers” in electrically locking applications and allowing reliable operation even in poorly ventilated wood doors
- All-new RX switch monitors the inside lever with enhanced detection level that balances security with lever sensitivity
- Modular RX design – RX can be added on at a later time without opening the lock case
- UL listed for 3 hour fire door

L Series wired electrified lock

Wiring, electrical requirements and options

Wiring diagrams

Electrical requirements

The L Series electrified locks are powered by DC power only. Do not use AC power. In addition to Allegion Connect connector, an extended-length molex-to-traditional terminal wiring harness is shipped with every lock.

- Voltage: 12V or 24V DC (maximum 26.4 V, minimum 10.8 V)
- Peak current: 0.4 amps
- Holding current: 0.01 amps
- Operating temperature: -22°F to 140°F (-30°C to 60°C)

Available options

- Request to Exit (RX)
- Latchbolt Monitor (LX)
- Door Position Sensor (DPS) - non-deadbolt functions only
- Deadbolt Monitor (DM) - deadbolt functions only

Allegion Connect

This factory-installed Molex connector system utilizes quick-connect harnesses and hinges for a quick and easy way to connect power sources; all the way from your power supply to electrified door hardware. Alternately, the connector can be cut off and the lock installed with traditional wire splicing methods. Note that the Allegion Connect harnesses and hinges are sold separately.

L Series wired electrified lock functions

All locks feature automatic detection and operation with 12V or 24V DC and a case-mounted switch that allows customer selection of EL (fail safe - power failure allows either knob/lever to retract latchbolt and/or deadbolt) or EU (fail secure - power failure locks both knobs/levers) operation. Please specify lock function as EL or EU for default switch position.

LE wireless electronic locks

The Schlage LE wireless mortise lock with ENGAGE™ technology is designed to affordably extend electronic access control deeper into the building beyond traditional perimeter and high security openings, offering enhanced security, efficiency, and the convenience of upgrading to electronic credentials. LE is ideal for office and suite entries, conference rooms, common area doors, resident units, and sensitive storage areas with a mortise door prep.

LE wireless locks simplify installation by combining the lock, credential reader, door position sensor and request-to-exit switch all in one unit. LE wireless locks require only minor modifications to existing mechanical mortise prep with no wires to run to the lock or additional hardware necessary.

Built-in Bluetooth® enables LE wireless locks to connect directly to smart phones and tablets; no need for a proprietary handheld device for set-up and configuration. And with built-in Wi-Fi®, LE locks can connect directly to an existing Wi-Fi network enabling automatic updates to lock configuration and user access. The ENGAGE cloud-based web and mobile apps make it easy to configure lock settings, add users, and view audits and alerts from anywhere.

For advanced capabilities including networked real-time communication with the ENGAGE Gateway, LE wireless locks can be managed with software from one of our Software Alliance Members.

Features

- Suites with mechanical L Series with 31 levers and 2 knobs, keyways and most finishes
- Weather-resistant design for use on perimeter doors
- Innovative integrated door position switch requires no additional door prep¹
- Up to 2 years of battery life

1. Door position switch requires additional prep for mortise deadbolt (MD) applications.

LE wireless electronic lock functions

LEMS**LED Indicator****Storeroom**

- Lockset is normally secure
- Inside lever always free for immediate egress
- Valid toggle credentials on the exterior may be used to change to a passage or secured status
- A mechanical key will momentarily unlock the door

**LEMB****Interior Push Button and LED****Office**

- Lockset is normally secure
- Inside lever always free for immediate egress
- Interior pushbutton on inside housing may be used to select a privacy status
- Interior pushbutton will disable normal electronic access from the exterior
- Opening the door or pressing the interior pushbutton a second time on the inside housing deactivates the privacy status

Apartment

- Lockset is normally secure
- Inside lever always free for immediate egress
- Interior pushbutton on inside housing may be used to select a passage or secured status
- Opening the door or pressing the interior pushbutton causes the lockset to toggle unsecured
- While toggled unsecured, the lockset can only be secured while the door is closed by pressing the interior pushbutton or using a normal credential on the exterior
- Normal electronic access from the exterior is always allowed

**LEMD****Deadbolt with LED****Privacy**

- Lockset is normally secure from exterior
- Inside lever always free for immediate egress and retracts both latchbolt and deadbolt
- The deadbolt may be used to select a privacy status
- With deadbolt extended, normal electronic access from the exterior will be disabled
- Opening the door or retracting deadbolt deactivates the privacy status

Apartment

- Lockset is normally secure from exterior
- Inside lever always free for immediate egress and retracts both latchbolt and deadbolt
- The deadbolt may be used to select a passage or secured status
- Opening the door or retracting the deadbolt causes the lockset to toggle unsecured
- While toggled unsecured, the lockset can only be secured while the door is closed by extending the deadbolt from inside or using a normal credential on the exterior reader
- Normal electronic access from the exterior is always allowed

LM9200 multi-point locks

The Schlage LM9200 lock utilizes latches in the top and bottom of the door, rather than the side, on single or double sets of doors. Compatible with wood or hollow metal doors, the LM9200 is also available without the bottom latch for single point latching.

The LM9200 can easily integrate into any application and suite with other Schlage locks and Von Duprin exit devices.

Features

- Concealed vertical cables provide simple installation and reliable performance
- Compatible with sectional rose and escutcheon trim; does not require “backer plates” or metal wraps for fire protection
- Fire-rated for up to 60 minutes for wood door applications; 90 minute fire rating for hollow metal door applications
- 33 lever designs to suite with Schlage locks and Von Duprin exit devices
- Requires door designed specifically for two point latch system

LM9300

multi-point locks

The LM9300 is part of a three-point locking system designed for tornado, hurricane or high security applications. Latches at the top, side and bottom of the door provide protection from high wind speeds and 15-lb. projectile impacts up to 100 mph when paired with a Steelcraft Paladin tornado-resistant door.

All three latches engage when the door is shut and retract simply by rotating the lever, providing superior protection with familiar operation. Available in six functions and with 33 lever designs, the LM9300 can easily integrate into any application and suite with other Schlage locks, as well as Von Duprin exit devices.

Features

- Tornado configuration complies with FEMA 361 and ICC500 tornado shelter guidelines when paired with Steelcraft Paladin doors
- Hurricane configuration complies with Florida Building Code Enhanced Protection Area (EHPA) standard when paired with Steelcraft Hurricane doors
- For high security applications, pair with Steelcraft steel-reinforced or honeycombed doors
- Vertical rods ship pre-aligned and pre-installed with Steelcraft doors, enabling quick and simple installation
- Also available for storm shutter configurations
- Compatible with all L Series trims, both sectional and escutcheon, and 33 lever designs

Readers, credentials and power supplies

Readers and credentials

Schlage's comprehensive portfolio of electronic credentials and wall mount readers are designed to provide enhanced levels of security, efficiency and convenience to any facility.

Proximity (125 kHz) technology:

- Basic open contactless technology; recommended for legacy systems only
- Encoded with a unique number that cannot be updated or changed

Smart (13.56 MHz) technology:

- Advanced contactless technology, more secure than magnetic stripe and proximity options
- Advanced data encryption secures against duplication
- Recommended for new systems
- Open platform, designed to work with a wide array of systems and applications beyond access control

Multi-technology options that provide flexibility:

- All multi-technology credentials and readers feature Schlage smart technology with either magnetic stripe or proximity
- Enables migration from legacy platform to secure smart technology
- Reader options available with keypad for high security applications

Credentials

Options include clamshell or ISO cards, keyfobs, wristbands and mobile.

Readers

Single-technology proximity (PR) and smart (SM) readers available in a mini mullion design. Multi-technology (MT) options include mullion, single gang and single gang with keypad (K).

Power supplies

Schlage power supplies are designed for speed and ease of installation upfront with the assurance post installation of the highest quality output in terms of even power flow to protect downstream devices.

Cylinders and key systems

Cylinders and key systems

A strong lock is only part of the security solution—proper key control is equally important. Schlage offers extensive options to meet the security needs of the specific project.

Cylinders

Conventional mortise cylinder options¹

- 6-pin length (standard)
- 7-pin length in SL cylinder
- Available in Schlage Classic and Everest 29™ open and restricted keyways
- Primus® XP security features and geographic exclusivity
- Primus XP UL 437 listed high security features
- Faculty restroom function available

Full size interchangeable core (FSIC) options¹

- 6-pin length
- 7-pin length in SL cylinder
- Available in Schlage Classic and Everest 29 open and restricted keyways
- Interchangeable core compatible with conventional cylinder key systems
- Primus XP security features and geographic exclusivity

Small format interchangeable core (SFIC) options²

- 7-pin combined Everest 29 R restricted keyways³

¹ Available in 606, 622, 626 and 643 plug face finishes; Everest 29 S123 keyway standard.

² Available 606, 622, 626 and 643e finish only.

³ Restricted keyway cores require authorization from the end user.

Key systems

Classic keyway

- Open keyway—keys are duplicated and available without ordering formalities
- Upgradeable to Primus XP and UL 437 levels of security

Everest 29

- Patented through 2029
- Key duplication is restricted providing a higher level of security for the cylinder
- Can be integrated to an existing Everest B, C, or D system
- Upgradeable to Primus XP and UL 437 levels of security

Cylinder mechanism options

Primus XP

- Independent, dual locking mechanisms
- Unique side bit milling on key makes unauthorized duplication highly enforceable
- Allows creation of geographically exclusive keys in thousands of available combinations
- Provides patent protection when applied to Schlage Classic keyways
- Compatible to all Everest and Everest 29 keyways

Everest 29 SL

- Available in Conventional and FSIC cylinder formats
- Pinned on an A2 system compatible with the Schlage Everest B and Everest 29 R keyways
- Users can expand existing Everest B and Everest 29 R key systems
- Enables Primus XP upgrades on SFIC keyways

1. Limited dealer controlled programs available.
2. FSIC and Conventional in the form of SL cylinders that accept an SFIC key.

Primus XP access control and high security cylinders

Primus XP access control and high security cylinders are available to add patented key control and varying degrees of geographical exclusivity to most Schlage 6- and 7-pin key systems, whether Everest 29 or Classic keyways.

In addition to a standard pin tumbler mechanism, Primus cylinders incorporate a patented finger pin and sidebar design, providing a “dual-locking” cylinder that is virtually pick-proof. Resistance to drilling and other physical attack is optional by specifying 20-500 Series UL 437 Listed high security cylinders.

Classic Primus XP cylinders are recommended for upgrading existing Classic key systems. Due to its extended patent life, Everest 29 Primus XP is recommended for new key systems and for upgrading existing Everest key systems. Specify keyway to differentiate between Everest 29 and Classic. Example: C or CP (Classic) vs. S123 (Everest 29).

Finishes: 605, 606, 611, 612, 613, 619, 622, 625, 626, 629 and 630.

Concealed cylinders available in 606, 622, 626 and 643e only.

Plug faces available in 606, 622, 626 and 643e only.

6-pin Everest 29 S123 keyway standard for stock cylinders; S145 standard for new key systems.

Standard cylinder lengths: sectionals (rose) trim = 1 1/8" (29 mm), escutcheon trim = 1 1/4" (32 mm).

Optional cylinder lengths are in 1/8" (4 mm) increments ranging from 1 1/8" to 1 3/4" (29 mm to 44 mm).

Full size interchangeable cores

FSIC mortise cylinders

Schlage figure-8 interchangeable core (IC) cylinders allow immediate rekeying at the door. Simply use the special control key to replace the core in seconds. Full-size IC cylinders can be integrated into any existing 5- or 6-pin Schlage key system with no adverse effects on keying capacity. Convert existing mortise locks to interchangeable core merely by replacing the old cylinder with the IC cylinder and proper collar(s).

Parts and options

These cylinders are for L463 and L9463 classroom function deadlocks. They are handed. They have a rotational stop in one direction to prevent locking from the inside, but allow unlocking. Cylinders are field-reversible by changing the position of the rotational stop. All cylinders furnished with L583-254 cam.

*Specify hand of inactive leaf.

Door handing

One of the revolutionary features of the L Series mortise lock is that handing can be done by the distributor or installer quickly and easily without opening the lock case. This feature allows a Schlage distributor to order L Series locks as stock and customize the handing to each order's specification. This means off-the-shelf delivery to meet today's fast-track construction requirements. These mix-and-match lever-with-knob combinations, along with a quickly reversible lock chassis, provide the ultimate in stocking, ordering and installation flexibility. Orders can be filled from stock, minimizing delivery problems.

Changing lock hand

No more than two simple steps are required to change the hand of any L Series lock. Rotate the latch unit 180° and/or change the catch screw position.

A. Changing latchbolt handing

Remove armored front. Pull latchbolt away from chassis and rotate complete unit 180° to reverse the door handing. Reinstall armored front.

B. Change chassis handing

Remove catch screw from one side of chassis and install on opposite side. For RH and RR, the catch screw will be on the lock case side. For LH and LR, the catch screw will be on the lock case cover.

Note: Catch screw location reversed for Vandlgard function.

The hand is determined by the direction the door swings when viewed from the exterior or corridor side of the door.

How to order

L Series ordering instructions

To order Schlage products, descriptive data should be in the same sequence as shown:

See catalog page 22 or price book for other mortise cylinder, SFIC, FSIC and Less Cylinder options.

4/5 Outside design/finish

Specify tactile warning (knurling) here as "8" before lever design, e.g. 803. To specify complete design, combine the numeric knob or lever design with the alpha rose or escutcheon design. Example: 03L, 93A, 42B. When ordering Mediterranean design levers with L escutcheons, specify AST/00L, AVA/00L or MER/00L.

6/7 Inside design/finish - leave blank if same as outside

8 Hand - one hand per line item

For standard 1 3/4" door thickness lines 9-13 are standard and do not need to be defined

9 Front (use "Strike" field on Schlage form) - leave blank for standard armored front or enter number for narrow front

10 Strike - leave blank for standard or specify part number for optional strike (LLL = Less strike)

100 = 1"

114 = 1 1/4"

112 = 1 1/2"

200 = 2"

118 = 1 1/8"

138 = 1 3/8"

134 = 1 3/4"

11 Door thickness - if non-standard (Example: 200 = 2")

12 Extension - to specify whether thick door is extended inside (EI), outside (EO), differently (ED) or equally (EE)

13 Dimension for strike lip lengths - see strike page for availability of specific dimensions with specific strikes

14 Additional details such as:

- Keying detail (e.g. key symbol, keyway, bitting)
- Wired Electrified options (e.g. RX, LX, DPS, DM)
- Other special requirements

Selections correspond with the numbers above

Standards options are indicated in bold. See price book for specific configuration options.

Detail

1	Series	LEMS	Mortise with indicator only		
2	Chassis	LEMB	Mortise with interior push button		
3	Function	LEMD	Mortise with deadbolt		
See page 38 for descriptions of functions available.					
3	Style	GRW	Greenwich (sectional)		
		ADD	Addison (escutcheon)		
4	Cylinder	P	Mortise cylinder, 5- or 6-pin		
See price book for other mortise cylinder, SFIC, FSIC and Less Cylinder options.					
5/8	Lever style	Available in 31 levers and two knob styles.			
See pages 12-15 for more information.					
6/9	Finish	605	Bright brass (US3)	625	Bright chrome (US26)
		606	Satin brass (US4)	626	Satin chrome (US26D)
		612	Satin bronze (US10)	626AM	Satin chrome anti-microbial
		619	Satin nickel (US15)	643e	Aged bronze (US11)
		622	Matte black (US19)		
7/10	Rose (GRW style only)	00A	2 1⁄8" (54 mm) diameter		
		00B	2 9⁄16" (65 mm) diameter		
		00C	2 5⁄8" (66 mm) diameter with bevel (not available in 612 finish)		
		MER and AVA decorative rose options are also available, but only with MER and ACC lever styles. Inside rose will default to outside unless specified.			
11	Handing	RH	Right hand		
		LH	Left hand		
		RHR	Right hand reverse		
		LHR	Left hand reverse		
Defaulted to Right Hand, if not specified. The chassis can be changed in the field, with some exceptions. See pricebook for additional details.					
12	Strike plate/lip length	10-136	1 3⁄16" lip length (MS and MB)		
		10-072	1 3⁄16" lip length (MD)		
Additional lip length options 7⁄8" to 1 3⁄4". See price book for details.					
13	Door thickness	134	1 3⁄4" (44 mm)		
Optional: 1 3⁄4" (44 mm) to 2 1⁄4" (57 mm). 2" maximum door thickness on SFIC cylinders. See price book for additional details.					
14	Keying type	S123	Everest 29		
See price book for other available keyway options including master keying.					
15	Additional options				

Mechanical product specifications

	L mechanical and L wired electrified	LM9200	LM9300
Chassis			
Case material	CRS with zinc dichromate plating		
Case size	L9000 Series: 4 7/16" x 6 1/16" x 1" (113 mm x 154 mm x 25 mm) L400 Series: 4 7/16" x 3 5/8" x 1" (113 mm x 92 mm x 25 mm)	4 7/16" x 12 19/32" X 1" (113 mm x 320 mm x 25 mm)	4 7/16" x 6 1/16" x 1" (113 mm x 154 mm x 25 mm) (chassis only)
Spacing	Knob or lever to cylinder: 3 7/8" (98 mm); knob or lever to thumbturn hub: 2 11/16" (68 mm)
