

level Lock

Touch Edition

The Smallest and Most Advanced Smart Lock Ever.

Small, elegant, and powerful, the all-new Level Lock - Touch Edition adds convenience invisibly without compromising on design and security. Available in four distinct finishes.

Includes Everything

Level Lock includes everything needed to replace your lock.

Touch

Unlock or lock with the touch of a finger.

Cards

Use programmable key cards for phone-free access.

App

Control your lock securely via the Level Home app.

Activity

See recent activity, including who's come and gone.

Sharing

Give access to friends, family, and people you trust, from wherever.

Installing Level Lock is straightforward and only requires a screwdriver.

Visit level.co or email info@level.co for additional information.

A close-up, vertical view of the Level Lock Touch Edition lock assembly. The lock is mounted on a light-colored door. It features a central rectangular plate with a circular touch sensor in the middle, flanked by two screws. The lock is flanked by two polished brass handles.

Touch Edition

Small as a Regular Lock

By building upon our patented Bolt platform, we made Level Lock - Touch Edition as small as a regular lock. We've packed all-new technologies into the lock face so you can now access your home effortlessly — all without an unsightly box on your door.

Power, Meet Efficiency

Level Lock uses a patent-pending, 6-stage, stainless steel gearbox that's both powerful enough for the toughest conditions and efficient enough to deliver a years worth of battery life. A single easily replaceable CR2 battery is thoughtfully hidden in the retractable bolt.

Strength You Can Feel

Level Lock is built with a combination of 440C stainless steel and strengthened metal alloys. Certified BHMA AAA to meet the highest industry standards for security, durability, and reliability.
