How to price protection plates:

- Look to see if the desired plate is in the **Stocked** table. If it is, use this price shown.
- If the plate is not a stocked plate,
 - Determine the hundred square inch size using the **Door plate hundred square inch sizing chart** above. If ordering in increments not shown on the chart, use the next larger size (height and/or width) shown in the chart.
Example: For a 6-1/2" × 33-1/2" plate, use 8" × 34" = 2.72 sq. inches
 - Determine the list price for the height of plate and desired finish from the **List Price (per 100 square inches)** table.
Example: For a 6-1/2" height plate in 630 (US32D) finish, use Under 8" column = \$32.90
For base plate pricing, multiply square inch size from part a) × the list price from b).
Example = 2.72 sq. inches × \$32.90 = \$89.50
- If any options are desired, then add the list add per plate pricing to the base plate pricing.
For a 8402 8" × 34" US32D TK-TX, use the following:
Example = 2.72 sq. inches × \$29.00 (base price) + \$32.00 (for UL) + \$22.00 (for TK-TX) = \$130.88
