

# Schlage Mobile Access Credentials

## Overview

The new Schlage® Mobile Access Credentials enable residents or staff members to utilize a mobile device instead of a physical badge to securely unlock an opening. Available for iOS and Android phones, the Schlage Mobile Access Credential app is convenient and easy to use. Simply select a specific door listed on the app; if access is granted, the encrypted unlock signal will be sent from the smart device to the mobile enabled lock or reader.

Schlage Mobile Access Credentials feature best-in-class asymmetric encryption for added security and peace of mind. For added reliability and convenience, Schlage Mobile Access Credentials will work without an internet or cellular connection once they are downloaded from the cloud and access rights are synced to the devices.

Site administrators will use the ENGAGE™ web app to enroll users and assign mobile credential access to openings. Schlage Mobile Access Credentials can be added/deleted immediately by syncing the ENGAGE™ mobile app with the lock or reader at the opening, or they can be added/deleted automatically overnight when the lock or reader is connected over Wi-Fi. At Schlage, we believe in building flexible and interoperable solutions that are rooted in open design standards. We recognize that Schlage locks or readers are managed by a wide variety of physical access control solutions, that is why we have made software development tools available to industry leading providers. Please consult with your physical access control service (PACS) provider to determine if Schlage Mobile Access Credentials have been integrated to work with your system.

\* Dependent on device. Schlage MTB Readers can be configured to read up to 30', Schlage Control™, NDEB and LEB wireless locks are configurable and can read up to 15'.

## Features and benefits

### Mobile credential users:

- Supports iOS and Android; available in the Apple Store and Google Play Store
- Quick response from smart device to mobile enabled lock or reader
- Unlock an opening from up to 30\* feet away
- Best-in-class asymmetric credential encryption
- Anti-theft biometrics using the phone's fingerprint or facial recognition features
- Works without internet connection or cellular service at the opening

### Site administrators:

- Compatible with mobile enabled hardware including Schlage Control™, MTB Readers, NDEB and LEB wireless locks
- Easy to enroll or remove mobile credential access at anytime
- Track access events using ENGAGE on your computer or smart device
- Simplified pricing model, pay as you go
- **NEW:** Assign credential type including master, normal, toggle, freeze, pass through, blocked and lockdown
