

CADT Data Dictionary (Core Registry Module 1)						
Last updated 2023-07-13 to reflect CADT 1.6.5						
Category	Name	Type	Required/Optional	User Input/Inferred	UI Description	Use
Projects						
Projects	Warehouse Project ID	GUID	Required	Inferred (system generated)	Unique identifier for	Primary key for the project as a logical entity; can be exposed to user but as a read only label
Projects	Current Registry	Registry Picklist, Single Select	Optional	User Input	Name of the registry that	The name of the registry that currently hosts the project
Projects	Project ID	String	Required	User Input	Identifier used to track	Project ID assigned to the project by the hosting registry
Projects	Registry of Origin	Registry Picklist, User Entry	Required	User Input	The registry that	Name of registry where the project was previously listed, if different from current registry
Projects	Origin Project ID	String	Required	User Input	Identifier used to track	Project ID assigned to the project by the origin registry
Projects	Program	String	Optional	User Input	Use this field to	If defined by registry due to use of programmatic structure by the registry
Projects	Project Name	String	Required	User Input	The name of the project	Name of the project in the hosting registry
Projects	Project Link	URL	Required	User Input	Place a URL link to the	External link to project on the registry's website
Projects	Project Developer	Multi-String	Required	User Input	Enter the name(s) of the	Ordered collection of names of developers involved in the project; Users will enter developer names during initial project data entry
Projects	Sector	Sector Picklist, Multi-Select	Required	User Input	Select the industry sector	The industry sector that this project is targeting
Projects	Project Type	Project Type Picklist, Multi-Select	Required	User Input	Select the corresponding	Registry-specified descriptor(s) of the Type of a project
Projects	Project Tags	Multi-String	Optional	User Input	Add any tags, separated	Collection of registry-defined, searchable metadata tags
Projects	Covered by NDC	Picklist, "Inside NDC", "Outside NDC", "Unknown"	Required	User Input	Select whether the	Flag indicating whether this project is covered under the country's NDCs
Projects	NDC Information	String	Optional	User Input	Add text description to	Registry-specified description of how the project falls under the country's NDC. Only valid if "Inside NDC" is selected.
Projects	Project Status	Status Picklist, Single Select	Required	User Input	Select the status that best	Current status of the project (e.g. validated, registered, expired, etc.)
Projects	Project Status Date	Date	Required	User Input	Enter the date that	Calendar date when the status of the project was last updated
Projects	createdAt	API	Optional	API Generated	N/A	Date and time this Project record was created; autocreated by API when the record is first created
Projects	updatedAt	API	Optional	API Generated	N/A	Date and time this Project record was updated; autocreated by API when projects table is manipulated and when any related table
Projects	Unit Metric	Unit Picklist, Single Select	Required	User Input	Select the metric that	The metric used to assess the outcomes produced by the project (e.g. kWh, MW, tCO2, etc.)
Projects	Methodology	Methodology Picklist, Single Select, User Entry	Required	User Input	Select the methodology	The monitoring methodology used for calculating outcomes
Projects	Methodology2	Methodology Picklist, Single Select, User Entry	Optional	User Input	Select the methodology	If applicable, a second methodology used concurrently for calculating outcomes
Projects	Validation Body	Validation Body Picklist, Single Select	Optional	User Input	Select the validation	The name of the validating organization
Projects	Validation Date	Date	Optional	User Input	Enter the date when a	The calendar date the project was validated by the validating organization
Projects	Project Description	String	Optional	User Input	Enter a description to	This field is meant to give external viewers a sense of what is being done with the project - it should excite the reader into wanting
Estimations	Warehouse Project ID	GUID	Required	Inferred from projects table	Unique identifier for	Foreign key to Projects table
Estimations	Estimations ID	GUID	Required	Inferred (system generated)	Identifier for a specific	Generated by the Climate Warehouse, identifies the estimation record
Estimations	Period Start	Date	Required	User Input	Enter the date for the	Start date for the estimated crediting period
Estimations	Period End	Date	Required	User Input	Enter the date for the end	End date for the estimated crediting period
Estimations	Unit Count	Integer	Required	User Input	Enter the number of units	Estimated number of outcomes produced in the specified crediting period
Locations	Warehouse Project ID	GUID	Required	Inferred from projects table	Unique identifier for	Foreign key to Projects table
Project locations						
Locations	Warehouse Location ID	GUID	Required	Inferred (system generated)	Identifier for a specific	Primary key for the Location table
Locations	Country	Country Picklist, Single Select	Required	User Input	Select the name of the	Country in which project is located
Locations	In-Country Region	Multi-String	Optional	User Input	If applicable, please enter	Region(s) or subnational division in which project is located, if applicable
Locations	Geographic Identifier	String	Required	User Input	Enter GPS coordinates, an	This gives additional specificity to where the project is being conducted. Some projects may list GPS coordinates, some may not
Locations	fileId	String	Optional	User Input	Enter the file id from the	Used to reference a file from the filestore
Ratings						
Capture independent assessment of additional attributes of mitigation activities (e.g. sustainable development co-benefits, project risk assessments, etc.)						
Ratings	Warehouse Project ID	GUID	Required	Inferred from projects table	Unique identifier for	Foreign key to Projects table
Ratings	Project Rating ID	GUID	Required	Inferred (system generated)	Identifier for a specific	Foreign key to Projects table
Ratings	Rating Type	Rating Type Picklist, Single Select	Required	User Input	Select the rating type that	The name of rating or rating module
Ratings	Rating Value	Decimal	Required	User Input	Enter the rating that was	The score received by the project on this rating module
Ratings	Rating Range Lowest	Decimal	Required	User Input	Enter the lowest possible	Worst score possible on this rating module
Ratings	Rating Range Highest	Decimal	Required	User Input	Enter the highest possible	Best score possible on this rating module
Ratings	Rating Report Link	URL	Required	User Input	Enter the URL link to the	Link to the rating report generated for this project by the rating module
Co-Benefits						
Key objective of Article 6 is to foster increases in collective ambition, while supporting sustainable development and environmental integrity. SDG benefits could be listed, and when available, provide information on its verification.						
Cobenefits	Warehouse Project ID	GUID	Required	Inferred from projects table	Unique identifier for	Unique identifier for projects within the Climate Warehouse.
Cobenefits	Cobenefit	GUID	Required	Inferred (system generated)	Identifier for a specific co-	Identifier for a specific co-benefit associated with a project
Cobenefits	Cobenefit	Picklist, User Entry	Optional	User Input	Enter the co-benefit	Enter the co-benefit achieved with the project.
Units						
Units	Warehouse Unit ID	GUID	Required	Inferred (system generated)	Unique identifier for the	Primary Key for a block of units as a logical entity
Units	Issuance ID	GUID	Required	Inferred from issuances table	Identifier for a specific	Foreign key to Issuances table from registry
Units	Label ID	GUID	Required	Inferred from Labels table	Identifier for a label applie	Foreign key to Projects table
Units	Units Issuance Location	GUID	Required	Inferred from project locations table	Identifier denoting the	Foreign key to project locations table
Units	Unit Owner	Government/Ministry, Private Owner Name, or P	Optional	User Input	Enter the name of the	Name of the legal organization/country that is the current owner of the units
Units	Country Jurisdiction of Owner	Country Picklist, Single Select	Required	User Input	Select the country which	The name of the country jurisdiction that applies to the unit owner organization
Units	In-Country Jurisdiction of Owner	String	Optional	User Input	region within the country	Regional or sub-national jurisdiction that applies to the unit owner organization
Units	Unit Block Start	String	Required	Inferred	Denotes the start of the	First serial number in a sequential collection of unit serial numbers
Units	Unit Block End	String	Required	Inferred	Denoted the end of the	Last serial number in a sequential collection of unit serial numbers
Units	Unit Count	Integer	Required	Inferred	Shows the total amount	Count of units in the issued block
Units	Vintage Year	Date YYYY	Required	User Input	Enter the year in which	The year (or vintage) when the units were awarded
Units	Unit Type	Picklist, Single Select	Required	User Input	Select the type that best	Select the type of outcome achieved - reduction, removal, etc.
Units	Marketplace	Picklist + custom input option	Optional	User Input	Select, or manually enter,	Exchange, token or other location where this block of units can be purchased
Units	Marketplace Link	URL	Optional	User Input	Enter the URL which links	Hyperlink to the marketplace that is hosting that unit (only for units listed on a marketplace)
Units	Marketplace Identifier	String	Optional	User Input	Enter the unique	If issued in a marketplace, the identifier of the units in that marketplace

Units	Unit Tags	Multi-String	Optional	User Input	Enter additional	A field used to denote an additional attribute that is not captured in other fields
Units	Unit Status	Pick list	Required	User Input	Select the status that best	The unit status within its lifecycle
Units	Unit Status Reason	String	Optional Unless status	User Input	Enter the appropriate	Used for describing why a particular status is being used (ex. Retired status; this field would be used to describe the purpose the
Units	Unit Link Registry	URL	Required	User Input	Enter the URL which links	Hyperlink to information about the units
Units	Corresponding Adjustment Declared	Picklist, Committed, Not Required, Unknown	Required	User Input	Select whether the units	Determination on whether a corresponding adjustment is needed or not (or it is unknown)
Units	Corresponding Adjustment Status	Picklist, Not started, Pending, Completed	Required	User Input	Select the corresponding	Information whether the unit adjustment has actually taken place or not
Issuances						
Issuances	Warehouse Project ID	GUID	Required	Unique identifier for projects within t	Foreign key to Projects tab	Foreign key to Projects table
Issuances	Issuance ID	GUID	Required	Unique identifier for a specific issuan	Primary key for the issuan	Primary key for the issuances table
Issuances	Issuance Start Date	Date	Required	User Input	Enter the date for which	Date which a unit was issued
Issuances	Issuance End Date	Date	Required	User Input	Enter the date for which	Date which a unit was ended
Issuances	Verification Approach	String	Required	User Input	Enter the verification	Approach used for the units in the issuance period
Issuances	Verification Report Date	Date	Required	User Input	Select the date when the	Calendar date when the verification was completed for a particular issuance
Issuances	Verification Body	String	Required	User Input	Enter the organization	Validating body that performed the verification for an issuance
Related Projects						
Related Projects	Warehouse Project ID	GUID	Required	Inferred from projects table	Unique identifier for	Foreign key to Projects table
Related Projects	Related Project ID	Picklist OR string	Required	User Input	Enter the identifier used	This is the project ID that was created by the registry
Related Projects	Registry	Picklist, User Entry	Optional	User Input	Enter the registry that	The registry that houses the project
Related Projects	Related Project Relationship Type	Picklist	Optional	User Input	Select the relationship	Information about the relationship between the projects, ex. Subset
Labels						
The label denotes the eligibility of units for particular use of what the unit may be used for. The label will include voluntary and compliance type labels, including authorizations from sovereigns from the letter of authorization.						
Labels	Warehouse Project ID	GUID	Required	the Climate Warehouse.	table	Foreign key to Labels table
Labels	Label ID	GUID	Required	being applied.	table	Primary key for the Labels table
Labels	Label	String	Required	Enter the name of the label that is be	Describes the type of label	Enter the name of the label that is being applied
Labels	Label Type	Picklist, string	Required	User Input	Select the type of label tha	Describes what type of qualification is being applied: endorsement, letter of qualification, letter of authorization, letter of approval
Labels	Crediting Period Start Date	Date	Required	User Input	Enter the start date for	This is the date that describes the period of time which units are being credited.
Labels	Crediting Period End Date	Date	Required	User Input	Enter the end date for	This is the date that describes the period of time which units are being credited.
Labels	Validity Start Date	Date	Required	User Input	Enter the start date for	This is the date that describes when the label is valid for
Labels	Validity End Date	Date	Required	User Input	Enter the end date for	This is the date that describes when the label is valid for
Labels	Unit Quantity	Integer	Required	User Input	Enter the amount of units	Count of the units that this label applies to; this is important because a certain issuance might have some units that fall into a
Labels	Label Link	URL	Required	User Input	Enter the URL which	Link to the label in question

These values are current as of early 2023. The current set of picklist values can be obtained here: <https://observer.climateactiondata.org/api/v1/governance/meta/picklist>

Projects Table														Locations Tab	Ratings Table	Co-Benefit Table			Units table		
Current Registry	Project Sector	Project Type	Covered by NDC	Project Status	Unit Metric	Methodology	Validation Body	Country	Rating Type	Co-Benefit Type	Unit Type	Unit Status	Corresponding Adjustment Declaration	Corresponding Adjustment Status
