THE PROBLEM

Businesses are losing revenue And they don't know why!

Revenue slips away at every stage: prospects go undiscovered, follow-ups get missed, and buying signals go unanswered.

28%

Sales reps spend only 28% of their week actually selling

70%

Nearly 70% of online shopping carts are abandoned

3.7×

Businesses that respond within 5 minutes close 3.7× more deals

As a Result

Leads go unanswered · Sales opportunities are lost · Follow-ups happen too late ·

Customer experiences become inconsistent · Businesses spend more on software while seeing limited ROI

SELL

From “What should I buy?” to “Add to cart.”

Understands intent, asks relevant questions, recommends and compares products, upsells, adds items to cart, and guides the shopper from hello to checkout.

Understand and Track

See what every shopper is doing, and what it means.

Tracks product views, cart activity, checkouts and purchases to identify buying signals, customer drop-offs, high-interest products, and where revenue is leaking.

Recover

Surface abandoned-cart opportunities. Quantify value at risk. Set merchant-controlled discount limits. Show where intervention has the highest potential.

AI combines conversation with behavioural commerce data, so the agent can understand not only what the customer says, but what they do.
