

SMI

Shalimar Metal Industries

Complete Interior, Metal & Smart Energy Solutions

Delivering an integrated, all-in-one approach across interior design, precision metal work, MEP services, and solar solutions—crafted for modern spaces with premium execution and seamless coordination.

About Us

SMI, Shalimar Metal Industries, delivers complete interior design, metal work, MEP, and solar solutions through one integrated team—bringing together design, execution, and coordination for a seamless experience.

Fragmented Services

Customers need multiple vendors for interior design, metal work, MEP, and solar solutions.

Coordination Issues

Lack of integration causes delays, quality inconsistencies, and cost overruns.

Expertise Gap

Finding skilled professionals across multiple domains is difficult and time-consuming.

Our Integrated Solution

All Services Under One Roof

Interior design, metal work, MEP systems, and solar solutions seamlessly integrated into one complete team—eliminating the need for multiple vendors.

End-to-End Execution

From concept and design through material selection, installation, and final delivery, we manage every step with precision.

Quality, Speed & Affordability

Premium results powered by modern technology, on-time delivery, and competitive pricing.

Our Services

Integrated solutions that bring design, technical execution, and sustainable systems together under one roof.

Interior Design

Transforming homes and commercial spaces with thoughtful layouts, refined finishes, and customized aesthetics that balance beauty and function.

MEP Services

Mechanical, electrical, and plumbing solutions designed for reliable performance, efficient systems, and seamless project integration.

Metal Work

Custom gates, railings, frames, and structural metal solutions with precision craftsmanship and durable, high-quality finishes.

Solar Solutions

End-to-end solar systems that support energy efficiency, long-term savings, and a more sustainable built environment.

Our Work Process

From Concept to Completion

Requirement Discussion

Understanding client needs

Design & Planning

Creating detailed designs and specifications

Material Selection

Choosing premium materials and components

Execution & Installation

Professional installation across all services

Final Finishing & Delivery

Quality checks and handover

MEP & Solar Solutions

Smart Systems for Modern Living

Mechanical Systems

HVAC, ventilation, and climate control solutions

Plumbing Solutions

Water systems, fixtures, and efficient drainage

Electrical Services

Wiring, fittings, smart home integration, and safety systems

Solar Panel Installation

Renewable energy solutions for cost savings and sustainability

These essential services seamlessly integrate with our interior design and metal work offerings, providing truly complete and efficient home and commercial solutions.

Market Opportunity

Expanding Real Estate Market

Rapid growth in residential and commercial construction creates consistent demand for quality interior work.

Increasing Disposable Income

Growing middle and upper-class segments seeking premium living experiences drive interior design spending.

Renovation Boom

Homeowners increasingly investing in property upgrades and renovations to enhance value and comfort.

Business Model

Flexible Pricing

Project-based pricing tailored to your specific requirements and budget constraints.

Standard Packages

Curated packages for common projects including living rooms, kitchens, and bedrooms with transparent pricing.

Premium Upgrades

Enhanced materials, custom features, and expedited timelines available for clients seeking elevated experiences.

Portfolio Highlights

Our portfolio demonstrates expertise across interior design, custom metal work, MEP installations, and solar solutions. Each project reflects our commitment to quality, innovation, and customer satisfaction.

Competitive Advantage

Affordable Premium

Premium quality without the premium price tag. We deliver exceptional value through efficient processes and direct sourcing.

Skilled Craftsmanship

Experienced artisans and designers combine traditional techniques with modern innovation for superior results.

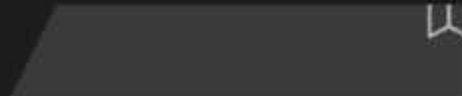

Fast Delivery

Streamlined workflows and project management ensure on-time completion without compromising quality standards.

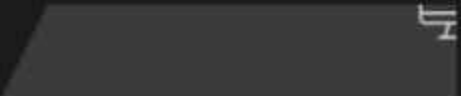

Growth Strategy

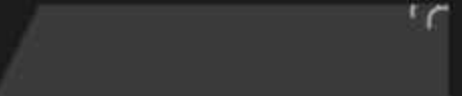

Geographic Expansion

Launch operations in 3 new cities within 18 months to establish regional presence and market share.

Service Diversification

Expand solar energy solutions and MEP service offerings to capture the growing renewable energy market.

Team & Technology Growth

Expand the skilled workforce by 50% and invest in modern equipment and digital platforms to scale delivery.

Investment Opportunity

Seeking Strategic Investment

We're raising capital to accelerate growth across our integrated service platform, expand into new markets, and scale our team to meet growing demand.

Use of Funds

- Marketing campaigns and brand development
- Equipment, tools, and technology infrastructure
- Team expansion and specialized training programs
- Digital platform and operational systems

Partnership Benefits

Investors receive equity stake, quarterly performance updates, and strategic advisory opportunities in a high-growth market.
