

Company Profile

Veritrufide Accura Private Limited

Veritrufide Accura Private Limited is a mission-driven safety technology company focused on building **India's next-generation real-time verification and accountability infrastructure** for the offline world. The company develops advanced solutions that enhance **public safety, identity verification, and traceability** across transportation, institutions, service sectors, and public spaces.

Our flagship, **internationally patented platform – Safe Track Way™**, addresses one of India's most critical and long-standing challenges: the absence of **real-time verification and traceability in offline interactions**. While digital platforms and identity systems exist, the majority of daily interactions—such as auto and e-rickshaw rides, service providers entering homes, and visitors accessing campuses—remain unverified and untracked.

Veritrufide Accura bridges this gap by transforming offline interactions into **secure, traceable, and accountable digital events**, without requiring smartphones for service providers. This offline-first approach enables coverage of nearly **90% of the unorganized and semi-organized ecosystem**, where safety risks are highest.

Our Flagship Technology – Safe Track Way™

Safe Track Way™ is an **internationally patented, offline-first safety and verification ecosystem** that combines:

- **Smart ID Cards (QR/RFID enabled)** issued after Aadhaar-based KYC
- **Real-time verification and interaction logging**
- **AI-enabled Command & Control Center**
- **Law-enforcement support for rapid last-interaction tracing**

The platform uniquely records **who interacted, when, and where**, creating a verified digital trail that significantly reduces police **Phase-1 investigation time from 5–6 hours to under 10 minutes**.

Leadership & Team

- **Yogesh – Founder, Inventor & Managing Director**
- **Mr. Binod Kumar – Co-Founder & Technical Head (Lead Development Team)**
- **Mr. Vikrant Sharma – Director**

The leadership team combines deep domain understanding, technology innovation, and a strong commitment to public safety and accountability.

Vision

To build **India's most trusted offline safety and verification network**, where every interaction is verified, traceable, and accountable.

Mission

To empower citizens, institutions, and law enforcement with a **secure, scalable, and ethical platform** that enables real-time verification and proactive safety in everyday offline interactions.

Current Status & Roadmap

Veritrufide Accura is currently in the **development and pilot phase** of Safe Track Way™, with initial launches planned in **Chandigarh, Mohali, Panchkula, Gurugram, and Delhi**, followed by **pan-India expansion**. The company is actively engaging with institutions and law-enforcement stakeholders for pilot deployments.

Why Veritrufide Accura

- Internationally patented technology
- Offline-first, smartphone-independent design
- Strong law-enforcement use case
- Multi-sector scalability
- First-mover advantage in offline safety infrastructure
