- **Database:** MySQL, Postgres SQL, Mongo DB

Experience

Tech Lead - Elevatecode Technologies Pvt Ltd. | March 2025 - Present

Leading the tech team in a service-based company, delivering diverse client projects across React, Node.js, and other technologies. Oversee end-to-end development—from architecture and database design to API development and deployment. Manage cross-functional teams, conduct code reviews, and ensure quality delivery. Also involved in building and integrating GenAI-powered solutions for modern application needs.

Tech Lead - EStudent Technologies Pvt Ltd. | August 2024 - March 2025

Led the tech team in a product-based company, managing full-stack development using Yii2, Laravel, and Node.js. Handled project setup, database design, API development, and deployment. Conducted code reviews, implemented new features, and oversaw GitHub workflows and server deployments.

Senior Backend Developer & ATL - Tech Web Labs | April 2022 - August 2024

- I handle various aspects of application development. I start by setting up the initial project structure, creating databases, and designing tables. I specialize in developing APIs in Yii2, Laravel or Node Js that seamlessly connect with the front, managing complex logic aligned with the application's features.
- As a team leader, I conduct code reviews to ensure quality and optimize the codebase. I actively engage in researching and implementing solutions for new and complex features, staying up-to-date with industry trends.
- I'm also responsible for managing project repositories on GitHub, fostering collaboration, and overseeing the deployment of projects to servers for a live environment. My role encompasses the entire development lifecycle, from setup to deployment.

Web Developer - Jharkhand IT Solutions | September 2019 - March 2022

- Proficient in crafting static and dynamic websites using HTML, CSS, JavaScript, Vue.js, and Laravel, contributing to numerous successful projects.
- Led a team in a government project, utilizing Laravel to deliver a robust solution. Ensured effective collaboration, streamlined project management, and maintained high-quality standards.
- Proactively stayed updated with emerging technologies, showcasing a commitment to continuous learning. Contributed throughout the development lifecycle, from conceptualization to deployment, in a dynamic and innovative manner.

Web Developer - Get E Ideas, Chandigarh | Feb 2019 - Aug 2019

- This was the start of my career I joined here after completing my 6-month course in PHP and have learned WordPress and other frontend and backend technologies
- I have not been able to work here too long but this has really helped me to boost up my career.

Recent Projects

Hare Krishna Community

Node.js, React, Express, MongoDB, AWS (CloudFront)

Community application inspired by Instagram, featuring event bookings, user feeds, likes, shares, comments, admin dashboard, and a mobile app.

- Led project architecture and development; built all backend APIs and major frontend features in React.
- Managed AWS deployment, configured CloudFront for optimized content delivery.
- Enabled scalable, secure user authentication and high-engagement platform features.

Salem

Node.js, React, Express, MySQL

Service booking platform similar to Urban Company, supporting multi-service bookings and smart worker assignment through a dedicated mobile app.

- Designed and developed backend APIs, real-time booking and worker assignment logic.
- Led a cross-functional team, overseeing end-to-end backend and frontend delivery.
- Optimized MySQL queries and implemented efficient, scalable data models.

Law GPT

Node.js, React, Express, MongoDB, Python

AI-powered legal platform leveraging web-scraped legal databases for a generative LLM chatbot.

- Built a Python-based data scraper to automate legal document ingestion for the knowledge base.
- Developed backend APIs for seamless integration with the LLM model.
- Created a responsive React website, handling all API and AI integrations.
- Led project team, ensuring smooth AI workflow and data pipeline execution.
