

# FLOOR STRIPPER

PVC • Thermoplastic • Rubber  
Marble • Terrazzo

## USES

*Floor Stripper* is a clear, water-based stripper to remove metallised and non-metallised floor polishes.

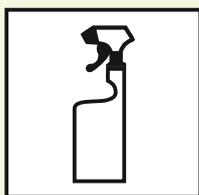

The modern, caustic-free formula reduces the risk of ongoing polish problems and the rinse-free formulation reduces preparation time.

Use to remove metallised and non-metallised floor polishes from PVC, thermoplastic, rubber, marble and terrazzo.

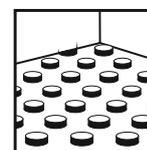

## DIRECTIONS

Test for surface compatibility before use. Always brush floor to remove debris before application. Dilute *Floor Stripper* with water according the required usage and apply to the floor with a mop or triggerspray. Allow 5-10 minutes contact time, agitate using a scrubbing pad and mop or extract as much slurry from the floor as possible.

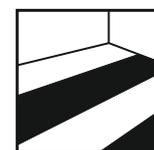

**N.B. May alter the colour of wood or linoleum floors. Some varnishes may be softened or removed. Always test surface compatability prior to application.**

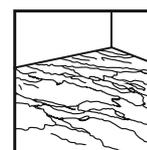

## AREAS OF USE

Rubber

PVC

Marble

## DILUTIONS

FLOOR STRIPPER : WATER			
Normal Use	Heavy Build- Up	Machine Strip	Spray Strip
1:5	1:3	1:5	1:5
