

LENOVO L27i

FLOAT VIVID IMAGES INTO YOUR HOME.

THE MODERN, MINIMAL SCREEN FOR SCALING UP YOUR CONTENT.

A screen that graces your home should be a design feature itself. The ultra-slim Lenovo L27i-30 is a modern masterpiece of minimal design measuring just 7.1 mm thick at its head. That's not to say every dimension is small. An expansive 27-inch In-Plane Switching panel display floats seemingly in space between bezels that are barely there, drawing eyes from everywhere in the room. It's a good thing, then, that it produces consistent, unbroken color, no matter which angle you view it from up to 178°. So take in a movie with the whole family. The structure behind all this magic is a metal wedge stand designed and crafted for modern, minimalist appeal. But its function is every bit as beautiful as its form. Not only does it hold your mobile phone in an integrated rack, it also sneaks cables beautifully and dutifully out of sight through its neck to keep your home environment neat and clutter-free. And keeping your image stutter-free is a rapid refresh rate of 75 Hz¹ and built-in AMD FreeSync™² technology that makes entertainment, especially gaming, smooth with no ghosting or image tearing. Binge watching needn't mean eye fatigue because L27i-30 has TÜV Rheinland Eye Comfort certification, meaning it filters harmful wavelengths to safeguard your eyes.

Lenovo L27i-30 comes equipped with Lenovo's own "soft OSD" screen control Lenovo Artery³ software. Say goodbye to imprecise, laggy button-pushing and instead welcome an effortless, instant way to master the screen's performance to suit every kind of entertainment content or gaming and get the very best experience.

FEATURES OF LENOVO L27i-30 MONITOR

7.1
mm

Going big on minimalism

L27i-30's minimal styling and generous 27-inch, 1920 x 1080 FHD resolution, 3-side NearEdgeless screen add a future-cool touch to any home with a modern aesthetic. Its ultra-slim head, just 7.1 mm thick, is lightly framed by slender bezels so that movies seem to float. And holding all this aloft is a two-tone metal wedge stand that stays true to its minimalist philosophy by tidying unseen cables away and cradles your phone neatly in its integrated mobile holder.

A picture of complete comfort

L27i-30's generous 27-inch, In-Plane Switching panel display gives consistent, unspoiled images when seen from even the most extreme angle. Streaming your favorite movies with the family, everyone gets the same vivid, unbroken color images. And with TÜV Rheinland Eye Comfort certified technology that removes flicker and filters harmful blue wavelengths, users are protected against eye fatigue even during late nights binge-watching TV shows.

Smoother user experience

When it comes to entertainment, L27i-30 is a smooth operator, eliminating image tearing and stuttering from fast-moving gameplay thanks to built-in AMD FreeSync™² and a speedy screen refresh rate of 75 Hz¹. In fact, even adjusting the screen's performance is super-smooth because of Lenovo Artery³ software. This is an elegant "soft OSD" interface that lets users instantly and easily switch the scenario mode, brightness and other settings to produce the optimum performance for any gaming or entertainment usage.
