The Full Text for all R-Phrases and Hazard Statements are Displayed in Section 16.

| Composition comments | No classified ingredients, or those having occupational exposure limits, present above the |
|----------------------|--------------------------------------------------------------------------------------------|
| | levels of disclosure. |

| 4.1. Description of first aid measures | | |
|---------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Inhalation | Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. | |
| Ingestion | Not relevant. | |
| Skin contact | Wash skin thoroughly with soap and water. Get medical attention if any discomfort continues. | |
| Eye contact | Remove any contact lenses and open eyelids wide apart. Rinse immediately with plenty of water. Continue to rinse for at least 15 minutes. Get medical attention if any discomfort continues. | |
| 4.2. Most important symptoms | and effects, both acute and delayed | |
| Inhalation | Vapours in high concentrations are anaesthetic. Symptoms following overexposure may include the following: Headache. Fatigue. Dizziness. Central nervous system depression. | |
| 4.3. Indication of any immediate medical attention and special treatment needed | | |
| Notes for the doctor | Treat symptomatically. | |
| SECTION 5: Firefighting measures | | |
| 5.1. Extinguishing media | | |
| Suitable extinguishing media | Extinguish with the following media: Powder. Dry chemicals, sand, dolomite etc. | |

Unsuitable extinguishing Do not use water, if avoidable.

media

5.2. Special hazards arising from the substance or mixture

| Specific hazards Containers can burst violently or explode when heated, due to excessive pressure build-up. Vapours may be ignited by a spark, a hot surface or an ember. The product is flammable. Heating may generate flammable vapours. Hazardous combustion products Oxides of carbon. Thermal decomposition or combustion may liberate carbon oxides and other toxic gases or vapours. 5.3. Advice for firefighters Containers close to fire should be removed or cooled with water. Use water to keep fire exposed containers cool and disperse vapours. Special protective equipment for firefighters Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. SECTION 6: Accidental release for firefighters Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Section of firefighters Wear protective clothing as described in Section 8 of this safety data sheet. 6.1. Personal precautions. Do not discharge into drains or watercourses or onto the ground. 6.3. Environmental precautions Do not discharge into drains or watercourses or onto the ground. 6.4. Reference to other sections Wear protective clothing as described in Section 8 of this safety data sheet. See Section 11 for additional information on health hazards. Collect and dispose of spillage as indicated in Section 13. SECTION 7: Handling and storage Keep away from heat, sparks and open flame. Avoid spilling. Avoid contact with skin and eyes. Provide adequate ventiliation. Avoid inh | | | |

| SECTION 8: Exposure Controls/personal protection | SECTION 8: Exposure Contro | Is/personal protection | |
| 8.1. Control parameters Occupational exposure limits BUTANE Long-term exposure limit (8-hour TWA): WEL 600 ppm 1450 mg/m ³ | Occupational exposure limits BUTANE | pur TWA): WEL 600 ppm 1450 ma/m³ | |

Long-term exposure limit (8-hour TWA): WEL 600 ppm 1450 mg/m³ Short-term exposure limit (15-minute): WEL 750 ppm 1810 mg/m³ WEL = Workplace Exposure Limit

8.2. Exposure controls

| Appropriate engineering controls | All handling should only take place in well-ventilated areas. Provide adequate general and local exhaust ventilation. Observe any occupational exposure limits for the product or ingredients. |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Eye/face protection | Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses. Personal protective equipment for eye and face protection should comply with European Standard EN166. |
| Hand protection | Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with European Standard EN374. |
| Other skin and body protection | Wear appropriate clothing to prevent any possibility of liquid contact and repeated or prolonged vapour contact. Wear appropriate clothing to prevent skin contamination. |
| Hygiene measures | Use engineering controls to reduce air contamination to permissible exposure level. Provide eyewash station. |
| Respiratory protection | If ventilation is inadequate, suitable respiratory protection must be worn. Wear a respirator fitted with the following cartridge: Gas filter, type AX. Gas and combination filter cartridges should comply with European Standard EN14387. |

SECTION 9: Physical and Chemical Properties

| 9.1. Information on basic physical and chemical properties | |
|------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|
| Appearance | Aerosol. Liquid. |
| Colour | Colourless. |
| Odour | Characteristic. |
| Flash point | -40°C CC (Closed cup). |
| Upper/lower flammability or explosive limits | : 1.8 |
| Solubility(ies) | Insoluble in water. |
| Auto-ignition temperature | 410/580°C |
| 9.2. Other information | |
| | |
| Other information | None. |
| | |
| Other information | |
| Other information SECTION 10: Stability and re | |
| Other information SECTION 10: Stability and re 10.1. Reactivity | activity |
| Other information SECTION 10: Stability and re 10.1. Reactivity Reactivity | activity |
| Other information SECTION 10: Stability and re 10.1. Reactivity Reactivity 10.2. Chemical stability | activity There are no known reactivity hazards associated with this product. Stable at normal ambient temperatures. |
| Other information SECTION 10: Stability and re 10.1. Reactivity Reactivity 10.2. Chemical stability Stability | activity There are no known reactivity hazards associated with this product. Stable at normal ambient temperatures. |

| Conditions to avoid | Avoid heat, flames and other sources of ignition. |
|-------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 10.5. Incompatible materials | Avoid heat, names and other sources of ignition. |
| Materials to avoid | Strong acids. Strong alkalis. |
| 10.6. Hazardous decompositio | |
| Hazardous decomposition | Fire creates: Vapours/gases/fumes of: Carbon monoxide (CO). Carbon dioxide (CO2). |
| products | |
| SECTION 11: Toxicological int | formation |
| 11.1. Information on toxicologi | cal effects |
| General information | No specific health hazards known. |
| SECTION 12: Ecological Inform | nation |
| Ecotoxicity | Not regarded as dangerous for the environment. |
| 12.1. Toxicity | |
| Acute toxicity - fish | No information required. |
| Acute toxicity - aquatic invertebrates | No information required. |
| Acute toxicity - aquatic plants | No information required. |
| Acute toxicity - microorganisms | No information required. |
| 12.2. Persistence and degrada | ıbility |
| Persistence and degradability | There are no data on the degradability of this product. |
| 12.3. Bioaccumulative potentia | |
| Bioaccumulative potential | No data available on bioaccumulation. |
| 12.4. Mobility in soil | |
| Mobility | The product contains volatile organic compounds (VOCs) which will evaporate easily from all surfaces. |
| 12.5. Results of PBT and vPvE | 3 assessment |
| Results of PBT and vPvB assessment | This product does not contain any substances classified as PBT or vPvB. |
| 12.6. Other adverse effects | |
| Other adverse effects | Not available. |
| SECTION 13: Disposal considerations | |
| 13.1. Waste treatment method | <u>S</u> |
| General information | Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. |
| Disposal methods | Empty containers must not be punctured or incinerated because of the risk of an explosion. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. |

| SECTION 14: Transport information | | | |
|------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------|--|--|
