

Alcohol Hand Sanitiser

Rapid drying

Bactericidal passes EN 1040 (2005)

Contains 60% Alcohol

USES

Alcohol Hand Sanitiser is a rapid drying, non-rinse hand sanitiser designed to prevent the spread of contaminating organisms. It contains a minimum of 60% alcohol, which is proven to kill both gram negative and gram positive bacteria.

Alcohol Hand Sanitiser is ideal for use in establishments where infection control is a priority, E.g. hospitals, care homes, clinics, high risk food manufacturing and preparation areas, etc.

DIRECTIONS

Apply to the skin and rub in covering the whole area.
Alcohol Hand Sanitiser dries rapidly while killing bacteria.
Do not wash the product away or use material to dry the hands.

AREAS OF USE

Medical

Sanitising

DILUTIONS

Antiseptic to EN 1040 (2005).
Kills bacteria to European Standard.

Use biocides safely.
Always read the label and product information before use.
