

**Technical Information**

**SIMPLY DISHWASH POWDER PODS**, encapsulated soft pods, provide powerful dish, glass, cutlery and stainless steel cleaning for dishwashers. Suitable for both domestic and industrial uses, Simply Dishwash helps prevent scale, biofilm and protein build-up in the machine and on the items to be washed without damaging rubber fittings. Can be used in both soft and hard water and removes food, proteins and tannin stains.

Odourless and clean rinsing to ensure no tainting residues are left.

**Properties**

Appearance:	White powder with red and blue speckles (encapsulated in dissolving film).
Odour:	Odourless
pH:	ca. 9 (1%)
Solubility:	Easily soluble in water.

**Simply Dishwash Powder Pods** must be kept dry and in a sealed container. Having a coating of PVA dissolving film ensures that there is no skin contact with the encapsulated chemicals.

**Simply Dishwash Powder Pods** give a spotless finish to glassware whilst removing grease and food from pots, pans and stainless steel equipment in both hard and soft water. A vapour phase occurs in solution at approx. 40°C which produces a peracetic acid solution helping to sanitize and destroy bacteria.

**Simply Dishwash Pods** ensure strict portion control of chemical to help control environmental impacts as well as costs.

**Simply Dishwash Pods** are phosphate free and suitable for septic tanks.

Further information and formulation advice on individual applications is available on request.
