

Naturama

Green • Natural • Powerful

Naturama Premium is an all purpose cleaning agent made purely from plants and minerals.

Naturama Premium cleans and protects. After killing 99.99% of bacteria it provides a level of protection for up to 24 hours.

Green. Natural. Powerful

Made purely from plants and minerals, Naturama Premium is totally natural and extremely powerful, it has no negative impact on the environment and the user's health, unlike most other cleaning products. Naturama is Food Safe, Halal, Vegan and Kosher.

2-in-1

Naturama Premium cleans the surface and offers protection for up to 24 hours.

Lasting Protection

Tested and proved to continue to have an effect on the surface bacteria level for up to 24 hours, this product can be used in conjunction with Naturama Elite.

Unlike other cleaning products Naturama Premium will not interfere with the natural process of Naturama Elite and will help to provide a level of long lasting protection up to 45days.

ATP Testing

Naturama Premium regularly achieves zero scores in ATP testing, this is testament to the immense power of the product.

Alcohol Free

Non Toxic & VOC Free

How to use

This product is READY TO USE, please do not dilute. No need to clean surface first as this product cleans and protects. Apply to surface in Spray and Wipe Method. Leave to dry.

Where to use

Naturama Premium is a general purpose cleaning agent that can clean all surfaces and spills, without bleaching, staining or leaving a sticky residue.

VOC's

Unlike nearly all cleaning products Naturama doesn't contain Volatile Organic Compounds (VOC's). Many of today's respiratory illnesses such as vocational asthma can be directly attributed to VOC's. The use of Naturama provides reassurance that you are limiting exposure to these harmful air bound chemicals, therefore taking steps to safeguard the health of others.

Premium Testing

Naturama Premium was tested in an independent laboratory and achieved the following results in a BS EN 1276 test.

Organism	Log Reduction (Clean Conditions)
Pseudomonas aeruginosa	> 5.52
Enterococcus hirae	> 5.51
Staphylococcus aureus	< 4.03
Escherichia coli	> 5.54
