CS2230 SOLID STATE DRIVES

The PNY CS2230 M.2 NVMe SSD is an excellent choice for an NVMe upgrade from a SATA based solid state drive (SSD) in an NVMe enabled PC or MAC desktop or laptop computer. The CS2230 drive is designed to be a SATA SSD replacement to help realize faster boot times, quicker application launches, and better overall system performance. Do more in less time with NVMe; boot up, power down, and load applications up to 6 times faster than with SATA based SSD's.

The NVMe interface delivers exceptional performance of up to 3,300 MB/s seq. read and 2,600 MB/s seq. write speeds. It is designed to be a SATA SSD replacement to help realize faster boot times, quicker application launches, and better overall system performance. With no moving parts, the PNY CS2230 is highly durable, less likely to fail, and supports a 5-year limited warranty or TBW.*

The PNY CS2230 is engineered with the same level of quality and durability that our consumers have enjoyed with the CS900 SSD. We've taken the world's most advanced NAND flash and refined the CS2230 to achieve a higher threshold for endurance and reliability. PNY's extensive testing and rigorous validation process ensures compatibility across various platforms and multiple operating systems.
