

Hive Thermostat Mini for Heating (Self Install)

Mini works in the background to help you live more sustainably and avoid heating an empty home.

Product overview

The Hive Thermostat Mini is part of the next generation of smart heating devices. With features like Geolocation and smart scheduling, Mini works proactively in your home to save you money and energy by ensuring you're only heating your home when you need to. And it protects your home too, with Frost Protection working to ensure your pipes don't freeze in the winter. Its clear and simple design will blend seamlessly into your home as it gets to work in the background.

Hive works no matter who supplies your energy and will work with your existing heating system. With Hive, you'll never need to heat an empty home again so you could save up to £110 a year on your heating bills.

Hive Thermostat Mini for Heating (Hubless/Multizone) can be used to control your heating if you already have a Hub, and also to control additional heating zones in your home. If you already have a Hive Thermostat but wish to install or replace an additional thermostat for another heating zone (e.g. upstairs), the Hive Thermostat Mini for Heating (Hubless/Multizone) will let you control schedules and temperatures for each zone.

Product features

- **Beautifully Clear** – small but perfectly formed, Mini's elegant mirrored design and clear interface blends in with your home
- **Easy to Use** – change the temperature quickly and simply on the Thermostat itself or use the Hive app to set schedules, boost your heating or change to Holiday mode
- **Geolocation** - with the Hive app, you'll get a reminder to turn off the heating if you leave home when the heating is due to come on
- **Automatic Frost Protection** - if the temperature drops below 7°C in your home, Mini can turn on your heating to stop your pipes from freezing.
- **Create and edit heating schedules** – set up to six daily time slots to heat your home, seven days a week
- **Boost your heating** – give your heating a one-off boost for up to six hours on chilly days

Box includes

- Hive Thermostat Mini
- Receiver
- Hub

Key messages & benefits

- Hive Active Heating can save you up to £110 a year on your heating bills
- No need to switch energy supplier
- Works with your existing boiler
- Mini has your back by never letting you heat an empty home

Your Hive kit

- **Wireless Thermostat** – lets you control your heating when you're at home.
- **Hub** - plugs into your broadband router so you can control your thermostat remotely.
- **Single Receiver** – enables your thermostat to communicate with your boiler.

Extra info

- New-look Hive Thermostat Mini is not compatible with the interchangeable coloured frames.
- Hive Thermostat Mini for Heating is suitable for homes that have a combi boiler. If you have a conventional boiler with a separate water tank, then Hive Thermostat Mini for Heating and Hot Water is the right product for you.

Packaged Weight	667g
Packaged Height	17cm
Packaged Width	10.5cm
Packaged Depth	10.5cm
Batteries needed to power the product?	Yes
Batteries Included	4x DURACELL battery AAA

What you'll need to get Hive

- Works with wet underfloor heating systems but does not currently support electric underfloor heating.
- For the Hive app, you'll need an Apple iPhone or iPad (iOS 9 or higher) or a device running Android (min 4.4).
- Laptop or tablet with internet access and an up-to-date web browser (we recommend minimum: Microsoft Edge or the latest versions of Google Chrome, Firefox and Safari).
- Hive is a British Gas innovation, but you don't need to be a British Gas customer to buy the Hive products.
