Bayonet image

TCP Smart WiFi Classic Filament Smart bayonet cap B22 warm white which replaces a 60w traditional light bulb 806lm (8w).

Control your bulb through TCP Smart decorative filament bulb by app or smart speaker Alexa and Google.

Even when your not at home, you can control your smart bulb on/off with your phone using TCP Smart App. Set schedules for your smart bulb to light your home when your away or just to come on at dusk or turn off at sunrise. You can create a group for all of your smart bulb and control them all with just one command.

Control your smart bulb via your voice with Amazon Alexa, Google Assistant and IFTTT. Just give a voice command to turn on/off or dim/brighten your light. No hub required and easy to install.

Use this attractive Led filament glass light bulb in any fitting, providing 330 degree soft warm white light. Perfect for table lamps and decorative fitting where you want the bulb on show.

With LED filament technology, this bulb will save up to 80% energy consumption compared with ordinary bulb using only 8w of energy compared to a traditional 60w. Save your electricity bills with lower energy consumption and scheduled lighting.

TCP LED Smart bulb lasts up to 25,000 hours or 25 years lifetime with normal use (with average daily usage of 3hrs per day).
