IMPORTANT SAFETY INSTRUCTIONS

A

WARNING: A WARNING alerts you to the possibility of serious injury or death if you do not follow the instructions.

CAUTION: A CAUTION alerts you to the possibility of damage or destruction of equipment if you do not follow the corresponding instructions.

WARNING: Failure to read, thoroughly understand, and follow all instructions can result in serious personal injury, damage to equipment, or voiding of factory warranty! It is the installer's responsibility to make sure all components are properly assembled and installed using the instructions provided.

WARNING: Failure to provide adequate structural strength for this component can result in serious personal injury or damage to equipment! It is the installer's responsibility to make sure the structure to which this component is attached can support five times the combined weight of all equipment. Reinforce the structure as required before installing the component.

WARNING: Exceeding the weight capacity can result in serious personal injury or damage to equipment! It is the installer's responsibility to make sure the combined weight of all components attached to the RSM does not exceed 25 lbs (11.34 kg).

• The weight capacity of the RSM may be LIMITED to the lowest weight capacity of any other components located between the RSM and the supporting structure!

WARNING: Use this mounting system only for its intended use as described in these instructions. Do not use attachments not recommended by the manufacturer.

WARNING: Never operate this mounting system if it is damaged. Return the mounting system to a service center for examination and repair.

WARNING: Do not use this product outdoors.

IMPORTANT ! : The RSM mounts are designed to be:

- mounted to a 1-1/2" NPT or NPSM following ANSI/ ASME B1.20.1 (Schedule 40, 0.154" minimum thickness aluminum- ASTM B221) threaded extension column.
- mounted to double 2" x 4" wood stud cross bracing (1-1/2" on center) between two 2" x 4" ceiling joists; with a maximum drywall covering of 5/8".
- mounted to a concrete ceiling with a minimum thickness of 8" and a maximum drywall covering of 5/8"; or
- suspended from four 1/4" diameter (minimum) Grade 2 or better threaded rods (not included) which are secured to unistrut, angle or channel assembly overhead structural members (trusses or I-beams) by Grade 2 or better 1/4" channel nuts (not included).
- **NOTE:** RSM Series may be used with Listed Chief models WM110S, WM120S, WM130S, WM210S, WM220S, WM230S, WM240S, WM210SI, WM220SI, WM230SI, and WM240SI (not included).

TOOLS REQUIRED FOR INSTALLATION

PARTS

RSM INSTALLATION

NOTE: Models RSM-A/RSM-B/RSM-C/RSM-D are identical EXCEPT each provides a different keyed lock.

Threaded Pipe Installation

Carefully determine required mounting location. **IMPORTANT ! :** This will require knowing the lens to screen distance. See projector specifications for details on determining this distance.

Install 1-1/2" NPT or NPSM following ANSI/ASME B1.20.1 (Schedule 40, 0.154" minimum thickness aluminum - ASTM B221) threaded extension column (not included) into threaded collar until tight, with a minimum of four threads engaged.

WARNING: IMPROPER INSTALLATION CAN RESULT IN SERIOUS PERSONAL INJURY OR DAMAGE TO EQUIPMENT! Structural members MUST be capable of supporting five times the combined weight of all equipment being mounted.

- Align RSM with end of NPT pipe.
- Thread RSM up onto pipe by turning until hand tight.

Rough Alignment of RSM

- Turn RSM clockwise or counter-clockwise until front of mount is facing target.
- Secure RSM to pipe by turning set screw until tight.

CAUTION: DO NOT OVERTIGHTEN! Over tightening of setscrew can damage threads on pipe.

Turn security screw using a Phillips screwdriver until set screw cannot be seen through access hole in RSM.

INSTALLATION
